**SUMMARY**

**Contact with Dr. Andrew Loizeaux, PSY.1697**

On 8/10/2020, I spoke to Dr. Loizeaux. He provided the following information:

- Dr. Loizeaux completed the supplemental PRE report for TB and was aware of his complaint against Dr. Gross.
- Dr. Loizeaux reported that he has performed several work-product reviews of Dr. Gross’ work, as well as several supplemental PREs following Dr. Gross’s evaluations.
- Dr. Loizeaux confirmed TB’s characterization that Dr. Gross “needs to find an angel and a devil” in his PREs.
- Dr. Loizeaux explained that he and his [REDACTED] had hired Dr. Gross and trained him on performing PREs. He reported that they did not keep him on staff due to issues with his evaluations, which tended to idolize one parent and disparage the other.
- Dr. Loizeaux commented that a successful PRE evaluator must have the ability to “handle complexity and not knowing until all the data comes in.” He noted that the evaluator cannot jump to quick conclusions, that that was a problem that they were having with Dr. Gross’ evaluations.
- Dr. Loizeaux also noted that the subject of the evaluation is not going to agree with everything in a PRE report, but it is important that they “feel heard.”
  - Dr. Loizeaux did find concerns about [REDACTED]. While TB did not agree with Dr. Loizeaux about the [REDACTED] or anger findings, it was reported in a “much more nuanced way” than in Dr. Gross’ report.
