NOTICE

The West Monroe Water System (PWS 1073056) is currently in violation of the maximum contaminant level (MCL) for total tri-

halomethanes as set forth by the State [Part XII of the Louisiana state Sanitary Code (LAC 51: XII)] and the Federal Primary Drinking Water Regulations (40 CFR Part 141). The US Environmental Protection Agency (EPA) and the LA Department of Health and Hospitals (LDHH) set drinking water standards and requires the disinfection of drinking water. Where disinfection is used in the treatment of drinking water, disinfectants combine with naturally occurring organic and inorganic matter to form chemicals called disinfection byproducts (DBPs). EPA and LDHH set standards for controlling the levels of disinfectants and DBPs in drinking water, including trihalomethanes (THMs) and haloacetic acid (HAAs). Some people drinking water containing THMs in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

In December 1998, EPA set enforceable drinking water standards for THMs at 80 parts per billion (ppb) and 60 ppb for HAA5 to reduce the risk of cancer or other adverse health effects. Compliance with THMs standard became effective and enforceable on January 1, 2004 and is determined by calculating a locational running annual average (LRAA) of quarterly THMs and HAA5 sample results. Compliance calculations performed for the second quarter of 2017 show that the system's THMs LRAA is 82 ppb at DBP01 – 411 Filhoil St. and 81ppb at DPB02- 303 Ludwig.; thus, the system is currently in violation of the THMs standard.

The actual quarterly samples at DBP01 and DBP02 as well as all other locations, are in compliance. Only the LRAA is out of compliance based on samples from October 2016 which was previously reported to you.

Please share this information with all the other people who drink this water, especially those who may not have received this notice (for example: people in apartments, nursing homes, schools and businesses). You can do this by posting the notice in a public place or distributing copies by hand or mail. This is not an emergency. If it had been, you would have been notified immediately. EPA and LDHH do not consider this violation to have any serious adverse health effects on human health as a result of short term exposure; however, continued long term exposure to THM levels above the standard (e.g. 20 years of exposure) has the potential to have adverse effects on human health.

We at the West Monroe Water System work to provide you and your family safe and dependable supply of drinking water. If you have any questions about this report or would like additional information, please contact Terry Emory, Environmental Quality Manager at (318) 325-0496.

→The Lans Mobile Home Park Ws is currently in violation of the treatment technique requirements for minimum residual disinfectant level as set forth by the State (Part XII of the Louisiana State Sanitary Code). Although this incident is not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

→ The Louisiana Department of Health (LDH) has determined that the presence of microbiological contaminants is a health concern at certain levels of exposure and requires the disinfection of drinking water to kill disease-causing organisms. Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches. These symptoms, however, are not just associated with disease-causing organisms in drinking water, but also may be caused by a number of factors other than your drinking water. LDH has set enforceable requirements for treating drinking water to reduce the risk of these adverse health effects. Treatment such as filtering and disinfecting the water removes and destroys microbiological contaminants. Drinking water which is treated to meet LDH requirements is associated with little to none of this risk and should be considered safe.

→ We are required to monitor your water for the residual disinfectant level. This tells us whether we are effectively treating the water supply. During the compliance monitoring periods of February 1<sup>st</sup>, 2017 through February 28<sup>th</sup>, 2017, and March 1<sup>st</sup>, 2017 through March 31<sup>st</sup>, 2017, the Lans Mobile Home Park Ws failed to provide the minimum residual disinfectant level in the treated water supplied to customers. The violation occurred because the treated water chlorine residual was less than 0.5 milligrams per liter in over five percent of the samples collected in the water system in two consecutive months.

→You do not need to boil your water or take other corrective actions. However, if you have specific health concerns, consult your doctor.

→Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

In addition, specify the steps being taken to comply, as well as when the water system expects to return to compliance, must also be included in this notice.

→For more information, please contact Warren Landrum at 318-235-6685.
