

**NOTICE TO THE PUBLIC OF A PETITION OF VIRGINIA ELECTRIC AND POWER COMPANY
FOR REVISION OF A RATE ADJUSTMENT CLAUSE, DESIGNATED RIDER SMR,
UNDER §§ 56-585.1:14 AND 56-585.1 A 6 OF THE CODE OF VIRGINIA
CASE NO. PUR-2025-00196**

On November 3, 2025, Virginia Electric and Power Company ("Dominion" or "Company") filed a petition ("Petition") with the State Corporation Commission ("Commission"), pursuant to §§ 56-585.1:14 and 56-585.1 A 6 of the Code of Virginia ("Code"), for approval of an annual update to its rate adjustment clause, designated Rider SMR, to recover the projected and actual project development costs associated with the development of one or more small modular reactors ("SMRs") on Company-owned property adjacent to the existing North Anna Power Station ("North Anna") in Louisa County, Virginia.

The Commission previously approved Dominion's initial request to recover the costs of the SMR project development activities anticipated to be incurred between July 1, 2024 and August 31, 2026 ("Phase I") through Rider SMR in Case No. PUR-2024-00205. Through its Petition, the Company provides an update on the Phase I progress, including updated timelines and costs, and further requests to update Rider SMR to recover the costs of the SMR project development activities anticipated to be incurred between September 1, 2026 and August 31, 2027, which the Company refers to as "Phase II."

The Company states that the Phase I project development scope of work includes activities necessary to determine the feasibility of deploying an SMR at the North Anna site. Phase I includes necessary early project development activities to evaluate SMR technologies through requests for proposals ("RFP") and includes seeking potential federal funding for the deployment of an SMR at the site. Additionally, Phase I includes steps to renew the existing Early Site Permit ("ESP") and efforts to respond to associated Nuclear Regulatory Commission ("NRC") requests for additional information, as well as site surveys, studies, and field work.

The Company asserts that the revised total cost estimate for the Phase I scope of work is \$20.2 million, compared to the original estimate of \$24.8 million. According to the Company, costs associated with the ESP renewal are lower than originally forecasted due to a reduced need for supporting site surveys.

Proposed Phase II development activities projected to be incurred during the period of September 1, 2026 through August 31, 2027 ("Rate Year") include some anticipated costs originally expected in Phase I due to an RFP extension. These comprise site studies and field work at North Anna that are informed by technology selection, commercial agreement negotiations, monitoring wells, and geotechnical work. Phase II work also includes continuation of the ESP renewal, which will include responding to NRC requests for information during the review process. The Company states that once a technology is selected, additional internal engineering and support staff are expected as part of the oversight and review process of the technology's design development. Phase II also includes costs associated with continued implementation of the Company's recently approved nuclear quality assurance program description.

Dominion's total cost estimate for the Phase II scope of work is \$12.8 million; however, the Company is only seeking to recover \$9.01 million of this amount through Rider SMR, which, pursuant to Code § 56-585.1:14, constitutes 80% of the Virginia jurisdictional costs, including financing costs, expected to be incurred during the Rate Year, with the remainder to be recovered through the Company's rates for generation and distribution services. According to Dominion, implementation of the proposed Rider SMR on September 1, 2026 would decrease the monthly bill of a residential customer using 1,000 kilowatt-hours per month by \$0.14.

Interested persons are encouraged to review Dominion's Petition and supporting documents in full for additional details.

TAKE NOTICE that the Commission may apportion revenues among customer classes and/or design rates in a manner differing from that shown in the Petition and supporting documents and thus may adopt rates that differ from those appearing in the Company's Petition and supporting documents.
