

# PET (Positron Emission Tomography) *Here.*

Another Vital Service Keeping Our Community Close to Home.

RLMC offers patients a painless, diagnostic imaging system known as PET. A PET scan is noninvasive, painless and takes about 30 minutes. This technology can accurately diagnose and locate abnormalities by focusing only on body processes versus specific anatomy.

#### **Some common uses:**

- Detects cancer
- Determines if cancer has spread or returned
- Assess tissue
- Determines the effects of a heart attack
- Assesses brain anomalies

*Ask your provider for a PET referral today (218) 283-5495.*
