

We're Transforming the Mammogram Experience.
Introducing, Smart Curve.

**Genius Technology. More Comfortable.
Shorter Scans. More Accuracy. Here.**

Smart Curve technology is the latest weapon to fight against breast cancer. This 3D exam delivers a more comfortable experience for patients. Its cutting-edge, less pinch & pressure technology can detect up to 60% more invasive breast cancers in denser breast tissue than a 2D exam. Faster scans, less call backs and no travel. This advanced 3D mammography is the only system in Northern MN.

Breast cancer survivor and nintime GRAMMY® Award winner, Sheryl Crow, knows that she doesn't have to compromise between comfort and accuracy when it comes to getting the best care with the Genius™ exam.

***Call today to schedule an appointment.
(218) 283-5495***

**No referral needed unless you have any breast concerns or issues.
If you do notice breast issues please contact your provider.*
