Mechanical Engineer Position

Liberty Paper, Inc. joined the Liberty Diversified International family in 1995. LPI is a state-of-the-art paper mill that recycles old corrugated containers into new paper for packaging. The mill manufacturers recycled paper from more than 250,000 tons of old corrugated containers each year. Their commitment to using 100 percent recycled paper reflects Liberty Diversified International's commitment to sustainability, eco-friendly operations and products.

For nearly 100 years, LDI's core values Caring, Innovation, Trust and Excellence have guided the organization's day-to-day activities. LDI is comprised of ten separate companies, each of which has its own direction, entrepreneurial spirit, expertise and product lines.

The **Mechanical Engineer** will be responsible for designing, developing, testing, or supervising the manufacturing and installation of mechanical equipment, components, or systems. This individual will collect, analyze pertinent data and provide comprehensive documentation where applicable.

**The ideal candidate must possess the following qualifications:**

- Engineering and design principles and concepts
- Active listening giving full attention to what others are saying, taking time to understand the points being made, asking questions as appropriate, and not interrupting at inappropriate times.
- Critical thinking-using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems
- Reading comprehension
- Technology design generating or adapting equipment and technology to serve our needs.
- Business systems software
- Complex problem solving by identifying complex problems and reviewing related information to develop and evaluate options and implement solutions
- Judgment and decision making considering the relative costs and benefits of potential actions to choose the most appropriate one
- Time management of one's own time and the time of others.
- Written comprehension and written expression having the ability to read and understand information and the ability to communicate information and ideas so others will understand

**Responsibilities include:**

- Confer with other engineers, vendors, customers, other employees, contractors to discuss existing and potential engineering projects and/or products.
- Direct and coordinate manufacturing, construction, installation, maintenance, support, documentation, and testing activities ensuring compliance and specifications, codes, and mill requirements
- Liaison with external vendors, customers, and engineering firms
- Plan and implement research methodology and procedures to apply mechanical principles to engineering projects
- Prepare specifications for purchase of materials and equipment
- Supervise and train project team members as appropriate
- Oversee projects to assure projects are completed satisfactorily on time and within budget
- Prepare and study technical drawings, specifications of mechanical systems to ensure installations and operations conform to standards
- Assist in the development of capital projects programs for new equipment and major repairs
- Develop budgets, estimating labor, material, and construction costs

**Experience/Education/Certification Requirements:**

- Bachelors degree in MECHANICAL engineering
- 3-5 YEARS experience in heavy industrial environment
