What is a Capital Improvement Program?

The City of Columbia's Capital Improvement Program (CIP) is a multi-year plan for capital investments in the City's infrastructure, facilities, and equipment. It is designed to address the challenges of supporting future infrastructure needs, while also addressing the City's current facility requirements. It includes items such as roads, bridges, sidewalks, public utilities, drainage projects, recreational facilities, buildings, and equipment. A CIP is important because it connects city development, comprehensive plans, and financial plans. Projects within the CIP are intended to reflect the community's values and goals, and also the overall policy goals of the City Council, including existing city-wide long range plans.

Columbia's City Charter provides policy for the Manager to follow in developing a CIP:

"The City Manager shall also secure an estimate of all capital projects pending and those which it is recommended should be undertaken (a) within the budget year, and (b) within the next five (5) succeeding years. In preparing the budget, the city manager shall review and may revise the estimates, as the manager may deem necessary."

Article 5, Section 35

The City of Columbia's master plans are the basis for the CIP. Columbia has several master plans designed to reflect the long-term needs and goals of each department. These plans are formulated to establish long term development plans that reflect Council policies. These long term plans are periodically revised and updated to reflect the City's changing needs. The CIP is meant to contain projects that fulfill these long-term needs and goals.

City of Columbia Master Plans

- Community Development Department Master Plans
 - Sidewalks
 - Bicycles

- Transit: Long Range Plan, Para-Transit, CBD
- Wastewater and Storm Water Integrated Management Plan
- Water and Light
 - Electrical distribution
 - Water distribution
 - Water system
- COLT (Railroad)
- Downtown Columbia Charrette Report (2010)

How is the CIP Document organized?

The CIP Document is grouped by department and includes a department narrative, a cover page with actuals from prior two years, anticipated current year, and proposed upcoming year, and report pages for all projects planned within the next five years. Each narrative includes information on what projects are upcoming, an update on current projects, and details on how projects in the department are funded.

The cover page includes information on the upcoming fiscal year as well as the prior three years. A graph shows the life-to-date authority compared to the actual expenditures, per department. Capital Improvement Projects are budgeted life-to-date, which means that authority budgeted in one fiscal year may be spent in another fiscal year. Directly below the graph is the data that feeds the graph. The information here shows the life-to-date authority, or appropriation. The table shows the expenditures in three categories: Prior Year Expenditures, Current Year Expenditures, and Encumbrances. The Total Remaining Authority by year is the Life-to-Date Appropriation less those three expenditures. The amount in the Proposed FY 25 column reflects the remaining authority, plus the total amount of appropriations planned for FY 25. The Fiscal Impact section of the summary page details the planned funding sources for FY 25 – where relevant, a pie graph is featured.

The report pages include information such as the name of the project, status, ward, fiscal year construction begins, the total amount appropriated, amount spent to date, funding still needed, and any amounts that are unfunded and/or will require passage of a future ballot in order to be funded and proceed. If a funding source shows a negative amount, it is likely that the negative amount was transferred to another project.

How is the CIP developed?

The CIP begins as a planning document, which gives the City an opportunity to prioritize and coordinate existing and future capital project needs. It is prepared under the direction of the City Manager with the assistance of the Planning and Finance Departments. The City staff review of capital projects has proven to be almost a year-round process, with all city departments continually reexamining and prioritizing their capital needs. However, the capital financing process is most involved from January through May each year. During this period City staff is responsible for compiling project needs, reviewing cost estimates, identifying financing options and planning a program schedule. Meetings are scheduled with each department to review, add, modify and prioritize all project requests. The Planning and Zoning Commission are invited to review the CIP Dashboard in June. The proposed CIP is considered by City Council during the annual budget process. Following approval from the Council, it then becomes a financial document so the City can determine capital projects that are within its current and future fiscal capacity. A summary of the CIP process is provided:

Schedule	Task
January	Projects are discussed within departments
February	Project priorities are discussed between departments and City administration
March	Final project requests are submitted by departments
March/April	Requests are reviewed by the City Manager and updated online on the CIP Dashboard.
June/July	The Planning & Zoning Commission reviews the CIP Dashboard.
July	Public hearing is held on the CIP. A five year CIP, with funding needs, is presented to Council with the budget document and the public is given the opportunity to comment.
August	Budget hearings are held. The public has additional opportunities to comment.
September	Budget hearing incorporating final revisions and adoption of yearly CIP with approved adjustments. Revised CIP document is prepared to reflect any changes made during the budget process.

Deciding which CIP projects to move forward and determining project timing are both very important to serving the needs of the City of Columbia. During the initial stages of the annual CIP process, departments prioritize CIP project requests based on six different categories ranging from Urgent to Deferrable. Using common criteria for determining and prioritizing CIP projects is critical to formulating long-term and short-term plans that reflect the City's values and goals.

Various citizen committees may be formed and appointed by the Council to evaluate projects to be funded through proposed ballot issues. A recent example was the committee formed to assist with passage of the Transportation Sales Tax issue approved by voters in November 2005, which included a list of priority projects to be funded by this tax as part of the CIP.

How are projects in the CIP funded?

The City of Columbia Finance Department evaluates the City's ability to pay for proposed capital projects. This is accomplished by reviewing past revenue and expenditure trends, as well as forecasting future revenues and expenditures for the course of the CIP period. The purpose of this process is to determine the amount of revenue, reserves, and fund balances available from existing sources to pay for capital investments to meet community needs. The following is a list of funding sources for City of Columbia CIP:

Capital Improvement Sales Tax

The City of Columbia uses the Capital Improvement Sales Tax (CIST) to meet capital needs for Public Safety and Transportation. This is a temporary one-quarter cent (0.25%) sales tax which was first approved in 1991 and must be approved by voters to be extended. In August 2024, voters approved the extension of the sales tax which will expire on December 31, 2035.

Parks Sales Tax

Columbia voters approved a one-quarter cent (0.25%) Parks Sales Tax in April, 2000. Half of this tax, or one-eighth cent (0.125%), is a permanent tax to support operational costs as well as limited capital projects. The remaining one-eighth cent is temporary and must be presented to the voters to be extended. This temporary portion has been used for capital projects, including construction of new parks and trails. The current one-eighth temporary tax was extended by voters in November 2021, for ten years, and will expire March 30, 2032.

Development Charges

When a building permit is issued for new construction, the City of Columbia assesses a fee, currently \$0.50 per square foot. Revenue from this fee is used for construction of collector and arterial streets.

County Revenue

This revenue originates with Boone County's one-half cent (0.50%) sales tax for road and bridge maintenance. Boone County has agreed to share a portion of the revenue with local municipalities. The City of Columbia utilizes this funding source to improve, maintain, construct, and repair city streets and roads. This County tax was renewed by voters in 2018 for a 10-year period, and expires in 2028.

Transportation Sales Tax Fund

This fund accounts for the City's one-half cent (0.50%) sales tax used to fund transportation-related projects. Examples include the public mass transportation system, construction and maintenance of streets, roads, bridges, and airports, to the extent of tax revenues.

Designated Loan Fund

This fund includes monies set aside to provide loans to various Enterprise and Special Revenue Funds.

Public Improvement Fund

The Public Improvement Fund was established to account for and disburse the portion of 1% General Revenue sales tax proceeds which have been allocated for the Capital Improvement Plan. The fund receives a portion of the city sales tax and is allocated for a wide range of public improvements to the City which includes general government projects. The amount of the one cent General Fund Sales Tax allocated to capital improvements from FY 01 to FY 19 was 4.1%. In FY 20, City Council approved an amendment to reallocate 2.1% of the General Sales tax back to the General Fund. In FY 26, there will be no additional allocation to the Public Improvement Fund.

Bond Funds

Utility funds (Water, Electric, and Sewer) may obtain voter approval for bond issues to help finance their capital project needs.

Enterprise Revenue

Enterprise Funds (Railroad, Water, Electric, Airport, Solid Waste, Sewer, Storm Water, Transit, and Parking) generate their own revenue which may be used to finance their capital project needs.

* This is current as of July 2025

** Includes estimate from department

*** Includes FY 26 budget request of \$6,990,000

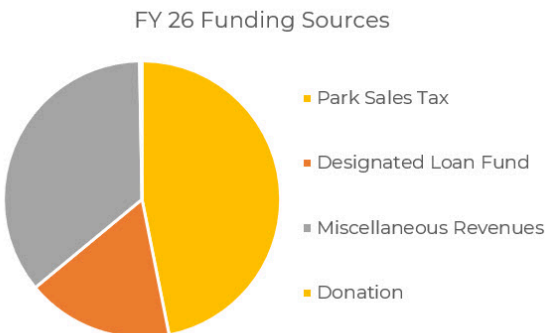

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Parks and Recreation Capital Projects are primarily funded through the Park Sales Tax. This tax was renewed by the voter's in FY 21.

In FY 26, Parks and Recreation is funding \$6,990,000 for seventeen projects, including Albert-Oakland Family Aquatic Center improvements, Northeast Regional Park Development, and annual improvements.

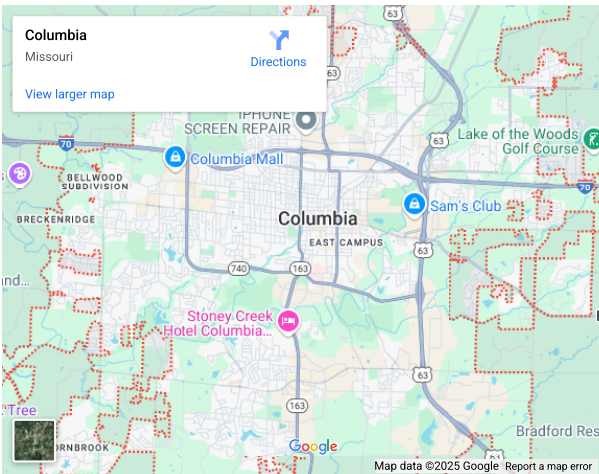

Note: In FY 24, Rec Services and Parks and Recreation capital projects were combined into one fund.
