

Guice voted president emeritus of Tech by UL System Board

The University of Louisiana System (UL System) Board of Supervisors recently voted to name Les Guice president emeritus of Louisiana Tech University.

The decision came during the Board's December meeting, Guice's final meeting as Tech's president, where UL System President and CEO and Louisiana Tech President-elect Jim Henderson praised the impact and legacy of Guice's tenure.

"We will certainly miss his knowledge, his advice, his expertise and leadership in the System," Henderson said. "His vision as the 14th president of Louisiana Tech helped trans-

form the university by leaning into innovation. He is lauded and loved by the students, respected by the faculty and the community in a way that most leaders never experience."

Following a motion to vote on the request, the Board unanimously agreed to bestow upon Guice the emeritus distinction and joined the meeting attendees in a standing ovation. Les and Kathy Guice were invited to sit before the Board and comment.

"This special recognition is certainly something I will cherish," Guice said. "We have been a part of this institution for 51 years. Kathy and I met as

freshmen in an English class, got married as juniors and left the wedding to go to a football game. We have lived this. I do want to thank our faculty and staff who are the heart of the university. They are so dedicated to this institution and I'm confident the next president can take it to new heights."

The emeritus distinction is one of the highest honors and can be awarded to professors and university administrators upon retirement and is the latest accolade for the present as he enters the final weeks of his career. Guice has served Louisiana Tech for 45 years—the last 10 as president.

The impact made through his leadership and wisdom has touched the lives of faculty, staff and students, showcasing Guice's enthusiasm and pride for his alma mater and workplace.

PRAIRIE ROAD WATER DISTRICT

2176 Prairie Road

MONROE, LA 71202

November 9th, 2023

This is a revised letter from June 22nd, 2023

The Prairie Road Water District is currently in violation of the maximum contaminant level (MCL) for total trihalomethanes as set forth by the State [Part XII of the Louisiana State Sanitary Code (LAC 51:XII)] and the Federal Primary Drinking Water Regulations (40 CFR Part 141).

The United States Environmental Protection Agency (EPA) and the Louisiana Department of Health (LDH) set drinking water standards and requires the disinfection of drinking water. Where disinfection is used in the treatment of drinking water, disinfectants combine with naturally occurring organic and inorganic matter present in water to form chemicals called disinfection byproducts (DBPs). EPA and LDH set standards for controlling the levels of disinfectants and DBPs in drinking water, including trihalomethanes (THMs) and haloacetic acid (HAAs). Some people who drink water containing THMs in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

In December 1998, EPA set enforceable drinking water standards for TTHMs at 80 parts per billion (ppb) and for HAAs at 60 parts per billion (ppb) to reduce the risk of cancer or other adverse health effects. Compliance with the TTHMs and HAAs standard for public water systems serving less than 10,000 individuals initially became effective and enforceable on January 1, 2004. Compliance with the TTHMs standard is determined by calculating a locational running annual average (LRAA) of quarterly TTHMs sample results. Compliance calculations performed for the second quarter of 2023 show that the system's current TTHMs LRAAs are 84 ppb at DBP02 - UNDERWOOD AND PRAIRIE ROAD and 88 ppb at DBP03 - 375 PRAIRIE ROAD; Thus, the system is currently in violation of the TTHMs standard.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This is not an emergency. If it had been, you would have been notified immediately. EPA and LDH do not consider this violation to have any serious adverse health effects on human health as a result of short-term exposure; however, continued long-term exposure to TTHMs and HAAs levels above the standard (e.g., 20 years of exposure) has the potential to have serious adverse effects on human health.

If you have any questions concerning this matter, please feel free to contact 322-8706.
