

A mini-movie Flip Book with Crystal Cat!

SPECIAL EDITION

Every animated movie is made up of thousands of individual images. Every slight change in motion is a new image that our eyes RETAIN for up to a fifteenth of a second. This is called PERSISTENCE OF VISION. If the next image replaces it in this period of time it will create the illusion of movement.

1.	7.	13.	19.
2.	8.	14.	20.
3.	9.	15.	21.
4.	10.	16.	22.
5.	11.	17.	23.
6.	12.	18.	24.

Directions: 1. Cut on dashed lines, keep the numbers in order, and stack them. 2. Make sure the bottom of the pages are even with each other, then staple (or tape) the top of the now little book. 3. Hold top of flip book with one hand and use other hand's thumb to flip the pages at the bottom. For even more fun: Get two copies of this page and double the number of drawings and size of the flip book!
