Finally seeing the old Kerr

By Dylan Jacobs

The Daily Collegian

When thinking about Kevin Kerr, one question always comes up: What?–
The potential has always been there, but injuries have derailed any sort of momentum he had.

But as of late, Kerr is starting to pick it up in each of the last two seasons, his first two goals since Dec. 1, 2018.

“I think anytime you score and do well individually it helps your confidence,” Kerr said. “It’s definitely a huge building block for me to continue getting better each weekend.”

Kerr was injured again between games, but returned and hasn’t missed a game since.

“It was a ton of fun more than things all the time so it’s great to see him play and be productive,” Sam Sternschein said. “He’s unselfish, back in shape. I think he’s obviously super talented, a great skater, he’s got great hands, he’s got great hockey sense, so it’s a lot of fun to play with him,” Kerr said. “I’m really excited about it.”

Gadowsky attributed their strong play together with the fact they think similarly and play well with each other.

He also stated that his effort during the break was key to his strong play.

“If I think he’s looking better and better,” Kerr said. “He really pushed himself during the break because he was off so well so he had to fend off any injury that was tough to hold on,” Gadowsky said. “He’s looked the best he’s looked all year.”

Kerr was selected as an alternate captain for this season, and captain Claire Berger knows the value that Kerr brings.

“I’m really happy for him,” Berger said. “He’s a real core and he’s a guy who’s already a just a great teammate and he makes other people better.”

In his freshman year, Kerr had 17 points in 37 games with a plus-10 rating.

“Any way we can give back and make an impact locally, I think, is really important,” Berger said.

Penn State released its first hazing report in accordance with the Timothy J. Piazza Antihazing Law on Jan. 15 — detailing all instances of misconduct.

The university followed a no-tolerance policy toward hazing and organizations found guilty of hazing may face disqualification or separation from the university, according to Penn State.

Penn State leaders were early advocates for changes to the law and are pleased that the Timothy J. Piazza Antihazing Law was signed into Pennsylvania law in October, signaling an important step toward addressing critical issues affecting campus safety and well-being across the Commonwealth, Powers said.

The report is the first since Penn State’s Office of Ethics and Compliance organized and shared the report.

OPINION | MARIANNE MESSA

Government shutdown at 30 days, week-old volumes about Trump

Day 27: Everything is at a standstill, perhaps nowhere more than in Trump’s White House. After 55 days of the partial government shutdown and Trump’s refusal to back down, the White House is awash in chaos. The president himself is apparently clueless over the situation.

For the shutdown’s 800,000 unpaid federal employees, it’s a holiday weekend without pay. For them, every day is Christmas without presents. It’s the brink for families of furloughed workers, who have to go without a paycheck, bumper to bumper in traffic, and short-staffed TSA checkpoints.

Airport safety is questionable as security lines weave through the terminal. The White House itself has been empty for weeks. The White House is now under federal inspection of high-risk foods. The president himself is left without a bathroom.

The shutdown is a flagrant violation of the law, evidence that the president’s refusal to end the shutdown has cost well over $6 billion, a third-degree felony. Hazing involving resulting in death or serious bodily injury is a third-degree felony.

The law also established categories for hazing resulting in death or serious bodily injury, requiring the U.S. Department of Education to report the number of hazing incidents, including incidents resulting in death or serious bodily injury. The law also amended the Higher Education Act to require institutions to report hazing incidents involving resulting in death or serious bodily injury.

The law also requires institutions and high schools to adopt a zero-tolerance policy toward hazing.

These institutions must enforce the policy, report violations of the policy and take the necessary disciplinary actions.

Penn State spokeswoman Lisa Powers, the office of ethics and compliance and the Office of Student Conduct. The Office of Student Conduct also enforces and enforces student conduct. The Office of Student Conduct also enforces and enforces student conduct.

Penn State’s Office of Ethics and Compliance organized and shared the report.

Sponsored by Senator Jake Corman, the Timothy J. Piazza Antihazing Law created tiers for hazing in Pennsylvania.

The report stipulates that hazing resulting in death or serious bodily injury will be charged as a third-degree felony. Hazing resulting in serious injury will result in a third-degree misdemeanor.

The law also establishes state law enforcement for hazing.

Penn State community with an update on greek life reform and an explanation of the role and feelings of new Timothy J. Piazza Antihazing legislation at the Centre.

Timothy Piazza died following the hazing-fueled 2016 pledge-marking ceremony of Beta Theta Pi. The university introduced chapter sanctions and other reform tactics in response to the hazing report.

The university suspended fraternities in the Highlands neighborhood and other fraternities are down around 30 percent. The university-suspended fraternities are being put into place, crime totals in the Highlands neighborhood have dropped 20 percent and cases at fraternity houses are down around 5 percent.

In addition, Panhellenic grade point averages are up 5 and many groups have increased their required GPA for new members.

Barren also mentioned greek Reeves, which he said have become a tool for community members to learn about specific chapter’s strengths and weaknesses. He also addressed the challenges that remain in the progress of greek life reform, including a November 2018 court decision that allowed members of two universities-suspended fraternities to operate as fraternity houses in violation of the law.

“Without the shutdown, Trump would probably have been in the gutter in a week or so,” said Steve Schmirler, a political scientist at the University of Minnesota. “The whole thing is done in hopes of one party or another getting away with the other side and bringing Trump to a knee.”

Penn State Defense Fund lawyer Palmer is budgeting for a long haul of hounding for a week or so, which may result in Trump’s removal from the presidency. The president himself is left without a bathroom.

FREE TO FLOW
UPUA partners with ‘Aunt Flow’ to bring free pads, tampons to campus

By Tina Locurto
THE DAILY COLLEGIAN

Whether using pads, tampons or the ever-growing popular menstrual cup, women who have periods need to be prepared to face the unavoidable visit of Mother Nature every month.

And, for when nature knocks unexpectedly, the University Park Undergraduate Association has solutions.

Starting this semester, UPUA and the menstrual company Aunt Flow have partnered to bring free pads and tampons to bathrooms in the HUB-Robeson Center.

Boxes of free pads and tampons can currently be found in the women’s, gender-neutral and family bathrooms in the HUB. These boxes will remain in the bathrooms until the end of the current UPUA term in March.

Aunt Flow, a menstrual company started by Claire Coder, donates one pad or tampon for every 10 that are sold. Currently, the company has donated 350,000 products, according to its website.

After elections for a new UPUA president and vice president are decided, the new administration can vote to continue the partnership with Aunt Flow.

UPUA vice president Laura McKinney has spearheaded the project since its conception. She said the inspiration behind starting this campaign was eliminating the cost barriers of expensive products.

“Providing menstrual products as a whole is such an essential thing, especially on a college campus when the cost of almost everything is exponentially higher,” McKinney (junior-broadcast journalism) said.

To put this into perspective, HuffPost calculated the average costs women might spend on their periods during their lifetime.

For tampons, the average lifetime cost is $1,773. Panty liners/pads can exceed costs of around $450 throughout a woman’s lifetime.

For YuNa Choi, a freshman representative for UPUA, interest in helping this initiative sparked from her passion for female empowerment.

“After joining UPUA and seeing this as one of the initiatives, I instantly knew that I wanted to help out,” Choi (freshman-international politics and economics) said. “I’m so happy about the change that we’re making on campus.”

Though the initiative is still relatively new, both Choi and McKinney said feedback has been positive.

At the Gender Equity Center, Programming Coordinator Jennifer Pencek said it’s important students have access to products they need — including sanitary products such as pads and tampons.

“Even if financial ability is not the leading cause of not having a pad or tampon when needed, I think many people have been in situations where they need one of the items and just don’t have one on them,” Pencek said.

Previously, McKinney said UPUA tested out a pilot program last semester providing free pads and tampons for just a few weeks. After much success came from that trial run, she said Aunt Flow reached out to UPUA to partner together providing pads and tampons for a longer period of time.

Moving forward, McKinney said she hopes future UPUA administrations aim to grow the initiative by placing more boxes in other high-traffic areas.

“It was something that I personally wanted so badly for the student body,” McKinney said. “To know that people like Aunt Flow and companies like [that], believed in not only myself but UPUA as a whole was great.”

Progress has been made, but we need to start seeing tangible goals and results

PSU must fix admitted diversity shortcomings

With the release of its newest diversity report, Penn State continues to mislead students and faculty about progress toward improving the university as a campus where students of color feel actually welcome and safe.

The university released a report meant to tout the steps that have been taken toward improving the climate for students of color that has been produced by the Office of Educational Equity. New reports of staff being “of diverse origin” (a euphemism for non-Caucasian) now make up 46 percent of faculty and 13 percent of staff, stated Penn State. It was a number of 20 percent that President Eric Barron, PSU’s leader, had promoted in the past.

The report, released in mid-February, is a frank admission of the reality of continuing problems that student of color feel on campus. For example, student of color feel that they are treated with less respect, have less opportunity for upward mobility and have less support than their white peers.

In the report, Barron also makes a direct statement about the current climate. He writes: “What can be said about the climate that students of color face today? That the climate may be different than it was 10 years ago, 20 years ago, 30 years ago, but it is certainly not welcoming and inclusive.”

He also states that the climate continues to be “hostile,” and that it is causing continuing difficulties for students of color. He adds: “It is important to recognize that for some students, the climate is still hostile, and continues to be a challenge.”

Barron also makes a statement about the climate for students and the future. He says: “It is important to recognize that for some students, the climate is still hostile, and continues to be a challenge.”

He also states that the climate continues to be “hostile,” and that it is causing continuing difficulties for students of color. He adds: “It is important to recognize that for some students, the climate is still hostile, and continues to be a challenge.”

The report also states that there is still a need for more diversity in the faculty and staff.

The report states that 30 percent of the students and faculty who are considered to be “of diverse origin” are students of color. The report also states that 13 percent of the staff are students of color.

Beaver Ave & Fraser St
The Buckeyes got their revenge.

Penn State is led by Evan Barratt and Anton Lander, who both rank second in the nation in scoring with 28 points each.

Six Nittany Lion players have 20 points or more, with the season and every place to take the ice except for the guarantees that have recorded a point this season for Penn State. Peyton Jones is expected to start in goal for Penn State. The pair has a save percentage of 90.1 this season.

Ohio State is coming off a home split against Michigan. The Buckeyes’ last trip to Pegula Ice Arena was last January, where the two teams split the series.

But even with all of the talented players makeing decisions with the ball, especially the young Nittany Lion's. It was a big one as it was the game

The game, will be tasked with slowing down this talented group of Ohio State forwards. As I mentioned last week, the four seconds left in the game. The Buckeyes have had a two headed attack in goal this season so far with Tompymm Knap and Sean Flanman splitting time between the pipes. "Napper" had his best save percentage of the season, stopping 90 percent of the shots the netminder has faced in the season. It was the first time since the 2017-18 season the goalies achieved an average.1.38 goals in his 12th appearance this season.

Nittany Lion fans will forever remember the night of No. 4 Ohio State this weekend with the right mentality against coach Guy Gadowsky's Buckeyes. Theatre major and All-American at 184, Shakur Rasheed hopes to shine both on the mat and on the stage

By Jake Aferiat

The Daily Collegian

Over the last year, Shakur Rasheed has carved out a role for himself as one of Penn State’s most marketable athletes. Rasheed’s success, both on the mat and on the stage, is a testament to the versatility of his personality.

WRESTLING

The senior All-American is 26-5 this year with 22 bonus point wins, including 12 pinfalls. While Penn State is more than comfortable with Rasheed in that role, coach Cael Sanderson uses him by his prescription.

“Rasheed, my favorite wrestler to watch is Rick and Morty Monopoly and as soon as I got it I said ‘Dude we’re playing this after the match 100%’,” Hall said.

Whether Rasheed has the intensity of Michael Jordan or not, he’s certainly got that drive to excel and understand what it means to be as a credited wrestler, which is why we’re so excited about him.

And while that’s likely, Cassar and Sanderson feel Rasheed’s destined for greatness in acting as well.

“He’s got that personality,” Sanderson said. “He’s got the look, he’s got the fit, he’s got the stage presence, he’s got the charisma.”

Whether Rasheed has the intensity of Michael Jordan or not, he’s certainly got that drive to excel and understand what it means to be on top.

That’s where Rasheed’s role as a comedian becomes beneficial to the Nittany Lions. He’s seen some skits of him and people are loving it. It’ll be fun to watch him pursue acting.

Rasheed’s comedic performances, as well as his wrestling here, will be a testament to his dedication.

The Nittany Lions are also poised to take home their eighth title in eight years and appear to be on their way to the NCAA championship.

The senior All-American went 24-5 last year with 15 bonus point wins, including 12 pinfalls. While he’s not the most recent Penn State’s match with Northwestern, it was on my birthday and Bo [Nickal] bought me a torrid start as the Nittany Lions.

“Shakur’s won the most out of all of us, but I wouldn’t say he’s the best, he’s just very reckless,” Hall said.

“His acting career,” Cassar said. “He’s got a wide range of roles but those are private and I don’t think he’s going to do anything like that.”

Rasheed, Cassar and the rest of the Penn State wrestling team have taken their training to the next level, especially when training or traveling away from the mat.

That’s a lofty statement for a wrestler, but there’s no doubt that Rasheed’s success is tied to his off-mat activities. From putting on a monologue in the college wrestling world recently, he’s likely to be the next big thing on the stage.

As a pastime, Netflix is everyone’s favorite go-to. After leaving “Friends” behind, many Penn State students believe that Netflix is their favorite way to unwind. “I watch Netflix when I want to chill,” Geoff Billingsley said. “I always pick a show that is on Netflix.”

Netflix has approximately 200 million subscribers worldwide, and its popularity continues to increase. With the release of two new series this year—WandaVision and Invincible—Netflix continues to dominate the streaming industry. With so many new releases, there is something for everyone. “I have been enjoying watching WandaVision. It’s my favorite show,” said Maya Ray. “It’s such a different kind of show compared to the others I’ve watched before.”

In addition to new releases, Netflix is also known for its reboots of classic shows. “I have been watching the new season of Stranger Things. It’s been really good so far,” Alex Wood said. “I have been watching the new season of Stranger Things. It’s been really good so far,” Alex Wood said.

Netflix is also known for its original content. “I have been enjoying watching The OA. It’s very unique and thought-provoking,” said Sarah Johnson. “I have been enjoying watching The OA. It’s very unique and thought-provoking,” said Sarah Johnson.
