# ACUPUNCTURE MEDICAL CENTER

This **Small Business Day**, we're celebrating the people we serve. Our clinic is solution-oriented and result-driven. We specialize in complex, long-standing **pain conditions and peripheral neuropathy**—we are often peoples last resort with the best results.

**Patient centered,** we begin with a comprehensive **consultation** to learn your history and current health goals, then we explore whether our **integrative** approach can support your **pain relief and recovery**. When you're ready, we're here to help you **Live Life - Pain Free.**

**Call 540-217-2783** to schedule a consultation.

### Healed chronic pain that lasted for months

★★★★★

I had a pulled muscle in my arm that did not want to heal, and then I also bruised my ribs. Through an intensive schedule of acupuncture, Berry and the team at the Acupuncture Medical Center were able to heal both and get me out of chronic pain that I had had for several months. Thank you!

### My back feels 1,000% better

★★★★★

Much to my surprise, my orthopedist said he thought acupuncture would be a good complement to my physical therapy for my lower back issue, and he recommended Acupuncture Medical Center. I could ramble on for many more paragraphs, but I'll simply say that my back feels 1,000% better, and my PT says she notices a difference. I don't know that acupuncture would have had the same effect without my PT and my exercises at home, but I do believe acupuncture greatly accelerated how well I feel today.

Moving on to the staff. Each time, I am greeted by name with genuine friendliness, and yeah, I think they really do care. 🙂
