**FOR IMMEDIATE RELEASE
OCTOBER 22, 2025**

Tasi Vista Development, along with its contractor and engineering firm Duenas, Camacho and Associates, have been working closely with the Guam Environmental Protection Agency and other government agencies, particularly meeting on site and corresponding with GEPA representatives since October 15 to develop a supplemental mitigation plan. Our plan was approved by GEPA this morning and is currently being implemented. Completion is expected by the end of this week. GEPA will inspect the final mitigation plan installation for compliance.

Tasi Vista is carefully reviewing the supplemental Notice of Violation issued by the Department of Public Works this afternoon. A formal response will be provided to DPW.
