

THE TELEPHONE

THERE'S A NEW WELL BASICALLY AN EVERYDAY INVENTION IT'S CALLED THE TELEPHONE PEOPLE USE THE TELEPHONE TO CALL PEOPLE AROUND THE WORLD

TELEPHONE

Alexander Graham Bell made the telephone. He made it in MIT (MASSACHUSETTS INSTITUTE OF TECHNOLOGY) a college in Boston.

So you pick up this one thing it looks like well they aren't all the same the first phone is like a half oval phone some people have a phone bolted into the wall and people have a number to call people

people can't talk to other people without going all the way across town because There people who really miss There family's and who are really sad about how far away people live

I hope you liked this story of when and how the telephone was made because Alexander Graham Bell he made Something amazing and people who are along ways away can talk to each other
