Building systems such as ventilation, lighting, and electrical systems in the CTE Metal Fabrication Center make it challenging to offer a student program in a safe, modern learning environment. This bond will upgrade the Metal Fabrication Center with modern systems and finishes to provide students with a safe, up-to-date program in an industry-relevant learning environment.

Growth is already impacting our elementary schools.

Butterfield and Clear Creek Elementary Schools will exceed maximum capacity by 2029. This bond will build a new 650-student elementary school to relieve overcrowding and help ensure students have the space they need to learn.

Sanger ISD is growing. Enrollment has increased by nearly 400 students since 2019 (the original number of 900 was an error in publication and has been corrected)—and is projected to more than double to over 6,400 students within the next 10 years.

That growth is already impacting classrooms, especially at the elementary level, where more students mean added pressure on classrooms, shared spaces, and daily operations.

The 2026 Bond focuses on addressing this current demand.
