

Three NELA men sentenced in federal firearms, narcotics cases

U.S. Chief District Judge Terry A. Doughty sentenced three defendants on Sept. 21 in separate federal firearms and narcotics cases committed in northeastern Louisiana.

Michael D. Lynch, 40, of Monroe, was sentenced to 60 months in federal prison for possession of a firearm and ammunition by a prohibited person, followed by three years of supervised release after his guilty plea on May 21.

Roy Tullos, 46, of West Monroe, was sentenced to 48 months in federal prison for possession with intent to distribute methamphetamine and possession of a

firearm by a convicted felon, followed by three years of supervised release after his Feb. 20 guilty plea.

Christian J. South, 22, of Newellton, was sentenced to 18 months in federal prison for illegal possession of a machinegun, followed by one year of supervised release after his guilty plea on May 21.

U.S. Attorney Zachary A. Keller for the Western District of Louisiana made the announcement.

Lynch
According to court documents, Monroe Police Department (MPD) officers responded to reports of gunfire on a local street on

May 25, 2025. Surveillance footage showed Lynch's vehicle in the area.

Officers later located Lynch, searched his vehicle and recovered a 9mm round of ammunition, a loaded Taurus G2C pistol under the passenger seat, and a loaded extended magazine.

Lynch admitted to possessing the firearm and ammunition knowing that his prior conviction for domestic violence made it unlawful for him to do so.

The Bureau of Alcohol, Tobacco and Firearms (ATF) and MPD investigated the case. It was prosecuted by Assistant U.S. Attorney Cheyenne Y. Wilson

with assistance from Legal Assistant Amanda Morgan.

Tullos
Members of the Metro Narcotics Unit of the Ouachita Parish Sheriff's Office (OPSO) executed an arrest warrant on Tullos at a Monroe-area hotel on April 19, 2024, according to court documents.

Inside the room, officers located fentanyl, methamphetamine, marijuana, baggies and \$1,448 in cash. Agents also recovered two loaded pistols—a Taurus “The Judge” and an HK P30SK 9mm, both confirmed through testing to be functional firearms.

Tullos admitted to pos-

sessing the methamphetamine with intent to distribute and also acknowledged he was prohibited from possessing firearms due to a prior felony conviction.

The case was investigated by the OPSO. It was prosecuted by Assistant U.S. Attorney Cheyenne Y. Wilson with assistance from Legal Assistant Amanda Morgan.

South
According to court documents, law enforcement responded to a shooting in Tensas Parish in which South and his vehicle were struck by gunfire on July 22, 2024. While waiting for South's vehicle to be towed, officers discovered a dis-

carded Glock 19 equipped with an extended magazine and a machinegun conversion device on the roadway.

South was the sole occupant of the vehicle, and a matching 9mm casing was located inside. He had previously been seen on social media holding a similar firearm. DNA testing produced a DNA profile on the weapon linking South to the weapon.

The case was investigated by the ATF and Tensas Parish Sheriff's Office. The case was prosecuted by Assistant U.S. Attorney Samuel S. Crichton with assistance from Paralegal Specialist Emily Favrot.

PRAIRIE ROAD WATER DISTRICT
2176 Prairie Road
MONROE, LA 71202
OCTOBER 5TH, 2026
The Prairie Road Water District is currently in violation of the maximum contaminant level (MCL) for total trihalomethanes as set forth by the State (Part XII of the Louisiana State Sanitary Code (LAC 51:XII) and the Federal Primary Drinking Water Regulations (40 CFR Part 141).

The United States Environmental Protection Agency (EPA) and the Louisiana Department of Health (LDH) set drinking water standards and requires the disinfection of drinking water. Where disinfection is used in the treatment of drinking water, disinfectants combine with naturally occurring organic and inorganic matter present in water to form chemicals called disinfection byproducts (DBPs). EPA and LDH set standards for controlling the levels of disinfectants and DBPs in drinking water, including trihalomethanes (THMs) and haloacetic acid (HAAs). Some people who drink water containing THMs in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

In December 1998, EPA set enforceable drinking water standards for THMs at 80 parts per billion (ppb) and for HAAs at 60 parts per billion (ppb) to reduce the risk of cancer or other adverse health effects. Compliance with the THMs and HAAs standard for public water systems serving less than 10,000 individuals initially became effective and enforceable on January 1, 2004. Compliance with the THMs standard is determined by calculating a long-term running annual average (LRAA) of quarterly THMs sample results. Compliance calculations performed for the THIRD QUARTER of 2026 show that the system's current THMs LRAAs are 136 ppb at DBP02 - PRAIRIE ROAD. Thus, the system is currently in violation of the THMs standard.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This is not an emergency. If it had been, you would have been notified immediately. EPA and LDH do not consider this violation to have any serious adverse health effects on human health as a result of short-term exposure; however, continued long-term exposure to THMs and HAAs levels above the standard (e.g., 20 years of exposure) has the potential to have serious adverse effects on human health.

If you have any questions concerning this matter, please feel free to contact 322-8706.
