## The Water We Drink

### TOWN OF CLAYTON WATER SYSTEM

Public Water Supply ID: LA1029002

We are pleased to present to you the Annual Water Quality Report for the year 2018. This report is designed to inform you about the quality of your water and services we deliver to you every day (Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien). Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source(s) are listed below:

Source Name	Source Water Type
WELL 2 USGS CO 33	Ground Water
WELL 1 USGS CO 32	Ground Water

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

**Microbial Contaminants** - such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

**Inorganic Contaminants** - such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.

**Pesticides and Herbicides** - which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.

**Organic Chemical Contaminants** - including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.

**Radioactive Contaminants** - which can be naturally-occurring or be the result of oil and gas production and mining activities.

A Source Water Assessment Plan (SWAP) is now available from our office. This plan is an assessment of a delineated area around our listed sources through which contaminants, if present, could migrate and reach our source water. It also includes an inventory of potential sources of contamination within the delineated area, and a determination of the water supply's susceptibility to contamination by the identified potential sources. According to the Source Water Assessment Plan, our water system had a susceptibility rating of 'HIGH'. If you would like to review the Source Water Assessment Plan, please feel free to contact our office.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health. We want our valued customers to be informed about their water utility. If you have any questions about this report, want to attend any scheduled meetings, or simply want to learn more about your drinking water, please contact JOSEPHINE T WASHINGTON at 318-757-8540.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. TOWN OF CLAYTON WATER SYSTEM is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

The Louisiana Department of Health and Hospitals - Office of Public Health routinely monitors for constituents in your drinking water according to Federal and State laws. The tables that follow show the results of our monitoring during the period of January 1st to December 31st, 2018. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk.

In the tables below, you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms, we've provided the following definitions:

**Parts per million (ppm) or Milligrams per liter (mg/L)** - one part per million corresponds to one minute in two years or a single penny in \$10,000.

**Parts per billion (ppb) or Micrograms per liter (ug/L)** - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

**Picocuries per liter (pCi/L)** - picocuries per liter is a measure of the radioactivity in water.

**Treatment Technique (TT)** - an enforceable procedure or level of technological performance which public water systems must follow to ensure control of a contaminant.

**Action level (AL)** - the concentration of a contaminant that, if exceeded, triggers treatment or other requirements that a water system must follow.

**Maximum contaminant level (MCL)** - the "Maximum Allowed" MCL is the highest level of a contaminant that is allowed in drinking water. MCL's are set as close to the MCLG's as feasible using the best available treatment technology.

**Maximum contaminant level goal (MCLG)** - the "Goal" is the level of a contaminant in drinking water below which there is no known or expected risk to human health. MCLG's allow for a margin of safety.

**Maximum residual disinfectant level (MRDL)** - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

**Maximum residual disinfectant level goal (MRDLG)** - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

**Level 1 assessment** - A study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

**Level 2 Assessment** - A very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

During the period covered by this report we had the below noted violations.

Compliance Period	Analyte	Type
1/17/2018 - 3/31/2018	TTHM	MCL, LRAA
1/17/2018 - 3/31/2018	TTHM	MCL, LRAA
1/3/2018	REVISED TOTAL COLIFORM RULE (RTCR)	LEVEL 1 ASSESS, MULTIPLE TC POS (RTCR)
1/3/2018	PUBLIC NOTICE	PUBLIC NOTICE RULE LINKED TO VIOLATION
4/1/2018 - 6/30/2018	TTHM	MCL, LRAA
7/1/2018 - 9/30/2018	TTHM	MCL, LRAA
10/1/2018 - 12/31/2018	TTHM	MCL, LRAA
12/25/2018 - 12/17/2018	GROUNDWATER RULE	FAILURE ADDRESS DEFICIENCY (GWR)
12/25/2018	GROUNDWATER RULE	FAILURE ADDRESS DEFICIENCY (GWR)
12/25/2018	GROUNDWATER RULE	FAILURE ADDRESS DEFICIENCY (GWR)
12/25/2018	GROUNDWATER RULE	FAILURE ADDRESS DEFICIENCY (GWR)

Our water system tested a minimum of 1 samples per month in accordance with the Total Coliform Rule for microbiological contaminants. With the microbiological samples collected, the water system collects disinfectant residuals to ensure control of microbial growth.

Disinfectant	Date	Highest RAA	Unit	MRDL	MRDLG	Typical Source
CHLORINE	2018	1.7	ppm	2.3	4	Water additive used to control microbes

In the tables below, we have shown the regulated contaminants that were detected. Chemical Sampling of our drinking water may not be required on an annual basis; therefore, information provided in this table refers back to the latest year of chemical sampling results.

Regulated Contaminants	Collection Date	Highest Value	Range	Unit	MCL	MCLG	Typical Source
BARIIUM	4/6/2017	0.95	0.9 - 0.95	ppm	2	2	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
Regulated Contaminants	Collection Date	Highest Value	Range	Unit	MCL	MCLG	Typical Source
CADMIUM	4/6/2017	1.3	1.2 - 1.3	ppb	5	5	Corrosion of galvanized pipes; Erosion of natural deposits; Discharge from metal refineries; Runoff from waste batteries and paints
FLUORIDE	4/6/2017	0.32	0.31 - 0.32	ppm	4	4	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories
MERCURY	4/6/2017	0.13	0.13	ppb	2	2	Erosion of natural deposits; Discharge from refineries and factories; Runoff from landfills; Runoff from cropland
NITRATE-NITRATE	10/18/2018	0.18	0.18	ppm	10	10	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits
Radionuclides	Collection Date	Highest Value	Range	Unit	MC	MCL	Typical Source
COMBINED RADIUM (-226 & -228)	5/8/2018	1.96	1.96	pCi/L	5	0	Erosion of natural deposits
GROSS ALPHA PARTICLE ACTIVITY	4/6/2017	1.55	1.35 - 1.55	pCi/L	15	0	Erosion of natural deposits

GROSS BETA PARTICLE ACTIVITY	4/6/2017	6.77	5.59 - 6.77	pCi/L	50	0	Decay of natural and man-made deposits. Note: The gross beta particle activity MCL is 4 millirem/year annual dose equivalent to the total body or any internal organ. 50 pCi/L is used as a screening level.
------------------------------	----------	------	-------------	-------	----	---	--

Lead and Copper	Date	90 <sup>th</sup> Percentile	Range	Unit	AL	Sites Over AL	Typical Source
COPPER - FREE	2016 - 2018	0.8	0.1 - 1.4	ppm	1.3	1	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives
LEAD	2016 - 2018	3	1 - 12	ppb	15	0	Corrosion of household plumbing systems; Erosion of natural deposits

Disinfection Byproducts	Sample Point	Period	Highest Value	Range	Unit	MCL	MCLG	Typical Source
TOTAL HALOACETIC ACIDS (HAA5)	154 CARTER	2018	36	16.5 - 42.1	ppb	60	0	By-product of drinking water disinfection
TOTAL HALOACETIC ACIDS (HAA5)	LOOMIS ST	2018	34	11.1 - 30.9	ppb	60	0	By-product of drinking water disinfection
TTHM	154 CARTER	2018	102	37.3 - 136.9	ppb	80	0	By-product of drinking water chlorination
TTHM	LOOMIS ST	2018	96	20.4 - 89	ppb	80	0	By-product of drinking water chlorination

Secondary Contaminants	Collection Date	Highest Value	Range	Unit	SMCL
CHLORIDE	3/17/2014	101.9	67 - 101.9	MGL	250
IRON	4/6/2017	12.7	12.6 - 12.7	MGL	0.3
MANGANESE	4/6/2017	0.65	0.64 - 0.65	MGL	0.05
PH	3/17/2014	7.4	7.17 - 7.4	PH	8.5
SULFATE	3/17/2014	73	61 - 73	MGL	250
ZINC	4/6/2017	0.013	0.013	MGL	5

+++++Environmental Protection Agency Required Health Effects Language+++++Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Additional Required Health Effects Language:

Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous systems, and may have an increased risk of getting cancer.

Additional Required Health Effects Violation Notices:

2A - We found coliforms indicating the need to look for potential problems in water treatment or distribution. During the past year we failed to conduct all of the required assessment(s).

+++++Thank you for allowing us to continue providing your family with clean, quality water this year. In order to maintain a safe and dependable water supply we sometimes need to make improvements that will benefit all of our customers.+++++

We at the TOWN OF CLAYTON WATER SYSTEM work around the clock to provide top quality drinking water to every tap. We ask that all our customers help us protect and conserve our water sources, which are the heart of our community, our way of life, and our children's future. Please call our office if you have questions.

## NOTICE

"Anyone knowing the whereabouts of HOMER RAY MORACE III or his heirs and/or assigns, please contact Alexandra LeTard, at LeTard & Associates, LLC, 109 Carter Street, P.O. Box 187 Vidalia, LA 71373, (318) 336-8990."

6/26

## PUBLIC NOTICE - ORDINANCE VIOLATION

The Concordia Parish Police Jury has cited Mr. Jacob Jerome Davis owner of property bearing the address of 388 Freeman Road, Lot 9-A of Minorca Acres for being in violation of the Concordia Parish Code of Ordinances, Chapter 15, Article I & II as found on our website at conppj.org. Mr. Davis has 15 days from this notice to request a hearing before the Police Jury or adhere to the articles of the ordinances. Failure to comply with the ordinances will have the work done by the Parish at an estimated minimum cost of \$400. Failure to pay any costs the Parish has incurred, will have these charges placed on your property taxes. Please contact the Concordia Parish Police Jury office at 318-336-7151 with any questions.

## Advertisement for Bids

Sealed bids will be received by the Concordia Parish Police Jury at 4001 Carter Street, Vidalia, Louisiana 71373 until 10:00 A.M., Local Time, on **Tuesday, August 6, 2019** at which time and place the bids will be publicly opened and read aloud for:

FOR: Concordia Parish Courthouse "Courtroom" Renovation  
4001 Carter Street, Room 1  
Vidalia, Louisiana 71373

Any proposal received after closing time will be returned unopened.

Complete Bidding Documents may be obtained from:

Barron, Heinberg & Brocato  
Architects and Engineers  
1015 Wisteria Street  
Alexandria, Louisiana 71301

PHONE (318) 443-7291

**Paper Format:** Upon deposit of \$100.00 for each set of documents. **Deposit on the first set are fully refundable to all bonafide prime Bidders submitting a proposal upon return of the documents**, in good condition, no later than ten (10) days after receipt of bids. The deposit of subcontractors and of additional sets issued to bidders is fifty percent (50%) refundable after return of bid documents, in good condition, no later than ten (10) days after receipt of Bids. Only complete sets of Bid Documents will be issued.

Or

**Electronic Format:** Complete Bidding Documents for this project are available on a CD in electronic form. They may be obtained for a **fee of \$ 30.00 non-refundable**. Plan holders are responsible for their own reproduction costs.

All bids must be accompanied by bid security equal to five percent (5%) of the sum of the base bid and all alternates, and must be in the form of a certified check, cashier's check or written by a surety company licensed to do business in Louisiana, signed by the surety's agency or attorney-in-fact. Surety must be listed on the current U.S. Department of the Treasury Financial Management Service list of approved bonding companies as approved for an amount equal to or greater than the amount for which it obligates itself in the Bond, or must be a Louisiana domiciled insurance company with at least an A - rating in the latest printing of the A.M. Best's Key Rating Guide. If surety qualifies by virtue of its Best's listing, the amount of the Bond may not exceed ten percent of policyholders' surplus as shown in the latest A.M. Best's Key Rating Guide. The Bid Bond shall be in favor of the State of Louisiana, Office of Facility Planning and Control, and shall be accompanied by appropriate power of attorney. No Bid Bond indicating an obligation of less than five percent (5%) by any method is acceptable.

The successful Bidder shall be required to furnish a Performance and Payment Bond written by a company licensed to do business in Louisiana, in an amount equal to 100% of the Contract amount. Surety must be listed currently on the U. S. Department of Treasury Financial Management Service List (Treasury List) as approved for an amount equal to or greater than the contract amount, or must be an insurance company domiciled in Louisiana or owned by Louisiana residents. If surety is qualified other than by listing on the Treasury list, the contract amount may not exceed fifteen percent of policyholders' surplus as shown by surety's most recent financial statements filed with the Louisiana Department of Insurance and may not exceed the amount of \$500,000. However, a Louisiana domiciled insurance company with at least an A- rating in the latest printing of the A. M. Best's Key Rating Guide shall not be subject to the \$500,000 limitation, provided that the contract amount does not exceed ten percent of policyholders' surplus as shown in the latest A. M. Best's Key Rating Guide nor fifteen percent of policyholders' surplus as shown by surety's most recent financial statements filed with the Louisiana Department of Insurance. The Bond shall be signed by the surety's agent or attorney-in-fact.

## PRE-BID CONFERENCE WILL BE HELD

at **10:00 A.M.** on **Tuesday, July 9, 2019** at **Concordia Parish Police Jury Room 2, Vidalia, LA**. Attendance at this conference is required and bidders are advised that they will be required to state on the bid form that they have personally inspected and are familiar with the project site.

Bids shall be accepted from Contractors who are licensed under LA. R.S. 37:215-2163 for the classification of **Building Construction**. Bidder is required to comply with provisions and requirements of LA R.S.38:2212 (B) 5 which states that, under certain conditions, the bidder has (48) hours of the bid opening, excluding Saturdays, Sundays and legal holidays, to withdraw his bid. LA R.S. 38:2215 (B) requires that the political subdivision shall award or reject the bid within forty-five (45) days of the receipt of bids.

The Owner reserves the right to reject any and all bids for just cause. In accordance with La. R.S. 38:2212(B)5, the provisions and requirements of this Section and those stated in the bidding documents shall not be waived by any public entity

## Town of Ferriday Council Meeting May 14, 2019 Minutes

Call to Order at 6:01 p.m.: Mayor Sherrie McMahon  
Invocation: Pastor Russell Wagoner  
Roll Call: Alderwoman Lloyd, present  
Alderman Keys, present  
Alderwoman Pryor, present  
Alderwoman Lee, absent - present at 6:25 p.m.  
Alderman Henderson, absent - present at 6:03 p.m.

Approval of minutes for April 9, 2019. Motion made by Alderwoman Pryor and 2nd by Alderwoman Lloyd.

Motion to add Annexation, Letter to Auditors & Dept of Justice, Resolution and Executive Session to agenda. Motion made by Alderwoman Pryor, 2nd by Alderwoman Lloyd.

Motion to open the floor for public comments on agenda items. Motion made by Alderwoman.

Pryor, 2nd by Alderwoman Lloyd, so carried. Justin Conner expressed concerns of annexation and moving forward with what needs to be done to extend the city limits of Ferriday.

## Old Business:

Cooperative Endeavor for Montgomery Park between Rec District No.1 & Town of Ferriday. Motion to approve made by Alderwoman Pryor, 2nd by Alderman Keys.

Updates: Street Lights (EE Wallace Blvd) - still waiting on Entergy; letter to be prepared to Public Service Commission; Ferriday Hall (Kitchen Equipment) - deadline approaching by June 30.

Mayor to seek extension. Accounts Payable - all accounts current and up-to-date; Employee Benefits - Alderman Henderson expressed concerns about employee benefits. Mayor to contact Hazlip concerning employee benefits.

Motions to accept highest Surplus Sealed Bids. Motion made by Alderman Henderson, 2nd by Alderwoman Lloyd, so carried.

## New Business:

Linda Sherbia presented photos of Haney's to the Mayor and Board stating building was not cleaned when rented and family had to clean. Mayor apologized for inconvenience and assured it won't happen again.

First Aid Training to Ferriday Police Department, Mayor and Police Chief to discuss getting someone to train and assistance.

Lillian Ceasor addressed the Mayor and Board concerning a problem with the neighbor's dogs on 5th Street who no longer lives at the residence. Attorney Davis suggested having an officer contact the owner and have on file a written report of findings.

## Occupational License:

Approval of occupational license for CDT Snacks & Sno-Cones and P & S Snack. Motion to approve made by Alderwoman Pryor, 2nd by Alderman Keys.

**Alcohol License:** None

**Executive Session:** Motion to recess regular meeting by Alderwoman Pryor, 2nd by Alderman Henderson, so carried at 6:47 p.m.

Motion to reopen regular meeting by Alderwoman Pryor, 2nd by Alderman Henderson, so carried at 7:05 p.m.

Mayor stated executive session was concerning personnel matters.

## Meeting adjourned at 7:06 p.m.

Sherried.L.McMahon,Mayor Sharon R. Kelly, Town Clerk

6/26

## Regular meeting of Concordia Waterworks District No.1, May 21, 2019.

Meeting called to order at 7:00 p.m. Jean Fairbanks Presiding.

INVOCATION: Catherine Cartwright  
ROLL CALL: All commissioners present  
VISITORS: Charles Renfrow, Manager; Randall Butts; Janice Ford

Warren Enterkin made a motion to accept as written the minutes of the April 16, 2019 board meeting. Don Linder seconded and motion carried.

Mike Sanders made a motion to install a crane and pad for the chlorine at the treatment plant. Catherine Cartwright seconded and motion carried.

Don Linder made a motion to advertise for bids on the grass cutting. Bids will be due at the June 18, 2019 board meeting. Warren Enterkin seconded and motion carried.

The GPS are being installed on the trucks. Catherine Cartwright made a motion to approve the April 2019 fuel bill from Delta Fuel, in the amount of \$1,634.41. Mike Sanders seconded and motion carried.

# Public Notices

Mike Sanders made a motion to approve the monthly bills and purchase orders. Don Linder seconded and motion carried.	
Warren Enterkin made a motion to adopt the monthly budget for April 2019. Mike Sanders seconded and motion carried.	
Mike Sanders made a motion to change the mileage reimbursement amount to .54 cents per mile. Warren Enterkin seconded and motion carried.	
Warren Enterkin made a motion to have Silas Simmons, LLP to perform the fiscal year audit for 2018 - 2019. Catherine Cartwright seconded and motion carried.	
Don Linder made a motion to leave the supplemental employee insurance with Aflac. Catherine Cartwright seconded and motion carried.	
There being no further business, Mrs. Fairbanks declared the meeting adjourned at 7:35 p.m.

MINUTES OF A REGULAR PUBLIC MEETING OF THE  
MAYOR AND BOARD OF ALDERMEN  
OF THE TOWN OF VIDALIA, LOUISIANA,  
HELD ON TUESDAY, JUNE 11, 2019 AT 6:00 P.M.  
IN THE TOWN HALL MEETING ROOM

The Mayor and Board of Aldermen of the Town of Vidalia, Louisiana, met, in regular session, in the Town Hall Meeting Room in Vidalia, Louisiana, on Tuesday, June 11, 2019, at 6:00 p.m.

There were present: Mayor Buz Craft, Aldermen Jon Betts, Tommy Probst, Tron McCoy, Robert Gardner, and Alderwoman Sabrina Dore`.

There were absent: NONE.

There were also present: Debra Moak, Town Accountant; Bill Murray, Town Manager; George C. Murray, Jr., Town Attorney; Jay LaSyone, Town Clerk, and Pam Middleton, Executive Secretary to the Mayor; and representatives of the press.

The meeting was opened with the reciting of the Pledge of Allegiance and the invocation was given by Alderman Betts.

A quorum being present, the Mayor declared the Mayor and Board of Aldermen of the Town of Vidalia, Louisiana, to be duly convened, in regular session, as the governing authority of said municipality, and opened the meeting for the conduct of business.

Prior to addressing the formal agenda, the Mayor recognized the following persons: Mr. Glen Womack, who is running for the State Senate; Mr. Paul Jahn, Chief Operating Officer of Syrah Technologies, LLC, and his Plant Manager; and then Alderwoman Dore` who told those in attendance about the specific plans for the Third Annual Fourth of July Festival which is to be held on the Vidalia Riverfront from 3:00 P.M. until 9:00 P.M.

Next, after being reviewed, the typed minutes of the regular meeting of May 14, 2019, were approved, without changes. The motion for approval was made by Alderwoman Dore`, seconded by Alderman McCoy, and unanimously carried.

Addressing Agenda Item No. 1, the Mayor called on the Town Accountant, Debra Moak, who presented the financial statement for the month of April, 2019. As customary, she explained the fund balances for each of the funds, which summaries included a comparison of actual expenses to budget expenses. She also reviewed the several summary sheets, previously given to the Aldermen, and reported on the various positive and negative fund balances and indicated the net changes in the various funds through April 30, 2019. Following her presentation, there being no questions, the Mayor thanked Mrs. Moak for her usual thorough presentation.

Agenda Item No. 2 was the consideration of occupational license applications. The first application was by Stephanie Farmer for "POSH & Co., LLC" at 2000 Carter Street, Suite 4, Vidalia, LA (old Pizza Hut location). There were no questions, and on motion to approve by Alderwoman Dore`, seconded by Alderman Gardner, and unanimously carried, the application was granted. The second application was by Steven J. Reed for "Vital Nutrition, LLC" at 1642 Carter Street. There were no questions and it was moved by Alderwoman Dore`, seconded by Alderman McCoy, and unanimously carried, that the application be granted.

Agenda Item No. 3 was the application for an outdoor sign by "POSH & Co." for an unlighted 4 foot by 3 foot sign advertising POSH & Co. a Salon & Blow Dry Bar, as pictured with the application. There were no questions and it was moved by Alderman Probst, seconded by Alderman Betts, and unanimously carried, to grant the application.

Agenda Item No. 4 was a Mississippi River update by the Mayor. He reported that there is good news and that the weather forecasts are favorable and the predictions are for a crest in several weeks and after that a slow fall. He reported that the River has been over flood stage for 156 days at this time. There were no questions of the Mayor on his report.

Addressing Agenda Item No. 5, the Mayor advised the Board that he is introducing, at this meeting, the proposed Ordinance amending the Operating Budget of Revenues and Expenses for the Town of Vidalia, Louisiana, for the fiscal year 2018-2019. He explained the need for the ordinance so that the budgetary figures will be in line with the State's Budgeting Laws. He further reported that the Notice of Intent and the Notice of Public Hearing will be advertised as soon as the dates are decided.

Agenda Item No. 6 was the request for a Board Resolution amending a Resolution approving Syrah Technologies, LLC, for participation in the Industrial Tax Exemption Program at the 2001 D. A. Biglane Road address. The Mayor then called on Mrs. Heather Malone to address the Board on the reasons for amending the prior budget dealing with the Industrial Tax Exemption. After her presentation, Mr. Paul Johns, President of Syrah Technologies, LLC spoke to the Board in favor of granting the Amendment. There followed questions both from the Board members and audience concerning the pros and cons of adopting the Amending Resolution. Following the discussion, a motion was made to adopt the Amending Resolution by Alderman Betts, seconded by Alderman McCoy, and the vote thereon was as follows:

YEAS: Aldermen Betts, Gardner and McCoy.  
NAYS: Alderwoman Dore` and Alderman Probst.  
The vote being 3 YEAS and 2 NAYS, the motion carried.  
(A COPY OF RESOLUTION IS ATTACHED HERETO AND MADE A PART HEREOF).

Agenda Item No. 7 was a discussion of adding an assessment to the utility bills for non-accessible utility meters. The Mayor began the discussion by explaining the need for such assessments because there are several locations in town where the meters are inaccessible to the meter readers, and the Town needs to decide on a mechanism to encourage the utility customers to voluntarily make their meters accessible. After comments from several in the audience, it was the consensus that the Mayor's office should investigate the possibility of either putting a fee on the utility bill or possibly making it a misdemeanor offense to not provide access, which would go through the City Court for collection.

Agenda Item No. 8 was an update on the Town's Risk Management Program pertaining to general liability and worker's compensation insurance. The Mayor gave an update on the current status of the worker's comp insurance, noting that his administration has been able to reduce the premium each year he has been in office and that he is working with Reed Insurance for a change in liability insurance to reduce the cost. At that point, Mr. Beau Pilgrim, with Reed Insurance Company, spoke to the Board about the project to reduce liability insurance costs.

Following the update, the Mayor took a moment to recognize Mr. Mark Morace, Department Head for the Utility Department for his 45 years faithful and excellent service to the Town of Vidalia. The Mayor then called Mr. Morace forward and presented him with a plaque for his service.

Agenda Item No. 9 was an update on the Major League Fishing event and a preview of upcoming National Broadcast commercial featuring the Town of Vidalia in connection therewith. The Mayor then reported on the Major League Fishing's 3rd General Tire World Championship Fishing event held on Saturday, March 2, on Lake St. John, Louisiana. He also gave the audience and the Board a preview of a National Broadcast commercial which features the Town of Vidalia which has been done at absolutely no cost to the Town. The audience gave the Mayor a round of applause for hosting the event and for obtaining the commercial.

There being no further business, the Mayor asked for a motion to adjourn, which motion was made by Alderman Betts, seconded by Alderwoman Dore`, and unanimously carried, and the meeting was adjourned.

RESOLUTION

**A RESOLUTION AMENDING A RESOLUTION OF THE TOWN OF VIDALIA APPROVING SYRAH TECHNOLOGIES, LLC FOR PARTICIPATION IN THE INDUSTRIAL TAX EXEMPTION PROGRAM AT 2001 D. A. BIGLANE ROAD,**

VIDALIA, LA

WHEREAS, Article 7, Section 21(F) of the Louisiana Constitution provides for the Board of Commerce and Industry ("BCI"), with the approval of the Governor, to approve contracts for the exemption of ad valorem taxes of a new manufacturing establishment or an addition to an existing manufacturing establishment, on such terms and conditions as the board, with the approval of the Governor, deems in the best interest of the state; and

WHEREAS, SYRAH TECHNOLOGIES, LLC has applied for an Industrial Tax Exemption ("ITE") and seeks approval of the BCI and the Governor for a contract granting that exemption; and

WHEREAS, Governor Edwards, through Executive Order JBE 16-73, has set forth the conditions for his approval of ITE contracts, and affirmed that those conditions are in the best interest of the state of Louisiana; and

WHEREAS, Executive Order JBE 16-73 provides that ITE contracts should be premised upon job and payroll creation at new or expanded manufacturing plants or establishments, and that the percentage of exemption from ad valorem taxes, and length of the contract for such exemption, may vary depending upon the nature of the project and its economic development benefit in accordance with guidance received from the Secretary of Economic Development and concurred in by the appropriate parish and/or municipal council, school board, and sheriff; and

WHEREAS, Concordia Parish borders the Mississippi River in eastern central Louisiana and shares two river crossing bridges totaling a 1-mile distance from Natchez, MS, and

WHEREAS, Concordia Parish is part of the Natchez, MS – LA Micropolitan Statistical Area, and

WHEREAS, this board recognizes that Concordia Parish's workforce

commuter patterns include neighboring counties in Mississippi and neighboring

parish residents, and

WHEREAS, this Board recognizes a regional economic development approach, which includes at times, partnering with neighboring parishes and Mississippi communities to attract new and expanding business opportunities, provides the greatest value and economic opportunity for Concordia Parish and its residents thereof, and

WHEREAS, this Board supports and appreciates the efforts of Governor John Bel Edwards to implement requirements for local input into the Louisiana Industrial Property Tax Exemption Program application approval process, and

WHEREAS, Executive Order JBE 16-73 mandates that each exemption contract approved by the Governor shall include as Exhibit "A" a Cooperative Endeavor Agreement for the ITE between the State of Louisiana, the Louisiana Department of Economic Development, and the applicant for the ITE contract, which provides for the creation of retention of jobs, and provides for the exercise of the option in the Louisiana Constitution for the term or percentage of the parish ad valorem tax exemption granted in the contract, and provides for the reduction or loss of the exemption based upon the applicant's compliance with the contract.

WHEREAS, Executive Order JBE 16-73 further requires that this TOWN OF VIDALIA, together with the other required local governmental entities signify consent to the terms of the exemption by resolution and the sheriff of this parish shall signify consent to the terms of the exemption by letter. Executive Order JBE 16-73 further provides that the resolutions of approval and the sheriff's approval shall be attached as Exhibit "B" to the ITE contract between the BCI and SYRAH TECHNOLOGIES, LLC; and

WHEREAS, SYRAH TECHNOLOGIES, LLC and the Louisiana Department of Economic Development have advised that certain terms and conditions forming Exhibit "A" to the Industrial Tax Exemption Contract pending approval before the Louisiana Board of Commerce and Industry have been reached and have conveyed the same to this MUNICIPALITY, and thus this matter is now ready for a determination of approval of the TOWN OF VIDALIA as required by Executive Order JBE 16-73.

THEREFORE, BE IT RESOLVED, upon consideration of the foregoing and the public discussion held this day, this this TOWN OF VIDALIA approves the terms of the Industrial Tax Exemption contract based on the inclusion of the following terms and conditions into Exhibit "A" (the Cooperative Endeavor Agreement between the State of Louisiana, the Louisiana Department of Economic Development, and SYRAH TECHNOLOGIES, LLC) to the Industrial Tax Exemption contract between the Board of Commerce and Industry and SYRAH TECHNOLOGIES, LLC, with respect to its manufacturing plant located at 2001 D. A. Biglane Road, Vidalia, Concordia Parish, Louisiana.

25 Total New Direct Permanent Jobs at the Manufacturing Establishment

15 of the Total New Direct Permanent Jobs shall be filled by Louisiana residents

\$1,500,000 Annual Payroll

5 Years Term of Initial Exemption Contract

100% Percentage of Initial Exemption Contract

3 Years Term of Renewal Exemption Contract

80% Percentage of Renewal Exemption Contract

90% Threshold of Total New Direct Permnent Jobs at the Manufacturing Establishment that must be reported to LED for annual compliance

90% Threshold of Total New Direct Permanent Jobs at the Manufacturing Establishment to be filled by Louisiana residents that must be reported to LED for annual compliance

This MUNICIPALITY further authorizes the Louisiana Department of Economic Development, on behalf of the Board of Commerce and Industry, to include this resolution in Exhibit "B" to the Industrial Tax Exemption Contract between the Board of Commerce and Industry and SYRAH TECHNOLOGIES, LLC.

THEREFORE, BE IT FURTHER RESOLVED by this TOWN OF VIDALIA that a copy of this resolution shall be forwarded to Board of Commerce and Industry and the Louisiana Department of Economic Development.

THE FOREGOING RESOLUTION WAS READ, AND, AFTER PUBLIC DISCUSSION, THE ROLL WAS CALLED ON THE ADOPTION THEREOF AND RESULTED AS FOLLOWS:

YEAS: Aldermen Betts, Gardner and McCoy.  
NAYS: Alderman Probst and Alderwoman Dore`.   
ABSENT: NONE.  
ABSTAIN: NONE.

AND the resolution was declared adopted on this June 11, 2019.

EARLY NOTICE AND PUBLIC REVIEW OF A PROPOSED ACTION IN FLOODPLAINS AND WETLANDS

All interested Agencies, Groups and Individuals

This is to give notice that the Town of Ferriday is conducting an evaluation as required by Executive Order 11988 and 11990, utilizing as a guideline procedures established in accordance with HUD regulations at 24 CFR 55.20 Subpart C Procedures for Making Determinations on Floodplain and Wetlands Management, to determine the potential affect that its activity in the floodplains and wetlands will have on the human environment for the Town of Ferriday's FY 2019 Louisiana Community Development Block Grant for sewer improvements.

The Town proposes to rehabilitate the Concordia Ave. and Fudickar St. sewer pump stations. These pumps stations were installed in the late sixties and early seventies. At the Concordia Ave. location, an above ground duplex pump station, the sewer gas has corroded the components inside the control panel, as well as, the check valve operators, piping, etc., violating Ten States Standards Regulation 42.35 Electrical Equipment and 42.7 Safety Ventilation. The Fudickar St. pump station is set up as an underground pumping chamber and separate wet well. The one pump that is running cannot keep up with the flow, even after the collection lines have been lined (violating Ten States Standards Regulation 42.38 Pumping Rates). The pumping chamber contains the control panel, check valves, gate valves and pumps. The control panel is in a severe state of disrepair and maintenance on this unit is a struggle, due to the work having to be done in an enclosed environment. Complete rehabilitation of the pump station on Concordia Ave., by replacing the pumps, motors, pump bases and all appurtenances, including electrical, piping and lining of the wet well. Repair and rehabilitation of the pump station on Fudickar St., by replacing the pumps, motors, pump bases and all appurtenances, including electrical, piping and

# Public Notices

lining of the wet well. Both include fencing and construction of an all-weather access road. All of the improvements will be constructed in accordance with standards set forth in the Ten States' Standards and the Louisiana Sanitary Code. This project will also improve the health and wellbeing of the citizens of the project area through improving the methods of handling raw sewerage and bringing those methods up to modern sanitary conditions as per the DHH and State Sanitary Code. All of the residents of the Town will benefit from the project by being provided with an adequate wastewater collection system that will provide less down time and more efficient pumping.

There are three primary purposes for this notice. First, people who may be affected by activities in possible floodplains and wetlands, and those who have an interest in the protection of the natural environment should be given an opportunity to express their concerns and provide information about these areas. Second, an adequate public notice program can be an important public educational tool. The dissemination of information about floodplains and wetlands can facilitate and enhance Federal efforts to reduce the risks associated with the occupancy and modification of these special areas. Third, as a matter of fairness, when the Federal government determines it will participate in actions taking place in floodplains and wetlands, it must inform those who may be put at greater or continued risk.

Written comments must be received by the Town at the following address on or before July 12, 2019: Town of Ferriday, 1116 2nd Street, Ferriday, Louisiana 71334. Attention: Honorable Sherrie McMahon, Mayor, during the hours of 9:00 AM to 3:00 PM. Comments may also be submitted via email at [msmacjyd@gmail.com](mailto:msmacjyd@gmail.com).

Sherrie McMahon, Mayor  
Environmental Certifying Officer  
Town of Ferriday

## The Water We Drink

### CONCORDIA WATERWORKS DISTRICT 1 Public Water Supply ID: LA1029003

We are pleased to present to you the Annual Water Quality Report for the year 2018. This report is designed to inform you about the quality of your water and services we deliver to you every day (Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien). Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water.

Our water source(s) are listed below:

Source Name	Source Water Type
WELL 6	Ground Water
WELL 3	Ground Water
WELL 5	Ground Water
WELL 4	Ground Water

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

**Microbial Contaminants** - such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.  
**Inorganic Contaminants** - such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.  
**Pesticides and Herbicides** - which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.  
**Organic Chemical Contaminants** - including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.  
**Radioactive Contaminants** - which can be naturally-occurring or be the result of oil and gas production and mining activities.

A Source Water Assessment Plan (SWAP) is now available from our office. This plan is an assessment of a delineated area around our listed sources through which contaminants, if present, could migrate and reach our source water. It also includes an inventory of potential sources of contamination within the delineated area, and a determination of the water supply's susceptibility to contamination by the identified potential sources. According to the Source Water Assessment Plan, our water system had a susceptibility rating of "MEDIUM". If you would like to review the Source Water Assessment Plan, please feel free to contact our office.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health. We want our valued customers to be informed about their water utility. If you have any questions about this report, want to attend any scheduled meetings, or simply want to learn more about your drinking water, please contact JEAN FAIRBANKS at 318-757-4353.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. CONCORDIA WATERWORKS DISTRICT 1 is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

The Louisiana Department of Health and Hospitals - Office of Public Health routinely monitors for constituents in your drinking water according to Federal and State laws. The tables that follow show the results of our monitoring during the period of January 1st to December 31st, 2018. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk.

In the tables below, you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms, we've provided the following definitions:

**Parts per million (ppm) or Milligrams per liter (mg/L)** - one part per million corresponds to one minute in two years or a single penny in \$10,000.  
**Parts per billion (ppb) or Micrograms per liter (ug/L)** - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.  
**Picocuries per liter (pCi/L)** - picocuries per liter is a measure of the radioactivity in water.  
**Treatment Technique (TT)** - an enforceable procedure or level of technological performance which public water systems must follow to ensure control of a contaminant.

During the period covered by this report we had the below noted violations.

Compliance Period	Analyte	Type
No Violations Occurred in the Calendar Year of 2018		

Our water system tested a minimum of 8 samples per month in accordance with the Total Coliform Rule for microbiological contaminants. With the microbiological samples collected, the water system collects disinfectant residuals to ensure control of microbial growth.

Disinfectant	Date	Highest RAA	Unit	Range	MRDL	MRDLG	Typical Source
Chlorine	2018	2.79	ppm	1.43-3.2	4	4	Water additive used to control microbes

In the tables below, we have shown the regulated contaminants that were detected. Chemical Sampling of our drinking water may not be required on an annual basis; therefore, information provided in this table refers back to the latest year of chemical sampling results.

Regulated Contaminants	Collection Date	Highest Value	Range	Unit	MCL	MCLG	Typical Source
BARIIUM	11/28/2017	0.01	0.006-0.01	ppm	2	2	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
FLUORIDE	11/28/2017	1.5	1.2-1.5	ppm	4	4	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories
NITRATE-NITRITE	10/18/2018	0.22	0.22	ppm	10	10	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits
THALLIUM, TOTAL	11/28/2017	7	7	ppb	2	0.5	Leaching from ore-processing sites; Discharge from electronics, glass, and drug factories

Radionuclides	Collection Date	Highest Value	Range	Unit	MCL	MCLG	Typical Source
COMBINED URANIUM	10/13/2014	1	1	ug/l	30	0	Erosion of natural deposits
GROSS ALPHA PARTICLE ACTIVITY	11/28/2017	4.83	4.13-4.83	pCi/L	15	0	Erosion of natural deposits
GROSS ALPHA, EXCL. RADON & U	10/13/2014	3	3	pCi/L	15	0	Erosion of natural deposits
GROSS BETA PARTICLE ACTIVITY	11/28/2017	2.48	1.9-2.48	pCi/L	50	0	Decay of natural and man-made deposits. Note: The gross beta particle activity MCL is 4 millirems/year annual dose equivalent to the total body or any internal organ. 50 pCi/L is used as a screening level.

Lead and Copper	Date	90 <sup>th</sup> Percentile	Range	Unit	AL	Sites Over AL	Typical Source
COPPER, FREE	2015 - 2017	0.2	0.1 - 0.4	ppm	1.3	0	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives
LEAD	2015 - 2017	1	1 - 4	ppb	15	0	Corrosion of household plumbing systems; Erosion of natural deposits

Disinfection Byproducts	Sample Point	Period	Highest LRAA	Range	Unit	MCL	MCLG	Typical Source
TOTAL HALOACETIC ACIDS (HAAS)	1877 DOTY ROAD	2018	21	21.3-21.3	ppb	60	0	By-product of drinking water disinfection
TOTAL HALOACETIC ACIDS (HAAS)	19078 HWY 15	2018	27	27.3-27.3	ppb	60	0	By-product of drinking water disinfection
THHM	1877 DOTY ROAD	2018	45	45.2-45.2	ppb	80	0	By-product of drinking water chlorination
THHM	19078 HWY 15	2018	61	61.4-61.4	ppb	80	0	By-product of drinking water chlorination

Secondary Contaminants	Collection Date	Highest Value	Range	Unit	SMCL
CHLORIDE	10/13/2014	58.7	42.9-58.7	MG/L	250
IRON	11/28/2017	0.032	0.022-0.032	MG/L	0.3
MANGANESE	11/28/2017	0.0098	0.0065-0.0098	MG/L	0.05
PH	10/13/2014	8.01	7.95-8.01	PH	8.5

+++++Environmental Protection Agency Required Health Effects Language+++++  
Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Additional Required Health Effects Language:

Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present. Coliforms were found in more samples than allowed and this was a warning of potential problems.

Some people who drink water containing thallium in excess of the MCL over many years could experience hair loss, changes in their blood, or problems with their kidneys, intestines, or liver.

There are no additional required health effects violation notices.  
+++++  
Thank you for allowing us to continue providing your family with clean, quality water this year. In order to maintain a safe and dependable water supply we sometimes need to make improvements that will benefit all of our customers.

We at the CONCORDIA WATERWORKS DISTRICT 1 work around the clock to provide top quality drinking water to every tap. We ask that all our customers help us protect and conserve our water sources, which are the heart of our community, our way of life, and our children's future. Please call our office if you have questions.

## The Water We Drink TOWN OF RIDGECREST WATER SUPPLY Public Water Supply ID: LA1029009

We are pleased to present to you the Annual Water Quality Report for the year 2018. This report is designed to inform you about the quality of your water and services we deliver to you every day (Este informe contiene información muy importante sobre su agua potable. If you have any questions about this report, want to attend any scheduled meetings, or simply want to learn more about your drinking water, please contact ROBERT D. MAPIES at 318-757-4497.  
If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. TOWN OF RIDGECREST WATER SUPPLY is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

The Louisiana Department of Health and Hospitals - Office of Public Health routinely monitors for constituents in your drinking water according to Federal and State laws. The tables that follow show the results of our monitoring during the period of January 1st to December 31st, 2018. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk.

In the tables below, you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms, we've provided the following definitions:

**Parts per million (ppm) or Milligrams per liter (mg/L)** - one part per million corresponds to one minute in two years or a single penny in \$10,000.  
**Parts per billion (ppb) or Micrograms per liter (ug/L)** - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.  
**Picocuries per liter (pCi/L)** - picocuries per liter is a measure of the radioactivity in water.  
**Treatment Technique (TT)** - an enforceable procedure or level of technological performance which public water systems must follow to ensure control of a contaminant.  
**Action level (AL)** - the concentration of a contaminant that, if exceeded, triggers treatment or other requirements that a water system must follow.

**Maximum contaminant level (MCL)** - the "Maximum Allowed" MCL is the highest level of a contaminant that is allowed in drinking water. MCL's are set as close to the MCLG's as feasible using the best available treatment technology.  
**Maximum contaminant level goal (MCLG)** - the "Goal" is the level of a contaminant in drinking water below which there is no known or expected risk to human health. MCLG's allow for a margin of safety.  
**Maximum residual disinfectant level (MRDL)** - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.  
**Maximum residual disinfectant level goal (MRDLG)** - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.  
**Level 1 assessment** - A study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.  
**Level 2 Assessment** - A very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

During the period covered by this report we had the below noted violations.		
Compliance Period	Analyte	Type
1/1/2018 - 3/31/2018	THHM	MCL, LRAA
1/1/2018 - 3/31/2018	THHM	MCL, LRAA
4/1/2018 - 6/30/2018	THHM	MCL, LRAA
4/1/2018 - 6/30/2018	THHM	MCL, LRAA
7/1/2018 - 9/30/2018	THHM	MCL, LRAA
7/1/2018 - 9/30/2018	THHM	MCL, LRAA
10/1/2018 - 12/31/2018	THHM	MCL, LRAA
10/1/2018 - 12/31/2018	THHM	MCL, LRAA

Our water system tested a minimum of 1 samples per month in accordance with the Total Coliform Rule for microbiological contaminants. With the microbiological samples collected, the water system collects disinfectant residuals to ensure control of microbial growth.

Disinfectant	Date	Highest RAA	Unit	Range	MRDL	MRDLG	Typical Source
Chlorine	2018	1.87	ppm	37-3.5	4	4	Water additive used to control microbes

In the tables below, we have shown the regulated contaminants that were detected. Chemical Sampling of our drinking water may not be required on an annual basis; therefore, information provided in this table refers back to the latest year of chemical sampling results.

Regulated Contaminants	Collection Date	Highest Value	Range	Unit	MCL	MCLG	Typical Source
ARSENIC	3/1/2018	1.2	1.2	ppb	10	0	Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes
BARIIUM	4/5/2018	0.633	0.366-0.633	ppm	2	2	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
BERYLLIUM, TOTAL	4/6/2017	0.51	0.51	ppb	4	4	Discharge from metal refineries and coal-burning factories; Discharge from electrical, aerospace, and defense industries
CHROMIUM	4/6/2017	13	13	ppb	100	100	Discharge from steel and pulp mills; Erosion of natural deposits
FLUORIDE	4/6/2017	0.23	0.22-0.23	ppm	4	4	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories
MERCURY	4/6/2017	0.48	0.2-0.48	ppb	2	2	Erosion of natural deposits; Discharge from refineries and factories; Runoff from landfills; Runoff from cropland
NITRATE-NITRITE	10/18/2018	1.3	1.1-1.3	ppm	10	10	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits

Radionuclides	Collection Date	Highest Value	Range	Unit	MCL	MCLG	Typical Source
COMBINED BARIUM ( 226 & 228)	5/8/2018	0.889	0.889	pCi/L	5	0	Erosion of natural deposits
GROSS ALPHA PARTICLE ACTIVITY	4/6/2017	4.37	4.37	pCi/L	15	0	Erosion of natural deposits
GROSS BETA PARTICLE ACTIVITY	4/6/2017	7.19	3.34-7.19	pCi/L	50	0	Decay of natural and man-made deposits. Note: The gross beta particle activity MCL is 4 millirems/year annual dose equivalent to the total body or any internal organ. 50 pCi/L is used as a screening level.

Lead and Copper	Date	90 <sup>th</sup> Percentile	Range	Unit	AL	Sites Over AL	Typical Source
COPPER, FREE	2016 - 2018	0.1	0.1 - 0.3	ppm	1.3	0	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives
LEAD	2016 - 2018	7	1 - 9	ppb	15	0	Corrosion of household plumbing systems; Erosion of natural deposits

Disinfection Byproducts	Sample Point	Period	Highest LRAA	Range	Unit	MCL	MCLG	Typical Source
TOTAL HALOACETIC ACIDS (HAAS)	119 COTTONWOOD DRIVE	2018	39	12-44.2	ppb	60	0	By-product of drinking water disinfection
TOTAL HALOACETIC ACIDS (HAAS)	800 FERRIDAY DRIVE	2018	31	36-36	ppb	60	0	By-product of drinking water disinfection
THHM	119 COTTONWOOD DRIVE	2018	132	132-160	ppb	80	0	By-product of drinking water chlorination
THHM	800 FERRIDAY DRIVE	2018	95	81.3-92	ppb	80	0	By-product of drinking water chlorination

Secondary Contaminants	Collection Date	Highest Value	Range	Unit	SMCL
CHLORIDE	3/17/2014	17.3	14.7-17.3	MG/L	250
IRON	4/6/2017	40.8	16.8-40.8	MG/L	0.3
MANGANESE	4/6/2017	1.5	0.88-1.5	MG/L	0.05
PH	3/17/2014	7.47	7.27-7.47	PH	8.5
SULFATE	3/17/2014	11	11	MG/L	250
ZINC	4/6/2017	1.8	1.8	MG/L	5

+++Environmental Protection Agency Required Health Effects Language+++  
Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Additional Required Health Effects Language:

Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous systems, and may have an increased risk of getting cancer.

There are no additional required health effects violation notices.  
+++++  
Thank you for allowing us to continue providing your family with clean, quality water this year. In order to maintain a safe and dependable water supply we sometimes need to make improvements that will benefit all of our customers. We at the TOWN OF RIDGECREST WATER SUPPLY work around the clock

to provide top quality drinking water to every tap. We ask that all our customers help us protect and conserve our water sources, which are the heart of our community, our way of life, and our children's future. Please call our office if you have questions.

## The Water We Drink

### MONTEREY RURAL WATER SYSTEM INC Public Water Supply ID: LA1029007

We are pleased to present to you the Annual Water Quality Report for the year 2018. This report is designed to inform you about the quality of your water and services we deliver to you every day (Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien). Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water.

Our water source(s) are listed below:

Source Name	Source Water Type
WELL 4	Ground Water
WELL 1 WEST YARD	Ground Water
WELL 3 NEW	Ground Water

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

**Microbial Contaminants** - such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.  
**Inorganic Contaminants** - such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.  
**Pesticides and Herbicides** - which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.  
**Organic Chemical Contaminants** - including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.  
**Radioactive Contaminants** - which can be naturally-occurring or be the result of oil and gas production and mining activities.

A Source Water Assessment Plan (SWAP) is now available from our office. This plan is an assessment of a delineated area around our listed sources through which contaminants, if present, could migrate and reach our source water. It also includes an inventory of potential sources of contamination within the delineated area, and a determination of the water supply's susceptibility to contamination by the identified potential sources. According to the Source Water Assessment Plan, our water system had a susceptibility rating of "MEDIUM". If you would like to review the Source Water Assessment Plan, please feel free to contact our office.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health. We want our valued customers to be informed about their water utility. If you have any questions about this report, want to attend any scheduled meetings, or simply want to learn more about your drinking water, please contact MILTON SANDERS at 318-386-2232.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. MONTEREY RURAL WATER SYSTEM INC is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

The Louisiana Department of Health and Hospitals - Office of Public Health routinely monitors for constituents in your drinking water according to Federal and State laws. The tables that follow show the results of our monitoring during the period of January 1st to December 31st, 2018. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk.

In the tables below, you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms, we've provided the following definitions:

**Parts per million (ppm) or Milligrams per liter (mg/L)** - one part per million corresponds to one minute in two
