The health and safety of Nevada’s workers, residents, and visitors remains the top priority. By completing this Large Gathering Venue COVID-19 Preparedness & Safety Plan Certification Form (“Large Gathering Certification”), event organizers and venues are certifying under penalty of perjury that their event, gathering, meeting, convention or tradeshow will adhere to all required health protocols and provide for the safest environment possible.

This Large Gathering Certification will help event sponsors prepare for a successful event and certify to the State of Nevada that their event-specific operational plan is safe for staff and attendees.

All Large Gathering Certifications must be submitted to Nevada Department of Business and Industry (B&I). Failure to complete all requested information and certify that all required mitigation measures will be followed may result in the event being delayed, disapproved or closed. Upon receipt of a Large Gathering Certification Form, B&I will consult with the appropriate state agencies, regulatory boards and commissions, and state health officials as necessary for review and approval of the proposed large gathering. The approved certification will be filed with the appropriate local jurisdiction. Local jurisdictions will have the primary responsibility for enforcing compliance with the requirements outlined in this guidance and in the certification form.

A venue or other facility may adopt additional safety measures that extend beyond the requirements below. Under each section in the guide below, recommendations for additional mitigation measures are provided.

It is the responsibility of the event organizer to obtain any permits required by the local jurisdiction.

BASELINE STANDARD FOR GATHERINGS & EVENTS:
Limited to no more than 250 individuals or 50 percent of fire code capacity, whichever is less, under strict social distancing requirements.

250+ PERSON GATHERINGS & EVENTS (updated via Directive 041—effective March 15):
If a gathering space or venue wants to host more than 250 individuals for an event, (live entertainment show, gathering, convention, conference, trade show, etc.), it may have up to 50 percent of fire code capacity, so long as the event organizer completes and submits a Large Gathering COVID-19 Preparedness & Safety Plan Certification Form (“Large Gathering Certification”).

• The number of workers at a venue does not need to be included when considering occupant capacity for the purposes of this guidance. Staff are required to ensure the successful implementation of these guidelines and the safety of
participants. Therefore, staff do not contribute to the capacity limit. All staff must adhere to all social distancing measures and guidance outlined in this document and any other guidance document specific to their employment.

For more information on Large Gathering Certification submission and approval process and timeline, please review the Nevada Guidance for Safe Gatherings (updated March 12, 2021)

GENERAL EVENT & VENUE INFORMATION:
Event Venue Name:
Electric Daisy Carnival (EDC)

Event Venue Address:
Las Vegas Motor Speedway
7000 Las Vegas Blvd. N
Las Vegas NV, 89115

Event Coordinator Name(s) & Contact Information:

Organization Name:
Insomniac Holdings, LLC

Event Coordinator Name(s):
Pasquale Rotella
Justin Spagg
Seyth Boardman

Email address:
pasquale@insomniac.com
justin@insomniac.com
seyth.boardman@insomniac.com

Phone Number
(310) 200-5519
(562) 787-5708
(614) 419-7959

Is this a single event or recurring? ☐ SINGLE ☒ RECURRING

• If single event, select date and times of event, including setup and breakdown:
  Date: Click or tap here to enter text. Time: Click or tap here to enter text.

• If recurring event, list the schedule for upcoming events:
  Camp EDC: Thursday, May 20th 2021 @ 9:00am – Monday, May 24th 2021 @ 3:00pm (continuous)
  EDC: Friday, Saturday, and Sunday May 21st – 23rd 2021 from 4:00pm – 5:30am (each day)
Is the event indoors or outdoors?
☐ INDOORS ☒ OUTDOORS

Is this event being held at a gaming property (on the premises of a gaming licensee)?
☐ YES ☒ NO

Is this event being hosted or organized by, or being held on property operated by, a public, private, or charter school?
☐ YES ☒ NO

Is this event regulated by the Nevada State Athletic Commission?
☐ YES ☒ NO

Is this event a youth or adult recreational sports tournament? ☐ YES ☒ NO

- If yes, Youth and Adult Sports COVID-19 Preparedness & Safety Plan (“Sports Safety Plan”) will continue to follow the existing plan submission and approval process outlined in the Youth and Adult Sports Safety Guidance. Contact B&I with any questions: Phone: (702) 486-9000 / Email: COVID19Plans@dir.nv.gov
VENUE CAPACITY:
For the purposes of determining occupant capacity based on Emergency Directives and this guidance, event staff and event hosts will NOT be counted toward gathering capacity limits.

Size of the venue in square feet:
2,999,774 sq ft

Fire code occupancy capacity:
200,000 guests is based on the overall event space. Stage areas do not receive fire code occupancy as they are wide open for circulation in and out of the areas.

Total number of attendees over the course of the event:
200,000 per day

VENUE CAPACITY (continued):
Maximum number of attendees in an individual space at any one time: (Events could span multiple areas / rooms / venues)

| Space 1: Stage 1 | 60,000         | Space 2: Stage 2 VIP | 14,600         |
| Space 3: Stage 2 | 53,800         | Space 4: Stage 2 VIP | 1,450          |
| Space 5: Stage 3 | 60,000         | Space 6: Stage 3 VIP | 8,675          |
| Space 7: Stage 4 | 11,250         | Space 8: Stage 5     | 24,730         |
| Space 9: Stage 5 VIP | 280         |
| Space 10: Stage 6 | 8,425         | Space 11: Stage 6 VIP | 180          |
| Space 12: Stage 7 | 7,130         | Space 13: Stage 8    | 3,700          |
| Space 14: Circulation area | 63,775 |

*Stage areas are calculated based on normal event crowd dispersion, which is approximately 4 sq. ft. per person

**VIP areas are calculated based on fire code for spaces with furniture, which is 7 sq. ft. per person

***Crowd circulation is calculated based on typical festival flow that will not be at any given stage during any given time of the event at the peak event times for crowd size.

****Appendix E shows a breakdown of each area.

All floor plans and event set ups should be structured to maximize physical distancing within the prescribed capacity limits in this document.

CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☐ Capacity will not exceed 50 percent of the fire code capacity of the venue.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E.

☒ You will have staff monitoring and enforcing capacity restrictions.
VENUE CAPACITY:
For the purposes of determining occupant capacity based on Emergency Directives and this guidance, event staff and event hosts will NOT be counted toward gathering capacity limits.

***Crowd circulation is calculated based on typical festival flow that will not be at any given stage during any given time of the event at the peak event times for crowd size.

****Appendix E shows a breakdown of each area.

All floor plans and event set ups should be structured to maximize physical distancing within the prescribed capacity limits in this document.

CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☐ Capacity will not exceed 50 percent of the fire code capacity of the venue.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E.
☐ For seated events, tickets for adjacent seating will only be purchased for parties of no more than 6 individuals (“Pods”).

Not Applicable: EDC is a non-seated outdoor event and will not rely on social distancing as its method for health safety. This will be managed by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19.

☐ Signage will be posted at gathering venue entrances outlining established protocols and instructions for individuals informing event attendees of:
  - Capacity limits (see above)
  - Prohibitions on entering a gathering if they are experiencing symptoms
  - Hygiene and social distancing rules and protocols

The overall event capacity per fire code will not be exceeded. This will be verified by ticket scanning locations placed at the various event entrances. Signage explaining prohibitions on entering the gathering if they are experiencing symptoms will be posted at each entrance. Ample messaging and signage regarding proper hygiene will distributed and posted.
ADDITIONAL SAFETY CONSIDERATIONS & RECOMMENDATIONS:
• Consider utilizing signage with easy to interpret graphics in commonly used languages reminding everyone to maintain 6 feet of distance, wear masks, wash hands, etc.
• Remove or close games or activities that require or encourage congregating, sharing materials, or that involve high-touch surfaces. This includes things like board or recreational games, bouncy houses, ball pits, or amusement booths or rides at fairs.
• To the extent possible, close or limit the use of high-touch surfaces, including equipment, products, exhibits, or other fixtures or items touched by attendees while in a venue.

SOCIAL DISTANCING: See attached Appendix E
[By checking a box below, you are certifying the requirement will be met]

How will you ensure staff, attendees, vendors, and performers remain at least 6 feet apart within the venue?--

Check all that apply:
☐ Traffic arrows or guides ☐ Queuing within venue ☐ Barriers at vendor booths
☐ Scheduled entry ☐ Posters ☐ Sections within venue
☐ PA reminders ☐ Pods within sections

CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☒ Ensure adequate distance is established between checkpoints (e.g., ticketing, security, medical) as to ensure proper social distancing between individuals and minimize congestion of individuals waiting to enter the venue.

Adequate distance prior to the Health Pass Checkpoint will be established. A diagram labeled Appendix D has been attached to the submission. Once attendees have cleared the Health Pass checkpoint, each additional checkpoint will adhere to standard configurations. See Appendix D for a diagram of the layout and distances greater than 6’ for reference.

☐ For seated events, assign ushers, monitors, and/or security personal to maintain orderly seating and unseating to maintain social distancing and minimize congestion.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☐ Do not allow lines or crowds to form near the restrooms without maintaining a distance of at least 6 feet from other individuals. Post signs or markers to help individuals maintain the appropriate social distance of at least 6 feet.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☐ For seated events, ensure seats are reserved, assigned, and marked to provide for proper social distancing and separation between Pods.
Not Applicable: EDC is a non-seated outdoor event and will not adhere on social distance guidelines. EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☐ For seated events, there MUST be a minimum of 6 feet around and between each Pod, creating staggered seating to ensure individuals are not seated directly next to, in front of, or behind other individuals or Pods.

Not Applicable: EDC is a non-seated outdoor event and will not adhere on social distance guidelines. EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☐ Instruct individuals to remain seated whenever possible.

Not Applicable: EDC is a non-seated outdoor event and will not adhere on social distance guidelines. EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.
ADDITIONAL SAFETY CONSIDERATIONS & RECOMMENDATIONS:

- For venues with multiple event-times, stagger event times to minimize individuals from different events arriving simultaneously and congregating with one another.
- Schedule arrival times for longer than their typical duration to minimize the congregation of individuals waiting. Establish staggered admission-times, entry-times and durations to minimize overlap and congregating of individuals at checkpoints (e.g., access points, security checkpoints, admission areas, concession areas).
- Prescheduling individually assigned arrival times (e.g., seating furthest from entrances permitted to enter earlier) is strongly recommended.
- Provide and assign “drop off” areas to allow for individuals within the same party (Pod) to be dropped off at their designated entrance to the venue to minimize the number of individuals walking through parking ramps, parking areas, sidewalks, and walk-ways.
- Enhance security protocols for entry to allow for more efficient security-checks of individuals, minimize face-to-face interaction between security personnel and individuals, and minimize wait-times (e.g., metal-detectors, scanners, transparent baggies for personal items, etc.)
- When groups of individuals are leaving a single venue, unseat individuals in an orderly fashion, starting with those closest to the exit and ending with those farthest from the exit.
- Provide for additional exits and allow for individuals to exit the venue through the closest available exit rather than a limited number of exits that create congestion and interfere with social distancing.
- Each individual area should maintain separate entrances and exits to avoid spaces being shared. If separate entrances and exits cannot be achieved for each individual area, a venue should stagger the entrance and exit times for individuals to avoid congregation, congestion, or bottlenecking that does not allow for proper social distancing.
- Utilize multiple points of entry and exit when possible to prevent congestion and maintain physical distancing.
- Delineate seating areas by limiting chairs, marking or taping seating or tabletop areas, or using identifiable seat assignments.
- Keep aisle-seats and margins open as to ensure proper social distancing for seated individuals from individuals and workers walking up and down aisles.
FACE COVERINGS & PERSONAL PROTECTIVE EQUIPMENT (PPE):

CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☒ Ensure compliance with the face covering requirement for attendees, vendors and performers.
  o All attendees are required to wear a face covering unless they have an exemption outlined in Emergency Directive 024.
☒ Ensure all employees and volunteers are wearing face coverings.
☒ Post signage and frequent reminders of face covering requirements for employees, attendees, vendors and performers.
☐ Assign ushers, monitors, and/or security personnel to monitor social distancing and face coverings.

EDC is a non-seated outdoor event and will not implement social distancing as its method for health safety. This will be managed by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. Ushers, monitors, and/or security personnel will be monitoring face coverings. See attached Appendix E for additional details.

☒ Establish a protocol for accommodating attendees who cannot wear a face covering due to an exemption in Emergency Directive 024.
☒ Ensure face coverings and sufficient PPE will be provided for all staff at no charge, as required by federal law.

HEALTH SCREENINGS:

CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☒ Health screenings must be performed for every individual, employee or performer prior to admittance to the event.

☒ Identify how health screenings will be performed prior to admittance:
  o Prior to the start of the gathering, email or text a COVID-19 health screening survey in advance of the event
    ☒ YES    ☐ NO
  o COVID-19 health screening-survey questions upon arrival and check-in
    ☒ YES    ☐ NO
  o Contactless temperature checks upon arrival and check-in provided congestion at entry can be avoided?
    ☐ YES    ☒ NO
  o COVID-19 health screening-survey questions at exits following conclusion of the event
    ☒ YES    ☐ NO

☒ Decline to allow admittance to any individual if they have a confirmed temperature of 100.4° Fahrenheit, or if there is any suspicion that they are sick or symptomatic, or if they say “yes” to any of the COVID-19 screening-survey questions.
  o Individual should be advised to leave the business or gathering. If the individual is a member of a party or group (“Pod”) at the venue, the entire group must also be declined admittance.
Designation of a medical professional who must always be located on-site (EMT, nurse, physician).

- What will be done if someone becomes ill with COVID-like symptoms on-site?

See attached Appendix F

ADDITIONAL SAFETY CONSIDERATIONS & RECOMMENDATIONS:

- COVID-19 testing for staff, performers, and attendees prior to event.
  - Suggestions include rapid testing prior to event or proof of negative PCR test 48-72 hours prior to the event.
  - Any testing and contact tracing protocols are encouraged and should be developed with the appropriate Local Health Authority
- If COVID-19 testing will be implemented for your event, please explain protocol:

See attached Appendix F

REGISTRATION / CHECK-IN:

CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

- Describe your registration and/or check-in process prior to the event to maintain social distancing.

See attached Appendix F

- Create a queue at entrances that ensures a minimum of 6 feet of physical distancing between individuals and pace entry to prevent congestion.

  Adequate distance to ensure a minimum of 6 feet of physical distancing between individuals prior to the Health Pass Checkpoint will be established. A diagram labeled Appendix D has been attached to the submission. Once attendees have cleared the Health Pass Checkpoint, each additional checkpoint will be built in their standard configurations that do not require social distancing.

- Designate a primary contact for the event that will be responsible for collecting and retaining contact information for all attendees for 60 days following the gathering or event to assist the local health authority with contact tracing should there be a positive case identified from the gathering or event.

- Describe any additional Contact Tracing protocols you will implement at your gathering.

Click or tap here to enter text.

ADDITIONAL SAFETY CONSIDERATIONS & RECOMMENDATIONS:

- Collect contact information for guests or individuals through ticket sales, reservations, RSVPs, or having sign-in sheets. Include times of arrival and departure, to help with potential exposure notification.
- The State of Nevada recommends COVID Trace Nevada app for our residents and visitors.
- Provide generous and flexible cancellation policies so that if guests start experiencing symptoms, they can cancel.
- Establish a process for providing refunds for individuals who are not able to attend due to considerations related to COVID-19.
- Use pre-registration whenever possible to avoid crowding and queues of attendees waiting to enter or register.
CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☒ The venue will have sufficient sanitizers and/or disinfectants from the EPA "N" List

☒ Ensure use of cleaning products that are qualified by the United States Environmental Protection Agency (EPA) for use against SARS-CoV-2 (N List here).
  ○ Ensure that the length of time the product is in contact with the surface being sanitized follows manufacturer’s instructions (many products require 10 minutes of contact time before the surface is considered sanitized and ready for use).

☒ Ensure each piece of equipment (e.g., terminals, carts, touchscreens) is wiped down before and after each use by an individual and dispose of the wipe accordingly.
  ○ Examples include seating areas, rental equipment, vending-machines, automated teller machines ("ATMs"), touchscreens, and protective equipment.

☒ Ensure high touch surfaces (e.g., seats, armrests, cup holders, tables, door handles, ticketing kiosks, touch screens) are being disinfected during timed intervals and between venues and events.

☒ Post clear signs notifying individuals and employees of hygiene and sanitation expectations, including not entering if they or anyone in their household is experiencing any symptoms of illness.

☐ Block off stalls and urinals with proper signage to support 6 feet between individuals.
  ○ This may require reduced bathroom capacity or even only one person in a bathroom at a time.

☒ Ensure ventilation at the venue must be operating properly. See CDC Guidance.

☐ Limit the number of individuals who occupy the restroom at one time to allow for social distancing.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☒ Venues MUST ensure that open restrooms are:
  ○ Operational with functional toilets.
  ○ Cleaned and disinfected regularly, particularly high-touch surfaces such as faucets, toilets, stall doors, doorknobs, countertops, diaper changing tables, and light switches.
  ○ Adequately stocked with supplies for handwashing, including soap and water or hand sanitizer with at least 60 percent alcohol (for staff and older children who can safely use hand sanitizer), paper towels, tissues, and no-touch trash cans.

☒ If you are providing portable toilets, also provide portable handwashing stations and ensure that they remain stocked throughout the duration of the event.

☒ Ensure ventilation at the venue must be operating properly. See CDC Guidance.
ADDITIONAL SAFETY CONSIDERATIONS & RECOMMENDATIONS:

- Install touchless hand sanitizing stations at entrances and in high-traffic areas.
- Increase cleaning and disinfection protocols and track with publicly posted cleaning logs.
- Avoid shared community materials, sign-in sheets, and writing utensils.
- Ensure instrumentation, products, samples, and props are sanitized prior to use and in between handling by workers and individuals.
- Assign staff to monitor number of individuals in a restroom at one time to prevent congestion.
- Increase circulation of outdoor air as much as possible, for example, by opening windows and doors.
  - Do not open windows and doors if doing so poses a safety or health risk to staff or individuals (e.g., risk of falling or triggering asthma symptoms).
  - Close attention should be paid to ensuring appropriate HVAC settings to ensure outside fresh air flow and routine air exchanges are achieved on a regular basis. Air filter replacements and HVAC system cleaning should be increased.

EMPLOYEE / STAFF TRAINING & ENFORCEMENT:

CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☐ Staff will be trained on cleaning, sanitizing, and disinfecting.

☒ Staff will be trained on proper face covering and PPE use and enforcement.

☐ Staff will be trained on all social distancing requirements and protocols.

All staff working prior to and at the Health Pass Checkpoints will be trained on all social distance requirements and protocols. All areas past the Health Pass Checkpoint will not require social distancing protocols.

How many staff/volunteers will you have to enforce capacity, social distancing and face covering requirements?

Approximately 1,700 staff will be trained on enforcing face covering requirements. Social distancing is not applicable per Appendix E

What will you do when a staff member, attendee, vendor, or performer does not comply with face covering, PPE or social distancing requirements?

If guests repeatedly do not comply with the established face covering requirement, they will be ejected from the event.

Who will have authority to deny entry or remove a patron who is not complying with the requirements?

A response team through APEX Security will be assigned with assessing compliance and have authority to eject guests from the event if found not in compliance.
FOOD, BEVERAGE & CONCESSIONS:
Do you plan to have food, beverage or concessions at your event or gathering?
☒ YES ☐ NO

If YES...
CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☐ Ensure multiple ticket-counters, merchandise-counters, concession-counters, and drink-dispensers are separated to allow individuals to socially distance from one-another or, if not feasible, installation of partitions or barriers in between counters or dispensers to separate individuals from one-another.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☐ Walk-up bars will only be utilized if employees and individuals maintain 6 feet of social distancing. Congregation around a walk-up bar is prohibited.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☐ Remove or block off seating in concession areas and common areas to ensure social distancing. Individuals must take concessions back to assigned seating areas.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☐ Clearly mark floor and ground to delineate 6 foot spacing for individuals in lines, and mark how foot traffic should move. Clearly mark closed tables not available for seating customers.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☐ Clearly designate food or concession pick-up waiting areas with markers for proper distancing between parties.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☒ Provide hand sanitizer near concession and food stands.

ADDITIONAL SAFETY CONSIDERATIONS & RECOMMENDATIONS:
• Consider delivering concessions directly to designated seating areas and Pod-assignments, as opposed to providing concessions at concession stands.
• Tableside drink service is highly encouraged and preferred.
• If a walk-up bar is utilized, consider a Plexiglas, plastic, or other partition be used to separate bartenders from patrons.
• Limit menu items to those items which can be readily retrieved and/or quickly prepared to minimize congestion, lingering, and waiting.
  o Consider “pre-assembled” order-groupings or orders to simplify ordering and minimize ordering and wait-times.
• Disallow refills of popcorn, drinks, and other items using the same container – a new container should be provided.
• Provide contactless payment options whenever possible.
  o Consider using app-based ordering to minimize individuals having to linger and congregate in concession and merchandise areas.
☒ Provide additional trash-receptacles to ensure and encourage trash is disposed quickly. Relocate trash receptacles to minimize individuals having to travel longer distances and through areas of congestion (e.g., providing trash receptacles inside of the theater rather than in the hallway outside of the individual theater). Ensure that trash-receptacles are emptied regularly.
☒ Disinfect any shared objects such as check presenters, laminated menus (if used), and point-of-sale machines thoroughly between uses.

LIVE ENTERTAINMENT AT GATHERINGS:
Live entertainment, including live music, performances, competitions, and sporting events, etc. is allowed at gatherings, provided social distancing is maintained and all protocols are followed. Below is a summary of guidance for gatherings that include live entertainment.

Do you plan to have live entertainment at your event or gathering? ☒ YES ☐ NO

If YES...

CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☐ Performers will have a dedicated space within a venue while performing.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☒ All performers and entertainers will wear a face covering. The following exemptions for certain circumstances may apply:
  o Vocal performers may temporarily remove face coverings during performances in businesses, public spaces, and theaters when a face covering cannot be worn due to the nature of the performance, as long as social distancing is always maintained. Face shields should be considered as an alternative in these situations. Vocal performers include performers who rely on the ability to communicate verbally with their audience and the ability of their audience to interpret such verbal communication, including but not limited to singers, comedians, magicians, etc.
  o Musicians playing a musical instrument, such as a woodwind or brass instrument, may remove their face covering during an indoor practice or performance if the face covering cannot be used while playing the musical instrument, provided that social distancing is always maintained.
  o Conductors and musicians that are not playing woodwind or brass instruments are required to wear a face covering at all times.
  o Musicians who play instruments with spit valves should use absorbent pads to empty the valves.
Seating and spacing modifications must be adopted to allow for the minimum required distances between the audience and the performer(s), competitor(s) or entertainer(s) on the stage, field, etc. (updated March 5, 2021 in Directive 040)

- **6 feet** must be maintained between the artist(s) or performance area (e.g., stage, court, field), and the audience ONLY IF the performers wear a mask or face covering at all times throughout the performance; or
- **12 feet** must be maintained between the artist(s) or performance area (e.g., stage, court, field) and the audience when the performers are unmasked or when they temporarily or intermittently remove their masks or face coverings during performances.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

Performers on-stage will maximize physical spacing between one another, to the extent practicable.

- If spacing is not possible, in some situations it may be suitable to install barriers to minimize transmission of aerosolized particles.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

Health screenings will be provided for all entertainment/performance participants.

- Participants (e.g., players, performers, actors, competitors, entertainers, etc.) in events should have their temperature taken using a contactless method. If contactless temperature screenings are not possible, venues/gathering hosts MUST ensure all entertainment participants respond to COVID-19 screening-survey questions upon arrival and check-in and verify that they have read the screening-survey and can respond “no” to all questions. See “NV COVID-19 Health Screening Guide”

Disinfect high touch areas and equipment such as microphones, instruments, and props between uses.

You will not allow Karaoke singing and open microphone events involving performances by individuals and visitors.
• Will your event include a meet and greet (backstage passes and after-show guests are granted access)?
  ☒ YES  ☐ NO

☐ If yes, certify that groups of individuals must be limited to small groups of no more than 6, and pathways and protocols must be preestablished to maintain social distancing between all individuals. EDC will create a safe environment that does not require social distancing by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19.

ADDITIONAL SAFETY CONSIDERATIONS & RECOMMENDATIONS:
• Consider installing a barrier or partition between the performance area and audience or other areas where appropriate.
• Whenever possible, provide individual microphones for multiple speakers. If a microphone must be shared, clean between speakers or leave it untouched on a stand.
• Limit the number of speakers and make arrangements to maintain distance from others.
• Avoid performance-related demonstrations, exercises, and activities that involve interaction between workers and individuals that conflict with social-distancing practices.
• Extend intermission-times to reduce congestion in exits, corridors, restrooms, and concession areas.
• Give preference to outdoor rehearsals and performances.
• Consider limiting rehearsal times to 30 minutes or less to reduce the quantity and spread of aerosol among the individuals involved.
• If possible, during a live performance, performers should stop for approximately 5 minutes after each 30-minute segment to allow aerosolized particles to disperse.

“*Ambient*” or “*Background*” music is exempted from the “Live Entertainment” guidance
  o For the purposes of this guidance, "ambient" or "background" music is music used to create or enhance a mood or atmosphere that is incidental to the primary activity or location. It is intended to be an unobtrusive accompaniment to the main activity, such as dining at a restaurant or walking through a venue.

  *Example 1: A pianist playing music in the reception area of a hotel while guests check-in.*

  *Example 2: A singer performing at a restaurant while people dine.*

BOOTHS OR VENDORS AT EVENTS / GATHERINGS:
Do you plan to have booths or vendors at your event or gathering?  ☒ YES  ☐ NO

If YES...

CERTIFY THAT YOU WILL MEET THE FOLLOWING REQUIREMENTS:
[By checking a box below, you are certifying the requirement will be met]

☒ Allow spacing for vendor load-in and load-out such that vendors and staff can maintain a distance of at least 6 feet from each other.

☐ Create a single line of booths instead of double rows. If this is not possible, create a thoroughfare between the two sides with enough space to allow for a single file, one-way path down the middle.

EDC will create a safe environment to host full event capacity by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

☐ Create one-way traffic flow through the booths to prevent crowding or mingling.
EDC will create a safe environment to allow for two-way traffic flow by verifying that each attendee or staff member be either (i) fully vaccinated or (ii) have tested negative for COVID-19. See attached Appendix E for additional details.

**ADDITIONAL SAFETY CONSIDERATIONS & RECOMMENDATIONS:**
- Giveaway items, business cards, show bags and brochures are not recommended.
- In lieu of handouts and business cards, shows are encouraged to incorporate “touchless” scanning technology that allows Exhibitors to scan attendee badges to provide more information digitally.
- Consider metering of individuals to limit congregation of crowds.
- Booth construction procedures should be addressed to maintain proper physical distancing.
- Use transparent barriers in booth design by all exhibitor and, where appropriate, other service elements such as conference registration show management offices, general contractor service desks, and marketplace dining.

**ADDITIONAL RISK ASSESSMENT QUESTIONS:**
Do your face covering, PPE and social distancing controls reasonably accommodate the needs of persons with disabilities?

☑️ YES  ☐ NO

Will you require or recommend attendees, vendors, or performers to download the COVID Trace app?

☑️ YES  ☐ NO

**ADDITIONAL LARGE GATHERING PLAN REQUESTS:**
If you have any requests or details related to the organization of your large gathering not covered above in this Large Gathering Certification, please provide here:

See attached Appendices A - F

If you have any questions related to the planning of your large gathering or event, please provide here:

Click or tap here to enter text.

**SIGNATURE:** Pasquale Rotella  3/29/21  8:30 a.m.

Date: Click or tap here to enter text.  Time: Click or tap here to enter text.

I declare under penalty of perjury that the foregoing is true and correct.

**SUBMISSION INSTRUCTIONS:**
- Upon completion of this Certification Form, sign and submit to the Nevada Department of Business & Industry, Division of Industrial Relations.
- Forms should be submitted to the Nevada Department of Business & Industry 30 days prior to the event, Division of Industrial Relations:
  - Phone: (702) 486-9000
  - Email: COVID19Plans@dir.nv.gov
OVERVIEW

Insomniac, a leader in live event health and safety management, with over 27 years’ experience in safely producing live events, will implement a robust vaccine and testing requirement in lieu of social distancing. Insomniac will create a tightly regulated “clean zone” where every attendee/staff member will be verified by a health pass mobile application (“Health Pass”). The Health Pass will serve multiple functions: identity verification, vaccine or test confirmation, and prompt every user to complete a COVID-19 symptom questionnaire. Only those persons who have successfully completed the aforementioned will receive a “green token” and be granted access provided they have a valid ticket or credential.

HOW HEALTH PASS WORKS

The Health Pass application will be a required step for all entrants to EDC. Each user will first need to successfully download the app and confirm their identity. The next step will prompt the user to link either their vaccination record or lab test results, which are available through a variety of partnerships. These include labs, at-home / rapid test kits, major retail pharmacies, health systems, and state registries. The Health Pass is designed to give users access to their health data and allow them to share this securely. Every user will use their own unique credentials to consent to sharing only their COVID-related data. After granting consent, APIs are used to receive COVID information through a completely secure and HIPAA-compliant network.

Prior to arrival at EDC, all ticket holders and staff will receive repeated messaging prior to the event with instruction to complete the Health Pass application process. Checkpoints will be located at all shuttle pick-up locations and at the venue at designated parking and drop-off locations to validate that every entrant has a “green token”. Individuals with a “green token” will be admitted entry. Anyone without a “green token” will be directed to a designated area where they can obtain a rapid antigen COVID-19 test. No one will be allowed entry if they refuse to comply with these strict requirements.

In addition to the above and unless otherwise directed by permitting authorities, all entrants will be required to complete a COVID-19 symptom questionnaire and submit to a temperature check prior to entering the event site.
HEALTH PASS CASE STUDIES

Health passes are deployed at hundreds of partners across Enterprise, Sports and Entertainment, and Travel and Hospitality.

- All New York sports teams currently require the use of a health pass to confirm a vaccine or negative COVID test result to access a sporting event within the city.
- NHL Finals Bubble in Canada
- 50 sports partners deploying across the NBA, NFL, MLS, NHL, and MLB
- Deployed Vaccine Validation at the Super Bowl in Tampa in 2021
- Deploying for all Tough Mudder/Spartan Races
- Airlines, including JetBlue, Lufthansa, United Airlines, Swiss International Airlines, and Virgin Atlantic have begun using a digital health pass for vaccine and testing verification.
- Airports Council International, who represents around 2,000 airports worldwide, has committed to integrate digital health pass technology.

For additional details, please refer to Appendix F.
Kickstarting the Safe and Responsible Return of Non-seated Live Events

Objective

Insomniac, a leader in live event health and safety management, has produced live events for over 27 years. Each May, Insomniac and the Las Vegas Motor Speedway open their doors for EDC Las Vegas (“EDC”), a cultural phenomenon that celebrates music, art, and life. Throughout the pandemic, Insomniac has successfully produced COVID-safe events around the country, including for more than 350,000 people in Southern California alone, working closely with local governments all along the way.

A central and necessary measure to the world’s recovery from the COVID-19 pandemic is trading the notion of social distancing for broad vaccination and testing verification. With the event, tourism, and hospitality industries, key components of Nevada’s economy, among the hardest hit from the COVID-19 pandemic, it is critical to reopen non-seated live events in a responsible manner as soon as possible.

The country’s reopening continues to accelerate with COVID-19 vaccines becoming available to more Americans in more categories and age groups on a daily basis. The White House has directed all states to make every person over the age of 16 eligible to be vaccinated by May 1, at which point all at-risk individuals will have presumably been vaccinated, and several states have either already made all adults eligible to be vaccinated or will do so by April 5, including Nevada, Connecticut, Michigan, Alaska, Mississippi, and Utah. More are expected to follow suit in the coming weeks.

The need to kickstart the event and hospitality industries combined with the acceleration of vaccine distribution and Insomniac’s operational expertise makes EDC, scheduled for May 21-23, 2021, the perfect candidate to lead the safe return of large-scale non-seated live events.
Why is EDC the right event for the safe return of large-scale non-seated live events?

Las Vegas, the entertainment capital of the world, and Insomniac, the world’s preeminent festival producer and leader in live event health and safety management, are uniquely positioned to set the standard for the return of large-scale non-seated live events nationwide with EDC. The positive effects that will result from the safe and successful production of such a large event cannot be understated. The economic and mental health benefits, in conjunction with the encouragement of young adults to get vaccinated, will make Nevada the clear leader in the responsible effort of getting back to business.

How will EDC be produced safely?

Insomniac’s plan for EDC will create a tightly regulated “clean zone” where all who enter have been verified by a health pass mobile application (“Health Pass”) to either have been vaccinated or tested negative for COVID-19, providing a safe kick-off for Las Vegas’ busy summer season, which will begin the following week with over 300,000 people expected for Memorial Day Weekend.

Outdoor Event + Clean Zone + Face Coverings = Low Risk

The following plan incorporates the recommendations of medical and industry experts and aims to set the bar for the return of large-scale non-seated live events nationwide.
How will the Health Pass work?

A Health Pass is a digital verification of health status specifically connected to COVID-19 safety and eligibility to enjoy non-seated live events safely. The Health Pass will be tied to a centralized database that aggregates vaccination data from every state and testing data from tens of thousands of point-of-care providers.

- This verification will validate or invalidate each attendee’s and staff member’s eligibility to enter the event. The eligibility for access documented in the Health Pass will be set forth as follows:

  *an individual attending or working the event must either be (i) fully vaccinated or (ii) have tested negative for COVID-19 via an FDA-approved or emergency use authorized antigen test within no more than 72 hours prior to arrival at the festival.*

- The Health Pass will default to displaying a “red token,” indicating the individual is ineligible to access the event site.
- Once the Health Pass receives information that the individual has been vaccinated or obtained a negative COVID-19 test within the designated timeframe, it will switch to displaying a “green token,” indicating the individual is eligible to access the event site.
- Additionally, each individual will have to respond to a health questionnaire within the Health Pass that aims to identify any symptoms connected to COVID-19 and whether there’s been any contact with an infected individual.
- Insomniac’s messaging campaign will encourage attendees to get vaccinated or take a COVID-19 test and obtain a negative result at a local testing center in their city of departure prior to leaving for Las Vegas.
What happens when an attendee arrives at the festival or attempts to board an EDC shuttle from one of the designated shuttle stops?

All ticket holders will be required to pass through a health verification checkpoint and show a “green token” via the Health Pass prior to entering the “clean zone.” These checkpoints will be located at all shuttle pick-up locations along the Las Vegas Strip and Downtown Las Vegas, as well as at all parking lot and drop-off locations surrounding the event circled below:

- This requirement will be included in Insomniac’s messaging campaign communicated to all attendees.
- If an individual does not show a “green token” for access to the event entrance, they will either be directed to a designated area on-site for a rapid COVID-19 test or, if at a shuttle stop, instructed to obtain a negative COVID-19 test. This process will be detailed further in Insomniac’s comprehensive EDC Health and Safety Plan.
How are event staff and artists being handled?

**Site Build/Strike**

- Completion of daily questionnaire within Health Pass regarding symptoms and contact with any infected individuals.
- Same standards as a construction site:
  - Temperature checks will be performed prior to entering the build site. Anyone who registers a temperature above 100.4 degrees Fahrenheit will not be eligible to enter the site and will be subject to further health investigation to identify if they are at risk of a COVID-19 infection.
  - Staff will be required to wear face coverings as well as distance from other workers as much as possible.
- Clear guidance will be communicated to staff on the importance of good hygiene as well as washing and sanitizing hands frequently.

**Event Days**

- Completion of daily questionnaire within Health Pass regarding symptoms and contact with any infected individuals
- Upon arrival at the festival site, all staff will be required to show a “green token” through the Health Pass that indicates vaccination or a negative test within 72 hours of their first scheduled work shift.
- Temperature checks will be performed prior to entering the festival site.
- All staff will be required to wear face coverings while on-site.
- Face covering, hand washing/sanitizing, and general wellness and hygiene guideline signage will be placed in all working locations.
- No “buffet-style” catering. If catering is provided, each individual will receive a catered boxed lunch.
- COVID-19 rapid tests will be available on-site for any staff or artists experiencing symptoms.
Outdoor events are safer.

Nooshin Razani, MD, MPD, director of the Center for Nature and Health and the University of California, San Francisco Benioff Children’s Hospital in Oakland, conducted a systematic review of peer-reviewed papers indexed in PubMed, EMBASE and Web of Science, as well as preprints in Europe PMC through Aug. 12, 2020, that described cases of human-to-human transmission of SARS-CoV-2 (COVID-19). The researchers included reports of other respiratory virus transmission for reference.

- Five studies in their analysis determined that less than 10% of reported global SARS-CoV-2 infections have occurred outdoors and that the odds of indoor transmission were 18.7 times higher in comparison to outdoor transmission (95% CI, 6-57.9) (https://pubmed.ncbi.nlm.nih.gov/33249484/).

The existing evidence supports the wide-held belief that risk of SARS-CoV-2 transmission is significantly lower outdoors. EDC will only offer outdoor activities to attendees.

______________________________

Outdoor Event + Clean Zone + Face Coverings = Low Risk
What other preventative steps will be taken?

**Face Coverings/PPE**

- Every person on-site will be required to wear a mask that fully covers both the nose and mouth, which will be checked prior to reaching the entrance.
- If someone does not have a mask, they will be provided with a festival-branded face covering and reminded that they will be expected to wear them at all times except while eating or drinking.
- Should anyone inquire about further PPE (face shields, gloves, etc.), they will be made available at information hubs around the perimeter of the festival site.

**Special Show Procedures**

- There will be an abundance of signage during the entry process, as well as throughout the entire festival site, reminding all patrons of good hygiene, hand washing/sanitizing, the wearing of masks, and what to do if experiencing COVID-19 symptoms.
- Stage screens will periodically run similar messaging between performances throughout the event.
- Experienced Insomniac staff members will actively approach attendees on show days to emphasize the face mask policy.
- Cleaning/sanitizing staff will be significantly increased to keep up with cleaning demands throughout the festival site and will be equipped with an EPA List N-approved disinfectant that meets the criteria for use against COVID-19. This product will be used in all restroom and office areas, as well as any high touch or high use locations around the site. High touch point areas will have increased frequency cleaning schedules.

**On-site Rapid Tests Available**

The rapid COVID-19 tests will take approximately 5 minutes to administer. The test results will then be available within 15 minutes.

**Cashless Transactions**

With no cash, credit/debit cards, or pin terminals exchanging hands, we will create a safer, quicker, and more hygienic transaction for all involved.
Additional Capacity

- Currently approved for 200,000 people based on exiting requirements, but only expecting 180,000 attendees (90% of capacity)
- Heavily trafficked areas have been expanded by 16%

COVID-19 Scent Detection Canines

- Insomniac is closely monitoring the ongoing studies around the country on the effectiveness of COVID-19 scent detection canines. If these studies conclusively determine that scent detection canines are effective in detecting COVID-19, Insomniac will employ these canines at all entrances to search patrons as an additional line of defense.
- In the event these canines are used at the event, they would be employed as follows:
  - If a canine alerts to a patron, the patron will be escorted to an isolation area where a second canine will search them. If both canines alert to the patron, a medical team member will administer a COVID-19 test on-site. If the patron tests positive, they will be required to leave the site and either (i) return home for quarantine or (ii) go to a predetermined quarantine location if the attendee has traveled from out of town.
What happens if a patron arrives at a First Aid station on-site complaining of COVID-19 symptoms?

A member of the medical staff wearing the appropriate PPE in accordance with CDC guidelines will ask the patron if they are displaying any of the following COVID-19 symptoms:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting

If it is determined the patron is displaying any of the above symptoms, they will be administered a COVID-19 rapid test on-site in the nearest isolation area to mitigate the risk of spread as a precaution. Medical staff will adhere to strict CDC guidelines throughout this process. Nine isolated safety locations will be strategically located throughout the venue and each shuttle stop location will have its own specified area.
Benefits of Plan

- EDC is one of the largest single-event drivers of economic output in the State of Nevada with an impact of over $300 million annually while generating $90 million in wages and salaries for Nevada’s workforce, per the *EDC Las Vegas Economic Impact Analysis 2019* conducted by Hobbs, Ong & Associates and Applied Analysis.

- Encourages young adults to get vaccinated, which is crucial to the reopening of the country. Insomniac reaches millions of young adults every day via its social media channels.

- Sets in motion a clear interim process for the return of non-seated live events, which will kickstart the tourism and hospitality industries in which the State of Nevada has a significant interest.

- Proves once again that Nevada is the true leader of the entertainment industry and sets the standard for the rest of the country.

- 40% of U.S. adults reported struggling with mental health or substance abuse since the pandemic (*Mental Health, Substance Abuse, and Suicidal Ideation During the COVID-19 Pandemic*, https://www.cdc.gov/mmwr/volumes/69/wr/mm6932a1.htm). The return of live events such as EDC represent the return to “normalcy” that is needed to remedy society’s overall wellbeing.

- Treasure trove of data from a large-scale “clean zone” will be instructive for the rest of the world.
