

# MAKING OF A RUNWAY

**Project material is the equivalent of**

- Adding two lanes to I-70 from Horizon Drive to the Utah border

**10,500 feet long and 150 feet wide (same as current runway)**

- Over 3 feet deep of asphalt and aggregate base
- Over 23 miles of electrical cable
- Nearly 7,000 trucks of asphalt

**Total Earthwork: approximately 4,208,000 cubic yards**

Moving enough soil to:

- Cover the airport parking lot in nearly 80 feet of soil
- Place over 7 inches of soil on Interstate 70 from Horizon Drive exit to Denver
- Fill up 429 Olympic size swimming pools with soil
