KEY BISCAYNE COMMUNITY FOUNDATION, CITIZEN SCIENTIST PROJECT, & KEY BISCAYNE COMMUNITY CENTER PRESENT

FillABag and Key Biscayne Mangroves

Manny Rionda is the founder of FillABag, a local organization dedicated to the cleaning of shorelines in Key Biscayne and around the country. This year, in a partnership including Key Biscayne Citizen Science Project, FillABag, and Miami EcoAdventures, a new initiative to clean mangroves around Key Biscayne was launched. Mangroves are a very important ecosystem for marine environments, but are often ignored during cleanup events due to the difficulty in accessing them. This lecture will include a short description of mangrove ecosystems, followed by video of a TEDx talk from Manny, and a Q&A with the audience.

In Person and via Zoom!

Thursday, December 15th, 2022
At 7:00pm

Key Biscayne Community Center
10 Village Green Way
Lighthouse Room, 2nd Floor

Online Zoom Lecture
Meeting ID: **820 0863 9373**
Password: **613438**

Refreshments will be served.
Free Admission & Open to the Public.

Students are encouraged to attend with a parent or guardian
