

Everything we do is about celebrating the sea. We're passionate about preserving marine habitats and protecting the incredible species that live in them. Marine conservation is at the heart of everything we do – supporting projects across the world that inspire more people to care.

### Our conservation commitments

- ★ **Turtle Rescue, Rehabilitation and Release**  
SEA LIFE save as many sick, injured or orphaned sea turtles as we can, rehabilitating and returning them to the sea each year – and we're committed to doing more.
  - ★ **World's Biggest Seahorse Breeding Network**  
SEA LIFE is a pioneer in the field of seahorse breeding, successfully breeding and rearing nine different species to date. If Seahorses become extinct, we'll release our stocks into the wild.
  - ★ **Shark Breeding Program**  
SEA LIFE successfully runs shark breeding programs.
  - ★ **Seal Rescue, Rehabilitation and Release**  
SEA LIFE and its sister brand the Sanctuaries annually rescues, cares for and returns to the wild more than 150 orphaned, injured and sick seal pups every year.
  - ★ **Active Campaigner**  
SEA LIFE actively campaigns to keep the seas happier, petitioning governments and raising funds for critical marine conservation issues.
