

SOUND TO EARS

DID YOU KNOW THAT THE INVENTION OF THE TELEPHONE MADE WORLD COMMUNICATION BETTER. KEEP READING TO FIND OUT MORE ABOUT THE TELEPHONE.

THE TELEPHONE

Alexander Graham Bell invented the telephone. Also it was invented on June 2, 1875. It was made at the Massachusetts Institute of Technology. Fun fact: the telephone was made four years before the light bulb. Also they were both made in the U.S.A.

This is how it works. It works by receiving and sending signals that are electric. It uses wires. It has 2 pieces, the first one is a microphone, the second piece is the listening piece.

It is important because back before it was invented, you were unable to talk to people from long distances. Now you can do that. Now you can talk to friends and family.

In conclusion, this creation blew up people's minds. Thank you for reading the local news story.

WHEN ONE
DOOR
CLOSES,
ANOTHER
OPENS.
