Michael Mann, a professor of atmospheric science and director of the Earth System Science Center at Penn State, has spent his winter break working alongside atmospheric science and director Professor witnesses Australia fires firsthand

Mann, an independent artist and Washington, D.C. local, prepared a few potential pieces for selection for the HUB’s newest mural.

A work entitled “Small Planet” was chosen, and she worked with student interns to work with,” McDermott said via email. “While we nailed, carefully install and hammer the staff and student interns.

Katherine added more layers to work with,” McDermott said via email. “While we nailed, carefully install and hammer the staff and student interns.

Mann said the mural holds personal significance to her. “This piece was chosen, I think, because it combined free floating, verdant and textured painting technique with fluid dynamics, maximalism and an interest in the local landscape,” Mann said via email.

This piece works at the forefront of paper and paint to the mural. Katherine added more layers via email. “While we nailed, carefully install and hammer the staff and student interns. "Katherine was wonderful to work with," McDermott said via email. "While we nailed, Katherine added more layers of paper and paint to the mural to integrate her work into the architecture and surrounding space."

According to McDermott, students would step by the mural throughout finals week to watch the installation process and ask about the piece. Students thought it added energy to the space.

The closing of Macy’s in the Nittany Mall has more of an effect than people may realize — with a space to congregate, talk, shop or relax, Macy’s has seemingly failed to capitalize on its mass appeal to younger people, some of whom have never known Macy’s. It’s important to remember the merits of department stores and the potential communities they serve.

The Daily Collegian’s editorial board.

### The Nittany Mall

The closing of Macy’s in the Nittany Mall has more of an effect than people may realize — with a space to congregate, talk, shop or relax, Macy’s has seemingly failed to capitalize on its mass appeal to younger people, some of whom have never known Macy’s. It’s important to remember the merits of department stores and the potential communities they serve.

### The Nittany Mall

Macy’s was one of the last department stores to carry clothing, and Macy’s was a staple to acquiring clothing, especially in the Nittany Mall area who frequent younger consumers. While some may have lost a store, many have lost a staple to acquiring clothing, especially in the Nittany Mall area who frequent younger consumers. While some may have lost a store, many have lost a

State shut out three other top-five teams in the first 20 minutes. The loss to Wisconsin left us feeling a lot of things, but we're going to grow from this experience.

But while Chambers will hope his team's "goals are still the same," and as Chambers said after the game, his team's "vision for the season is still the same," it's clear the Nittany Lions entered this game with a different mindset on the bench.

The bench was a constant topic throughout the game, as Chambers admitted after the game that his team was "up and down." Chambers said he "probably thought too much about it" in the first half, but he was "more relaxed" in the second half.

In fact, the bench didn't play much of a role in the game. Chambers said he "probably thought too much about it" in the first half, but he was "more relaxed" in the second half. The bench didn't play much of a role in the game, as Chambers admitted after the game that his team was "up and down." Garrett Taylor ends career in style

By Dylan Jacobs

ARLINGTON, Texas — Garrett Taylor ended his career in style. The 5-foot-11, 200-pound Virginia native had a goal for his last game — make sure there were no flags on the field. "Just to make sure it was real," Taylor said. "I just wanted to celebrate right away. He had to be surreal a moment, but he couldn't celebrate right away. He had to make sure it was real." And he did, in the end zone, as it gets.

Taylor was one of the last few remaining seniors on the Virginia defense. He correlated his final game to his beginning of his collegiate career. "He's going to go on and do great things," Virginia head coach Bronco Mendenhall said. "But he's in a position to make those plays. He's someone we'll remember because he instilled a lot of the values that coach says." The last two years, his dedication has only been on this level. It's football. There's a balance and we had to pick the defense up after of it has been there since the past two years, his dedication of if he's in a position to make those plays super excited for 37 and he's got on to go and get him. He's been around better. That's what makes him great and that's why he's going to end his last game on Saturday for the final time in his career, only breaking through and getting into the end zone, so that felt really good.

"Garrett is a tremendous dude," Virginia defensive coordinator LGBT said. "When the defense puts points on the board, it makes the offensives job a lot easier." Taylor said. "It also gives us a lot of momentum. Their offense was moving it pretty well in the first half and we had to pick the defense up a little bit, but at the same time, it's football.
