

ALEXANDER

HOW THE TELEPHONE WAS INVENTED. THE FIRST TELEPHONE
WAS INVENTED BY ALEXANDER GRAHAM BELL

Things about alexander

Alexander Graham Bell was born in Scotland in March 1849. In 1871 he moved to Boston. Alexander invented the first telephone in Boston March seven 1876.

It works by converting sound into electrical signals back and forth. You say something into the cup thing. it goes to the thing then to the hearing thing. That's how the telephone works.

The telephone is important because we would keep having to mail letters. I think it is important! It is amazing! You also wouldn't have to travel

I think that Alexander Graham Bell is amazing and smart. He inspires me.
