

# Construction plan for I-70 bridge at Rocheport

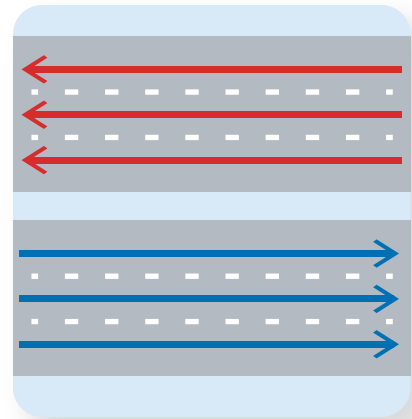

The \$220 million project has been in the works for six months and will create an eastbound and westbound bridge, each with three lanes.

**Today:** New bridge being constructed south of current bridge, which has two lanes of traffic.

**Spring 2023:** Old bridge is demolished and replaced. Traffic is diverted to the new bridge.

**Late 2024:** Both bridges open with three lanes in each direction.
