

# Breast Cancer Awareness...

Your best **protection** is early **detection**

Your yearly screening mammogram could save your life!

Annual screening mammography continues to be the preferred method of detecting breast cancer in its earliest, most treatable stages. If you are 40 years old or older, talk to your doctor about the importance of adding this exam to your routine breast health. It can save your life. Schedule yours today!

*in* **8**

Women will get breast cancer in their life. Protect yourself. Get screened!
