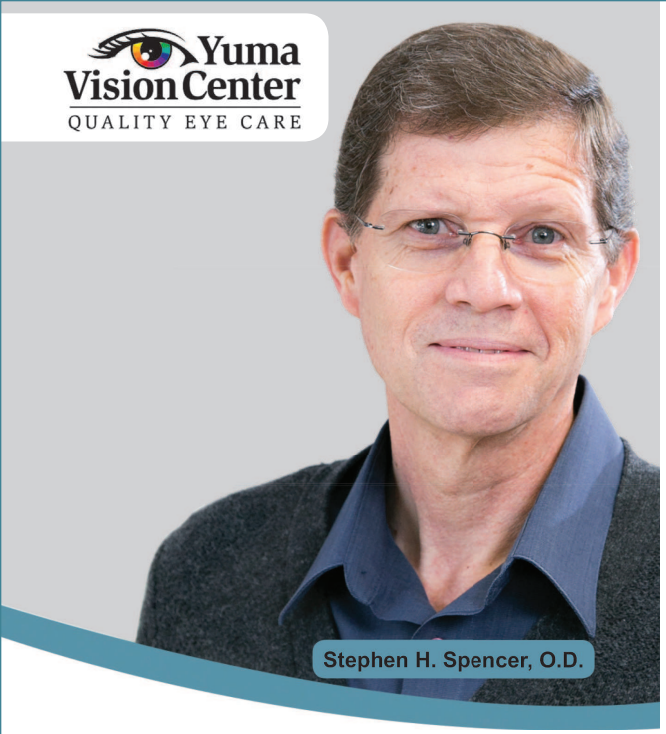
Yuma Vision Center
QUALITY EYE CARE



We sadly announce the **retirement of Dr. Stephen H. Spencer. Dr. Spencer has been part-owner of Yuma Vision Center for over 30 years.**

Unfortunately, this Spring Dr. Spencer was diagnosed with Parkinson's Syndrome after several months of testing and doctor visits. It was then official that he wouldn't be able to return to Yuma Vision Center.

We want to thank our patients for their patience. This was a personal journey for Dr. Spencer, and we wanted to wait until he and his family were ready to share the results, before passing this information on to you.

Yuma Vision Center continues to look for an additional Optometrist to join Dr. Tom Determan. We want to shorten our wait times for appointments, but we also want to choose a doctor who can provide the quality care our patients expect.

As a retirement gift, Dr. Spencer's wife, Wendy, has asked that patients write a short note about any special memory or visit they shared with Dr. Spencer over the years. These notes will be made into a book for the Spencer family to enjoy as life moves forward. Please email any notes to info@yumavision.com or drop them off at Yuma Vision Center.
