

CPS attendance ahead of Missouri post-pandemic

The state expects at least 90% of students to attend school at least 90% of the time. This chart represents that expectation and helps CPS monitor attendance. It is calculated by taking the total number of students who attended at least 90% of the school year and dividing by the number of students.

Attendance calculations varied during the pandemic years of 2019-2020 and 2021-2022.
