“When it comes to fishing, we know there is no better place than the Eastern Sierra ... Just make sure you stay safe for the return journey next year.”

Have fun – but let’s be careful out there

With the runoff of 2023 set to make history after record-setting precipitation, we want to encourage anglers to have an awesome time in the Eastern Sierra while also being safe doing so. Inyo and Mono officials, with Los Angeles Department of Water and Power representatives, are urging those setting off to their favorite fishing holes to check in advance to avoid hazardous conditions.

They are encouraging everyone traveling to the Eastern Sierra to please adhere to all road closure signs. Extreme winter storms have resulted in hazardous conditions in local waterways.

As LADWP notes, soft, melting snow and ice can pose a serious danger and the warning signs are provided for public safety.

As long as hazardous conditions remain, officials are encouraging folks to venture to Pleasant Valley Reservoir, Millpond, Diaz Lake, Klondike Lake and Buckley Ponds.

Anglers fishing from rivers and streams are urged to be mindful of banks that might have been undercut by fast-moving water during the runoff. River floating is a known pastime in the Owens Valley, however, officials are recommending folks that they enjoy calmer waterways this spring and summer.

Wear properly fitting personal flotation devices for all river activities.

Remember, the water might look calm on the surface but heavy currents as well as debris are a significant risk.

When it comes to fishing, we know there is no better place than the Eastern Sierra, and even those who are new to the region will enjoy an amazing experience as well. This guide will help you get there.

Just make sure you stay safe for the return journey next year.

License fees in 2023

Don't forget the most important thing in your tackle box By Register Staff

Fishing licenses aren't known for being inexpensive, and generally increase in price by about 50 cents each year. But, when viewed as an investment – in hours and days of invaluable recreation, in quality time with the family, in respite outdoors in the Eastern Sierra – they're actually one of the best values around.

Revenue from California fishing licenses also helps ensure there will be trout to catch in fisheries around the state. For every sport fishing license sold, the California Department of Fish and Wildlife is required to plant at least 2.75 pounds of fish.

And, should any of us be caught fishing without a license, it's a mini-

mum \$100 fine (\$25 if that person can provide proof of a license in court) – which makes that \$54.00 sound like a pretty good deal.

Licenses are required for all anglers age 16 or older except on California's two free fishing days: Saturday, July 2 and Saturday, Sept. 3, in 2022. The general Eastern Sierra trout season runs from the last Saturday in April through mid November. Southern Inyo waters – south of Independence and west of U.S. Highway 395 – open for fishing in March. Various other fisheries in Inyo and Mono counties are open year-round, which is good because fishing licenses are valid from Jan. 1 through Dec. 31.

ANNUAL

Resident, Sport Fishing – \$54

Required for a resident 16 years of age or older to take fish, mollusks, crustaceans, invertebrates, amphibians or reptile in inland or ocean waters.

Nonresident, Sport Fishing – \$145.80

Required for a nonresident 16 years of age or older to take fish, mollusks, crustaceans, invertebrates, amphibians or reptile in inland or ocean waters.

Reduced-Fee Sport Fishing License - Disabled/Recovering Veteran – \$8.24

Available for any resident or nonresident honorably discharged disabled veteran with a 50 percent or greater service-connected disability. After you pre-qualify for your first Disabled Veteran Reduced Fee Sport Fishing License, you can purchase disabled veteran licenses anywhere licenses are sold.

Reduced-Fee Sport Fishing License - Recovering Service Member – \$8.24*

Available for any recovering service member of the U.S. military.

Reduced-Fee Sport Fishing License - Low-Income Senior – \$8.24*

Available for low-income California residents, 65 years of age and older, who meet the specified annual income requirements.

Free Sport Fishing License - Low-Income Native American – NONE*

Available for any American Indian or lineal descendant whose household income does not exceed federal poverty guidelines.

Free Sport Fishing License - Mobility Impaired, Blind or Developmentally Disabled – NONE*

Available for a person who is blind, developmentally disabled, or mobility impaired. Your first Free Sport Fishing License must be obtained from the CDFW License and Revenue Branch. Subsequent licenses may be obtained from any license agent. See application for details.

* Must be purchased at a CDFW office

SHORT-TERM

One-day Sport Fishing License – \$17.54

Allows a resident or nonresident to fish for one specified day. One-day sport fishing licenses are exempt from the Ocean Enhancement Validation requirement.

Two-day Sport Fishing License – \$27

Allows a resident or nonresident to fish for two consecutive days. Two-day sport fishing licenses are exempt from the Ocean Enhancement Validation requirement.

Ten-day Nonresident Sport Fishing License – \$54

Allows a nonresident to fish for ten consecutive days.

LIFETIME

Ages 0-9 – \$594.75

Ages 10-39 – \$972.50

Ages 40-61 – \$876

Ages 62-plus – \$594.75

Available to residents of California. Lifetime fishing licensees receive an annual sport fishing license each year for life. Lifetime Fishing Packages must first be purchased from a CDFW License Sales Office. See Lifetime License Information for more details.

Fishing Privilege Package – \$402

Includes a Lifetime Second-Rod Stamp, Ocean Enhancement Stamp, North Coast Salmon Report Card and Steelhead Report Card.

Blake Jones returns in September

Family fishing tradition keeps safety in mind

By Register Staff

Due to safety concerns, the Bishop Chamber of Commerce has made the difficult decision to reschedule the previously rescheduled 2023 Blake Jones Trout Derby, the chamber announced Tuesday.

Originally, the event was set for March 11, but unusually heavy snow made holding the derby impossible at that time.

Organizers had hoped conditions would improve by May 12, but the Owens River is running too high and too fast. Access to other waters is limited due to ice, snow removal and road repairs.

The new date for Blake Jones has now been set for Saturday, Sept. 16.

"We're sorry to have to do this, but safety of our guests is our highest priority," explained Event Coordinator April Leeson.

Conditions should improve greatly by mid-September. Flows in the Owens will likely stabilize and upper elevation lakes like Sabrina and South Lake will be open and ice-free. Pleasant Valley Reservoir should be good as well.

The derby will follow the same format – registration, weigh-in and prize ceremony at the Tri-County Fair & Event Center. It will be a blind bogey with plenty of prizes for all. Derby participants that have already registered may choose to rollover the fees to the new date or receive a refund.

"We're grateful for all the hard work of the land and water management agencies as well as road repair crews," Tawni Thomson, chamber executive director, said. "This winter has been a

filmed. Whitney Portal usually remains open into early November, weather permitting.

Another easily accessed fishing spot in the Lone Pine area is the "Sandtrap." The Sandtrap is located right above the spillway where Lone Pine Creek empties into the Los Angeles Aqueduct. All the fish from Lone Pine Creek end up pooling in the Sandtrap, making it an easy spot to catch a limit stringer.

Hogback Creek is accessed from Moffet Ranch Road from U.S. Highway 395. The road is a well-maintained dirt road north of Whitney Portal Road. There are areas along the creek that are nicely shaded by large cottonwood trees

Turtle Creek, south of Whitney Portal Road, is another popular fishing creek in the area, as well as the Lower Owens River.

If the fishing is slow, there are lots of unique opportunities in the Lone Pine area.

Start at the Museum of Western Film History, located on the south end of town. Here, you can learn about where film legends like John Wayne and Hopalong Cassidy made some of their movies. Scenes from movies like "The Lone Ranger," "Star Trek" and "Ironman" also were filmed in the area. Ask the museum staff how to find these filming locations.

From the museum, take Whitney Portal Road west to Movie Road and explore the Alabama Hills. The road is a well-maintained dirt road and there are several hikes, arches and rock formations to explore.

Fishing season in Lone Pine will again start with the Early Opener Trout Derby, hosted by the Lone Pine Chamber of Commerce, the first Saturday in March. This derby kicks off the Eastern Sierra early fishing season and is very family friendly, being more about fishing than winning.

The derby places emphasis on children learning to enjoy the sport of fishing and each child

participant receives prizes for every fish they catch, regardless of the weight or size of the fish.

The main derby is held at Diaz Lake but once participants have registered, they can fish anywhere from Lone Pine to Independence as long as they stay west of the U.S. Highway 395.

For more information about the Early Opener trout derby in Lone Pine, contact the Lone Pine Chamber of Commerce at (760) 876-4444.

Fishing history lovers need to explore Independence

Creek fishing around Inyo County seat is unbeatable By Register Staff

Independence, the earliest Anglo settlement in the Eastern Sierra, is one of the region's most peaceful destinations for early and late season stream fishing. With so much history oozing from the rocks and streams themselves, the community and its waterways are the perfect destination for those who enjoy a good campfire story. Opportunities for camping, hiking, fishing and hunting accompany spectacular stargazing and remarkable historic structures.

Extensive hiking and backpacking trails meander throughout the Sierra from trail heads at Onion Valley, including Shephard Pass, and Baxter Pass. There are several campgrounds in the vicinity of Independence and abundant trout fishing in the local creeks.

East of Independence the Owens River and off-channel lakes, ponds, and ditches offer warm water fishing opportunities for smallmouth bass, largemouth bass, bluegill, and catfish.

The Independence area is known for having some of the best creek fishing east of the Sierra. This area is not nearly as frequented as some of the more popular fishing spots in Bishop or Lone Pine. That means there are a lot of fish and not as many anglers, making Independence as quiet and peaceful as it is serene.

The Onion Valley area, which is west of Independence via Onion Valley Road, offers a campground and a pack station.

There also is a trailhead access to several alpine lakes, perfect for anglers who want to go fishing in the backcountry. This is one of the highest trailheads in the Sierra. Maps and detailed lake access information is available at any local visitor center.

Onion Valley Road is a windy, paved mountain road that offers spectacular views of the entire Owens Valley.

Independence Creek is perfect for stream fishing. This creek runs roughly parallel to Onion Valley Road, and is easily accessible and excellent for fly fishing.

Shepherd's Creek has its own unique fishing

The Independence Fishing Derby provides fun for anglers of all ages.

Photo courtesy of Laura Piper

history. During World War II, when Japanese Americans were interred at the nearby Manzanar relocation camp, some of the internees would sneak out of the camp just to go fishing in Shepherd's Creek, as well as some of the other creeks near the camp.

Manzanar is now a national historic site, and the story of the Japanese American fishermen is featured in the film "The Manzanar Fishing Club," which can be found at the museum.

The film is a must-see for anyone who loves the fishing lifestyle, as the film celebrates the spirit of those courageous fishermen and human resilience in the face of unimaginable hardship.

Several of the streams in the Independence area are excellent for small-mouth bass fishing, as well as bullhead catfish and bluegill. There are several small ponds east of the town of Independence that are home to these species.

These ponds, along with the Owens River, can be accessed by Mazurka Canyon Road, then by various dirt roads. For detailed instructions, stop by one of the local visitor centers, or contact a local fishing guide service or sporting goods store.

There also are carp in the Independence area, which is the only type of fish in California that is legal to hunt with a bow and arrow.

FIGURE IT OUT.

SPOTLIGHT

For big fun, look no farther than Big Pine

Area offers easy access to streams,
variety of fishing opportunities

By Register Staff

Big Pine offers an almost-endless variety of opportunities for stream fishing year-round, all within easy access that is perfect for families with children learning how to fish. As one of the lesser-crowded fishing destinations in the region, Big Pine is the perfect spot for anglers who are looking to find a new fishing destination without the crowds.

The small community of Big Pine is known as the portal to Palisade Glacier, the southernmost glacier in the northern hemisphere, and the ancient Bristlecone Pine Forest, the oldest living trees in the world.

But the fishing is just as noteworthy.

Big Pine Creek, which flows down from the glaciers and the Sierra high country, offers excellent stream fishing without the crowds.

While Big Pine Canyon is one of the few canyons in the area that does not have a paved road leading to lakes, it does offer stream access near Glacier Lodge. There are several alpine lakes, accessible by a short hike or trail ride from Glacier Pack Station.

The road to the Glacier Lodge crosses the creek at a point where the water flows rapidly, but there are many other places along the stream where the water slows.

There also are beautiful hikes along historic trails that lead to even more alpine fishing destinations along the streams and lakes of the Sierra backcountry. Big Pine Canyon is accessed by Crocker Street in downtown Big Pine. There is an excellent access point for Big Pine Creek just past the first big curve in the road, just before the road begins to gain altitude.

Baker Creek Campground, which is open year-round, is the perfect base camp for a fishing adventure, especially for families. Baker Creek pools in several places, including in and within walking distance of the campground, offering a peaceful fishing spot.

Some of the best fishing in Big Pine is along the Owens River, off U.S. Highway 168 East. The turnoff is just north of town, right next to the Glacier View Campground. There is a large American flag and a solitary giant sequoia tree right next to the turnoff. U.S. Highway 168 crosses the Owens River, and continues up into the White Mountains towards the Bristlecone

Pines. There is a well-maintained dirt road that follows the river, offering several different access points for anglers.

Tinnemaha Reservoir, located south of Big Pine, and east of U.S. Highway 395, is another great fishing spot. The reservoir can be challenging to reach, due to the brush and reeds that line the shores, but the fishing experience is worth the brush-wading. Several different species of fish inhabit the reservoir, including small-mouth bass – a fun change to the trout-fishing routine.

Little Fish Springs, which is located near Fish Springs Hatchery, is another excellent fishing option.

Goodale and Taboose campgrounds are located south of Fish Springs, and offer stream access for anglers.

File photo
Ryder is in awe of the bass that he caught while fishing a canal in the Big Pine area.

Experimenting with Euro Nymphing

Local fishing expert shares thoughts on fly fishing technique By Fred Rowe

Euro nymphing is a method of fly fishing that comes from competition fly fishing. It uses heavily weighted flies, thin leaders and a sighter, a colored section of leader. This is a highly effective nymphing method that European anglers have perfected over years of competitive fishing.

Fly fishers can choose from one of four main methods: Polish, Czech, Spanish and French. There are slight differences in the leader setups and the way they are fished through the water column.

Ten- to 11-foot rods are used to fish the nymphs. These long rods have stiff butts and soft tips allowing the fly fisher to set the hook without breaking off the fish. The rods are stiff enough to land all but the largest of trout. A 10- to 11-foot three weight or four weight are standard Euro nymphing rods.

In most Euro nymphing, the fly line sits on the rod, and monofilament and fluorocarbon are used

in the leader and tippet set up. Leader and tippet setups range from 15 to 25 feet. These leaders are designed to keep the slack out of the leader allowing the fly fisher to feel the take of the fish.

Integral to the leader set-up is the sighter. This is a 12- to 48-inch piece of colored monofilament placed between the leader and the tippet. The sighter is used to control the amount of tension in the line. Too much slack and fly fishers will not be able to detect the take of the flies by the fish. Too much tension and the flies will drift through the water in an unnatural fashion. Running the sighter equal or slightly faster than the surface speed is optimum. The easiest way to perform this is to run the sighter just ahead of foam on the surface of the stream.

Heavily weighted thin bodied nymphs are used to penetrate the water's surface and allow the flies to quickly get to the substrate where the trout are looking for food. The flies are tied up to imitate the mayflies, caddis flies, stoneflies and midges that trout feed on. Some of the flies are tied using bright and shiny materials to be attractor patterns.

These flies are lobed not cast upstream and lead down-stream. The rod is kept high over the water, keeping the slack out of the leader. Strikes are felt not seen in the sighter. Most strikes feel like tension in the line, not a hard hit like you would expect.

Tension in the leader and the right amount of weight from the flies is essential to the success of Euro nymphing. This method produces in a couple of hours the number of trout that normally is caught in an entire day.

Learning to Euro nymph takes a lot of on the water time. Hiring a guide is a great way to shorten the learning curve. A fly fishing guide well versed in Euro nymphing techniques is worth the price to get the fly fisher on the water catching trout with this very productive method of nymphing.

(Fred Rowe owns Sierra Bright Dot Fly Fishing Guide Service. He teaches fly fishing and fly tying. He is one of the original fly fishing guides in the Eastern Sierra guiding from Bishop to Bridgeport. He is an avid hunter who loves to hunt birds, especially waterfowl. Fred can be reached at (760) 920-8325, roweboat5@verizon.net or on his webpage sierrabrightdot.com.)

Bishop Creek Canyon

The definition of a classic fishing destination

By Register Staff

For many anglers, it's not just about catching fish. Some enjoy the thrill of the chase, and the burst of energy when there's a tug on their line.

For others, fishing offers a chance to spend time in nature, and Bishop Creek Canyon is arguably one of the best places to do so, while taking advantage of the wide variety of options available in the classic fishing destination.

The fishing opportunities in Bishop Creek Canyon abound, offering anglers both stream and lake options, all within a short driving distance from each other and the town of Bishop.

The canyon, which is shaped like a "Y," begins with W. Line Street, State Route 168 West, as it leaves downtown Bishop.

Shortly past the Big Trees Campground, South Lake Road branches off the main highway,

The road leading towards South Lake offers several different access points to fishing locations along the south fork of Bishop Creek. The deeper portions of the creek are heavily planted with trophy-sized rainbow trout. Some of these fish are planted by the California Department of Fish and Wildlife, but much of the planting is provided by the lodges located throughout the canyon and by the Bishop Area Chamber of Commerce and Visitors Bureau.

BISHOP CREEK, from pg. 43

There is a boat ramp for anglers who have their own boats. For those who do not own a boat, the Lake Sabrina Boat Landing offers boat rentals, including non-motorized options.

North Lake is one of the highest lakes in the area that is accessible by car. When autumn begins in the Sierra, the aspens near North Lake are almost always the first to start changing color. North Lake is small in comparison to Sabrina or South Lake but the fish bite just the same.

North Lake is accessed by a well-maintained dirt road that ascends steeply up the side of the canyon wall. This road can be a bit dizzying for those afraid of heights but North Lake's beauty and hungry fish are well worth the adrenaline rush. There also are rustic campsites located right next to the lake.

Bishop Creek Canyon also has 13 different camping options to choose from, and three different lodges offering cabin rentals. Many of these

Hot Spots of Inyo County

A quick guide to popular fisheries By Register Staff

From Cottonwood Creek south of Lone Pine, to Rock Creek Lake north of Round Valley, Inyo County is home to dozens of

angling "hot spots." Here's a look at some of the most popular, and how to get there. California Department of Fish and Wildlife planting schedules, including exact locations, are subject to change.

BAKER CREEK

Take U.S. 395 to the north end of Big Pine. Turn west on Baker Creek Road just north of the ballfield in Big Pine and travel one mile to the campgrounds. Fish are planted in the campground area.

BIG PINE CREEK

Turn west off U.S. 395 on Crocker Street in Big Pine and continue to the top of the grade. The creek is planted from Sage Flat Campgrounds to Glacier Lodge.

BISHOP CREEK, LOWER

Take U.S. 395 to the town of Bishop. Turn west on W. Line Street and continue to Elks (Bulpitt) and Isaak Walton parks. Plants are made upstream from Elks Park to the Powderline Road.

BISHOP CREEK, UPPER

Turn west on W. Line Street in Bishop and continue 15 miles to Intake II. Trout are planted from Intake II to Cardinal Lodge and from Lake Sabrina downstream to the North Lake turnoff.

BISHOP CREEK, SOUTH FORK

From Bishop turn west on W. Line Street and continue to the South Lake turnoff just below Intake II, and turn at the fork. The creek is planted at access points from Creekside RV to the U.S. Forest Service Campgrounds, and from Parcher's Resort to Weir Lake.

COTTONWOOD CREEK

From U.S. 395 turn south at the Cottonwood Power House turnoff located about eight miles south of Lone Pine. Keep to the left as you cross the Los Angeles Aqueduct. The creek is planted from the campgrounds at the power house intake to the end of the road.

DIAZ LAKE

Located on the west side of U.S.

395, two miles south of Lone Pine.

GEORGES CREEK

About seven miles south of Independence on U.S. 395 turn south on the small road located one-quarter mile northwest of the Los Angeles Aqueduct crossing. The fish are planted at the sand trap.

GOODALE CREEK

Travel U.S. 395 14 miles north of Independence and turn west at the Goodale Creek campground sign, then go two miles to campground. The creek is stocked from the campground to Aberdeen.

INDEPENDENCE CREEK

Turn west off U.S. 395 on Market Street next to the Post Office in Independence. Trout are planted from Independence Campground, located one-half mile west of Independence, to where the main road crosses the creek above Seven Pines Village, a distance of about seven miles.

INTAKE II

Turn west at W. Line Street (S.R. 168) in Bishop, and go about 13 miles until you see signs for Intake II.

LONE PINE CREEK, LOWER

From U.S. 395 turn west at the traffic signal located in the center of Lone Pine (Whitney Portal Road). The creek is planted at access points from the Los Angeles Aqueduct to Lone Pine Campgrounds.

LONE PINE CREEK, UPPER

Travel U.S. 395 to Lone Pine. Turn west at the traffic signal located in the center of Lone Pine (Whitney Portal Road), and continue up the grade for 13 miles. Fish are planted at the campgrounds along the creek from this point to the pond at Whitney Portal store.

NORTH LAKE

From U.S. 395 turn west on W. Line

Street in Bishop and continue up the grade for approximately 16 miles. Turn right at North Lake sign.

OWENS RIVER, SECTION II

In the Bishop area, turn east from U.S. 395 on E. Line Street, U.S. 6, Warm Springs Road or Collins Road. Trout are planted from Laws Bridge on U.S. 6 to Collins Road. In the Big Pine area travel east from U.S. 395 on Westgard Pass Road (S.R. 168). The river is planted here.

OWENS RIVER, SECTION III

Accessed via various dirt roads east of U.S. 395 from 10 miles south of Big Pine to just south of Boulder Creek RV Park. To get to "High Banks," turn east on Mazourka Canyon Road, south of Independence. Along the way as the road parallels the river; scout out your own personal spot for future reference. To get to the pools north of the pump-back station, drive to the south end of Lone Pine to Boulder Creek RV Park, then take a left on the long, straight dirt road leading east to the terminus of the river and the pumpback station. From there, another dirt road on the east side of the river leads north to the pools.

PLEASANT VALLEY RESERVOIR

From Bishop, take U.S. 395 as it curves northwest toward Mammoth Lakes. About 10 miles later, a few miles past the Bishop city limits sign, there will be a turn-off on the right. Pass through the campground to the reservoir.

PINE CREEK

Travel U.S. 395 to approximately 10 miles north of Bishop. Turn off on Pine Creek Road and drive west to where the road crosses the creek.

ROCK CREEK LAKE

From U.S. 395, turn west at Tom's Place located 23 miles north of Bishop (Rock Creek Road) and pro-

ceed west up the canyon for about 10 miles. Just beyond Rock Creek Lake Resort, a spur to the left leads to the lake; staying on Rock Creek Road bypasses the lake.

LAKE SABRINA

Drive to Bishop on U.S. 395 and turn west on W. Line Street. Follow the signs to the lake which is located approximately 17 miles southwest of Bishop.

SHEPHERD CREEK

Turn east at the road with a cattle guard located approximately five miles south of Independence on U.S. 395. Follow this road until it ends at the Los Angeles Aqueduct. Turn right and continue to the creek. Trout are planted at the sand trap where the road meets the creek.

SOUTH LAKE

Travel to Bishop via U.S. 395 and turn west on W. Line Street (S.R. 168). Continue for approximately 13 miles to the South Lake Road turnoff. Turn left and drive for another six miles to the lake.

TABOOSE CREEK

Travel U.S. 395 to 14 miles north of Independence and turn west at the Taboose Creek Campgrounds sign. Turn left at the first road past Old U.S. 395 and continue to the stream. The creek is stocked in the campgrounds from Old U.S. 395 to one mile upstream.

TUTTLE CREEK

Travel U.S. 395 to Lone Pine and turn west at the traffic signal in the center of town. Continue up the road (Whitney Portal Road) for three miles to Horseshoe Meadow Road and turn left. Drive for about two miles to the Tuttle Creek Campgrounds. The creek is planted at access points in the campgrounds.

Hot Spots of Mono County

A quick guide to popular fisheries By Register Staff

Mono County has no shortage of fishing “hot spots,” whether anglers are looking for calm fly fishing streams, rugged backcountry

lakes teeming with feisty fish or sprawling waters perfect for trolling. California Department of Fish and Wildlife planting schedules, including exact locations, are subject to change.

BRIDGEPORT RESERVOIR

Turn north off U.S. 395 at S.R. 182 at the south city limits of Bridgeport and continue for approximately three miles to the lake.

BUCKEYE CREEK

Travel U.S. 395 to the west end of Bridgeport and turn south at Twin Lakes Road. Continue for about eight miles and turn right on Buckeye Creek Road located at Doc and Al's Resort. Proceed for another four miles to where the road crosses the creek. Trout are planted from this location upstream.

CONVICT LAKE AND CREEK

Travel U.S. 395 to 10 miles south of Mammoth Lakes and turn west on Convict Lake Road. Continue approximately two miles to the lake.

CROWLEY LAKE

The most popular Eastern Sierra fishing lake, Crowley is located 25 miles north of Bishop just off U.S. 395. Turn east at the Crowley Lake sign to enter at the south end of the lake. Drive farther north on U.S. 395 to Benton Crossing Road. Turn east and follow road to the north lake entrance.

DEADMAN CREEK

Travel U.S. 395 to nine miles north of Mammoth Lakes junction. Turn west on White Wing Camp Road and drive six miles to Deadman Campground. The creek is planted in the campground area.

ELLERY LAKE

Drive U.S. 395 to one-half mile south of the town of Lee Vining and turn west on S.R. 120, Tioga Pass Road. The lake is located about 12 miles away on the south side of the road.

GLASS CREEK

Drive 10 miles north of Mammoth Lakes on U.S. 395 and turn west on the road located across from Crestview Maintenance Station. Continue for one-half mile to the creek crossing.

GRANT LAKE

Turn west off U.S. 395 onto the June Lake Loop Road, north. Continue to the lake.

GULL LAKE

Turn west off U.S. 395 onto the June Lake Loop Road, south. Continue through June Lake Village to Gull Lake.

JUNE LAKE

Turn west off U.S. 395 onto June Lake Loop Road, south. June Lake is approximately one mile from the turnoff.

KIRMAN LAKE

From Bridgeport, head north on U.S. 395 for

about 17 miles. Turn left on S.R. 108 heading west toward Sonora Pass for about 2 miles. Off of the south shoulder and before the Sonora Bridge Campground will be a parking area leading to the Kirman Lake trailhead.

LAKE GEORGE

Drive on U.S. 395 to the Mammoth Lakes turnoff and continue on Main Street (Lake Mary Road) and continue past Twin Lakes and bear right at the fork in the road to Lake Mary and follow the Forest Service signs to Lake George.

LAKE MAMIE

Drive on U.S. 395 to the Mammoth Lakes turnoff and continue on Main Street (Lake Mary Road) past Twin Lakes, turning right where Lake Mary Road splits. Go straight.

LAKE MARY

Drive on U.S. 395 to the Mammoth Lakes turnoff and continue on Main Street (Lake Mary Road) past Twin Lakes and bear left at the fork in the road to Lake Mary.

LAUREL CREEK

Travel U.S. 395 to four miles south of the Mammoth Lakes turnoff. Turn west on Sherwin Creek Road and continue a short distance to the first stream crossing.

LEE VINING CREEK

Drive one-half mile south of the town of Lee Vining on U.S. 395 and turn west on S.R. 120. Access to the creek is available via campgrounds on the south side of the road and via Poole Power Plant Road.

LEE VINING CREEK, SOUTH FORK

Travel one-quarter mile south of Lee Vining on U.S. 395 and turn west on S.R. 120. Continue on S.R. 120 for 15 miles to just past Ellery Lake. The creek is planted from the west end of Ellery Lake to Tioga Lake.

LUNDY LAKE

Turn west off U.S. 395 at Lundy Lake Road, located seven miles north of the town of Lee Vining. Continue west on Lundy Lake Road to the lake.

MAMMOTH CREEK

Drive on U.S. 395 to S.R. 203 (the road to the town of Mammoth Lakes), and turn west. Drive to Mammoth Lakes and turn left on Old Mammoth Road. Continue to Mammoth Creek Road just before the bridge and turn left. The creek is planted at access points from the bridge downstream to Old U.S. 395.

MC GEE CREEK

Drive 28 miles north of Bishop on U.S.

395 and turn west on McGee Creek Road. Continue one-quarter mile south on Old U.S. 395 to McGee Pack Station Road. The creek is planted off access roads from Old U.S. 395 to Upper Campground.

OWENS RIVER, SECTION I

Drive 35 miles north of Bishop on U.S. 395 and turn east on Benton Crossing Road. Continue on Benton Crossing Road to the bridge.

OWENS RIVER SECTION IV

Drive U.S. 395 to approximately eight miles north of the Mammoth Lakes turnoff and turn east on Big Springs Road. Continue for five miles and then turn north at the Big Springs Campgrounds turnoff.

REVERSE CREEK

Take U.S. 395 to the June Lake Loop Road, south, and turn west. Continue past June and Gull lakes to the point where the road crosses the creek.

ROBINSON CREEK

Travel U.S. 395 to Twin Lakes Road at the north end of Bridgeport and turn south. The creek is planted at access points all along Twin Lakes Road to Lower Twin Lakes.

ROCK CREEK

From U.S. 395, turn west at Tom's Place located 23 miles north of Bishop (Rock Creek Road). The creek parallels the road – first on the south, then the north and then south again – all the way to the outlet at Rock Creek Lake, and is planted at various points along the route.

ROOSEVELT LAKE

From Bridgeport, head north on U.S. 395 for about 17 miles. Turn left on S.R. 108 heading west. Just across from the Marine Corps Training Center is the trailhead through Leavitt Meadow to both Lane and Roosevelt lakes after 3.2 miles. Check special regulations.

RUSH CREEK

Drive on U.S. 395 to the June Lake Loop Road, south and turn west. Continue to Silver Lake. The creek is planted at access points from the Southern California Edison power plant bridge, north to the lake, and in Silver Lake Campground located north of the lake, and for approximately one-quarter mile north of the campgrounds.

SADDELBAG LAKE AND CREEK

Drive U.S. 395 to one-half mile south of the town of Lee Vining and turn west on S.R. 120. Continue for approximately 16 miles to the Saddlebag Lake turnoff and drive to the lake at the end of the dirt road.

SHERWIN CREEK

Drive on U.S. 395 to S.R. 203 (the road to the town of Mammoth Lakes), and turn west. Drive to Mammoth Lakes and turn left on Old Mammoth Road. After the bridge, take a left on Sherwin Creek Road and drive three miles to Sherwin Creek Campground. The creek is planted from access roads on both sides of Sherwin Creek Road at Sherwin Creek Campground.

SILVER LAKE

Turn west off U.S. 395 at the South June Lake Loop Road and continue past June Lake and June Lake Village to Silver Lake.

SWAUGER CREEK

Drive to the dirt road located nine miles north of Bridgeport and turn east. The creek parallels U.S. 395.

TIOGA LAKE

Travel U.S. 395 to one-half mile south of the town of Lee Vining to S.R. 120, the Tioga Pass Road. Turn west and continue for 18 miles to the lake, located just outside the entrance to Yosemite National Park.

TOPAZ LAKE

The lake is located in northern Mono County on the California-Nevada border just off U.S. 395.

TRUMBULL LAKE

Drive U.S. 395 to the top of Conway Summit, 17 miles north of the town of Lee Vining, and turn west on Virginia Lakes Road. The lake is on the right side of the road near Virginia Lakes Resort area.

TWIN LAKES BRIDGEPORT

Turn south off U.S. 395 onto Twin Lakes Road located at the north end of Bridgeport and continue to the lakes.

TWIN LAKES MAMMOTH

Drive U.S. 395 to Mammoth Lakes Road (S.R. 203), 12 miles north of Crowley Lake, and turn west. Twin Lakes are about seven miles up the road.

VIRGINIA LAKES AND CREEK

Travel U.S. 395 to the top of Conway Summit, 17 miles north of the town of Lee Vining, and turn west on Virginia Lakes Road. The lakes are at the end of the road; the creek follows the road.

WEST WALKER RIVER

Begin at Leavitt Meadow and on S.R. 108 and continue north along U.S. 395 through the canyon. Access the river from the bridges at “The Lanes”: Eastside Lane, Larson Lane, Cunningham Lane and Topaz Lane all located off U.S. 395. Please respect the ranchers and stay below the high water line along the river.

YOU DON'T HAVE TO WAIT 'TIL FISHMAS

Fun, Family Oriented Fishing Derbies

There are many places to fish in the Owens Valley and Eastern Sierra all year long, but what many anglers look forward to are the trout derbies! So why not plan your trip to your favorite honey hole around this year's Inyo County Fishing Derbies - Bishop Trout Rodeo, Blake Jones Trout Derby, Lone Pine Early Opener, Father's Day Fishing Derby and Big Pine Derby.

» Highlight:

The Blake Jones Trout Derby is the largest single day Blind Bogey fishing event in California and has been celebrated for more than 50 years. Named after the late Blake Jones, he invented the modern cheese bait like Powerbait, back in the late 1950s. With his charismatic personality, Blake Jones became a spokesman for Bishop and the Eastern High Sierra, helping to turn Bishop into a year-round California fishing vacation destination. Maybe this year it will be you, vying for a share in over ten grand in prizes?

Check out dates for these regional fish derbies on bishopvisitor.com/events.

Pleasant Valley offers fantastic fishing

The Owens River has plenty of secret hot spots By Jarett Coons

Over many eons, the Owens River has cut away at the volcanic tablelands, forming a gorge that stretches from Crowley Lake to Pleasant Valley Reservoir.

The Owens began its life from the melting snow and ran unchecked to Owens Lake being joined by many streams along the way. It must have been a sight to see it during a good runoff without any dams or reservoirs to impede its rage.

Today a steady flow of water is maintained through the canyon by the Los Angeles Department of Water and Power and anglers are left with a great trout fishery.

It can take a little rock climbing to get to the good places but it is worth the work. The steady flow makes fishing consistently good any given day.

The brown trout that live here average around 12 inches and will give fishing fans a good fight, often leaping like rainbows. They are opportunistic and can be drawn up by most dry flies. Some of my favorites are Royal Wulff's, Elk Hair Caddis and Stimulators. Hanging a nymph off that dry fly is a great idea here as these trout also take attractor nymphs like Copper Johns, Prince Nymphs and Bead Head Pheasant Tails. The bottom of the Gorge is thick with tules, willows and nettles so be careful when trekking upstream and be careful on those big boulders because some of them are loose.

Pleasant Valley Reservoir

At the lower end of the Gorge there is another dam sealing up the canyon and creating another fishery, Pleasant Valley Reservoir.

This place has very easy access you can park at

Photo courtesy Jarett Coons

If the fishing isn't that exciting, youth, such as Zenneth Coons, seen here, could always have a rock-climbing adventure at the Owens River Gorge.

Explore an alpine angling paradise

Rock Creek Canyon offers easy hiking and great fishing spots **By Register Staff**

Rock Creek Canyon, with its spectacular scenery and world-class fishing, is as easily accessible as it is beautiful. Like a good friend, the canyon itself seems to welcome visitors with open arms, inviting young and old alike to explore the John Muir Wilderness through hiking, horseback riding, biking, rock climbing, and of course fishing.

To reach Rock Creek Lake and Rock Creek, head west at the Tom's Place turnoff on U.S. Highway 395 (at the top of Sherwin Grade). From there, the road winds to a myriad of backcountry angling opportunities.

Rock Creek Lake is one of the smaller lakes that are easily accessible in the Eastern Sierra. Due to its high elevation, if the conditions are right, Rock Creek Lake is a great place to go ice fishing early in the season. Conditions for ice fishing depend on the previous winter.

However, the benefits of the lake's elevation affords the angler more than a chance for ice fishing. Temperatures on the Owens Valley floor will almost always hit triple digits in the summer. When that happens, Rock Creek Lake and Rock Creek can be a much-needed sanctuary from the 100-plus degree heat. The odds of nabbing brooks and bows is said to be best during these times.

Veteran anglers swear by the fly bubble combo when it comes to fly fishing Rock Creek Lake. As for bait, many anglers swear by the traditional nightcrawler.

Rock Creek area lakes are stocked with trout annually. Fishing season for the Rock Creek area opens the last Saturday in April and closes November 15. Be sure to check with the White Mountain Ranger Station in Bishop to make sure the road to Rock Creek Lake and the canyon beyond is open early in the season. Due to its altitude, if the winter was especially heavy, the road won't be open as early as some of the other roads in the area.

Rock Creek Pack Station is only a short distance from the lake. Their specialty is backcountry excursions, which will expose anglers to many lakes teeming with wild brook, rainbow and golden trout. Half, full and multiple day adventures can be arranged through the pack station.

Mosquito Flats is located just up the road from Rock Creek Lake. Despite its name, Mosquito Flats is a wonderful place to start a backcountry fishing excursion; Little Lakes Valley is among the most beloved and popular hiking trails in the region because of its spectacular scenery and gentle slope. The trail head lies at the far end of the Mosquito Flat parking lot.

The trail is surrounded by wildflowers in the springtime. The trail forks into the Morgan Pass and Mono Pass trails not far from the trail head. To reach the Little Lakes Valley, take the Morgan Pass trail to the left.

The Mono Pass trail ascends steeply up the western side of the canyon while the Morgan Pass trail meanders through the lush meadows of Little Lakes Valley for three miles of gentle ascent before ascending to Morgan Pass.

In Little Lakes Valley, there is a series of small lakes and streams, including Serene, East Brook, Mack, Heart, Hidden and Gem lakes. Mostly brook trout are found here, with an occasional heavyweight brown making an appearance.

When fishing Rock Creek, black ants or green body mosquitoes are recommended, as both are natural fare for the creek's trout. Stream anglers will find the water stocked with CDFW rainbows. Look for the rainbows in the open, easy-to-reach locations, especially adjacent to campgrounds. For the sneaky fisherman, wild brown trout are there for the taking in the brush-lined, hard to reach spots.

Forest Service campgrounds are located along Rock Creek and on the lakeshore.

For those looking for more refined accommodations, modern cabin rentals are available at Rock Creek Lake Resort. About a mile downstream more options are available at Rock Creek Lodge.

Rock Creek Lake Resort features a well-stocked general store, home-cookin' with a nightly dinner special as well as rental boats. Rock Creek Lake Resort also serves up smoked barbecue as well as cobbles.

Just a short drive down the road is historic Tom's Place. There, hungry fishermen can find good hamburgers and maybe a fishy tall-tale or two around the famous horseshoe bar. Tom's Place is famous for its Bloody Marys.

Lower Rock Creek, south of Tom's Place, is an often overlooked stretch of the creek that produces a lot of trout. Watch for the turnoff to Lower Rock Creek Road, less than a mile south of Tom's Place, on the southbound side of the U.S. Highway 395.

Anglers may want to start with the traditional PowerBait and salmon eggs when fishing this portion of the creek.

If that doesn't produce easy results, switching to the mosquitoes and ants recommended for the upper stretch of the creek may be the ticket.

A popular hiking and mountain biking trail follows the course of the creek down Lower Rock Creek canyon.

Escape to Convict Lake

Alpine angling on crystal clear water By Register Staff

The history of Convict Lake is almost as deep as the lake itself. The sheer cliffs that surround the lake are known to be home to bald eagles, and the deep water is home to trophy trout.

Tucked just off U.S. Highway 395 south of the turn-off to Mammoth, Convict Lake is considered by the locals to be one of the most beautiful destinations in the beauty-filled Eastern Sierra, and the paved road goes right to the shoreline. For anglers, the lake offers more than just spectacular scenery.

Convict Lake features a loop trail that provides almost 360 degrees of shore access and the Convict Lake Resort, founded in 1929, offers virtually every kind of amenity, from boat rentals to lodging to tackle and supplies and horseback rides.

Convict Lake Resort also promotes a number of fishing derbies throughout the year, offering anglers ample opportunities to win prizes like tackle and gear.

Though the angling is good across the lake, experts say the best option is to hit the water on a boat. From shore or from a boat, some of the best angling action can be found at the inlet, located on the west side of the lake. Garlic-flavored PowerBait of any color is one of the recommended tools, but worms and crickets also are a favorite.

As the weather warms up in the summer, trollers tend to work well on the lake, beating out shore anglers for some of the larger catches.

Be sure to watch out for the bald eagles that call the lake home. They've been known to do fishing of their own, swooping down to the lake's surface and snatching trophy trout of their own.

Seasoned anglers say the trick to netting the trophy-sized trout is to get the bait at a depth of 30-40 feet, where the trout linger to avoid the heat of the day.

As with most Eastern Sierra waters, the best bet is to hit the waters early in the day or late in the afternoon.

Stream fishermen and women also have the option of heading down to Convict Creek, located on the east side of the lake. The lower creek runs past a number of Forest Service campgrounds, giving those who have acclimated to the altitude an opportunity to walk from water to water.

A view of the western side of Convict Lake gives a glimpse of its scenic splendor. .

A "Hink Hike" photo

For more secluded angling opportunities, hit the trail to the upper creek. The trail begins at 7,580 feet and provides access to a number of great fishing holes.

The truly hardy can keep going, hitting Mildred Lake at about 9,760 feet.

To reach Convict Lake, take the Convict turnoff from U.S. Highway 395 near the Mammoth Yosemite Airport.

For information about Convict Lake, call the resort at (800) 992-2260 or (760) 934-3800 or visit www.convictlake.com.

Crowley Lake carries fishing tradition forward

The fishing is as great as the Crowley community By Register Staff

For those familiar with Eastern Sierra fishing, Crowley ranks up right there up at the top, especially when it comes to opening day in April. It's massive and so are the fish that live there. The community around the lake also is renowned for its hospitality.

The massive lake, located just north of U.S. Highway 395 north of Tom's Place, is one of the region's most popular early-season destinations. It is a great place to spend Opening Day, especially for anglers who enjoy socializing with other fish enthusiasts.

Crowley features a variety of bays and inlets as well as its outlet to the Owens River on the south side. At 12 miles long and five miles across at its widest point, there's plenty of elbowroom on Crowley, and even more opportunities for a trophy-sized catch.

With so much room for the fish to swim, Crowley has a reputation as home to some truly massive fish, with the largest on record weighing in at a whopping 26 pounds.

Experts explain that Crowley's catches grow so large thanks to a midge-fly-based food chain that provides summertime feasts for the fish. The fish also gorge themselves on Sacramento perch fry.

The lake features a boat launch and rentals, available at the Crowley

Lake Store, along with information on what's biting and where anglers are having the best luck.

Access to Green Banks near the old North Landing can be reached off Benton Crossing Road (north of the Crowley Lake turnoff and identifiable by the historic Green Church at the turn-off from U.S. Highway 395). The key at Green Banks is trolling over the deeper water of the Owens River Channel where some of the lake's bigger browns will wade deep, waiting for food to flow out of the Owens and into the lake.

Those who continue past Green Banks on Benton Crossing Road will cross the Owens River and find the eastern shores of the lake's inlet, which features popular fishing holes like Layton Springs and Alligator Point. No, there are no actual alligators at Alligator point, but the fish may be just as hungry as a 'gator. Both Layton Springs and Alligator Point have a reputation for delving early-season limits with plenty of action all summer long. They also are accessible by boat.

For those trolling the waters of Crowley, minnow imitators, Cultiva's Rip'n Minnow and Mira Shad, Rapals and Yo Zurls are a safe bet.

Photo by Fred Rowe

Crowley Lake keeps anglers coming back – whether it's boating and fishing from shore.

CROWLEY, from pg. 45

Local sportsmen also recommend needlefish, Lucky Craft Pointers and other options.

Don't be afraid to ask around to find out what's working best and the folks over at the Crowley Lake Fish Camp are always ready to help.

Crowley also is a popular destination for fly fishing, with many hitting the lake in float tubes, or plying the shores. As always, fishing with flies can be a tricky business and the proper fly will change with the season, temperatures and other conditions. Anglers say midge and caddis imitators and streamers resembling perch fry are a good bet if all else fails.

Crowley Lake is named after Father John J. Crowley, who was a Catholic priest and served the Eastern California area in the 1920s and '30s. Crowley founded and served the congregation of Santa Rosa Catholic Church in Lone Pine, which celebrated 100 years in 2019.

Father Crowley was indefatigable in his efforts to attract tourists to the Owens Valley. Each year on Opening Day of trout season – which he managed to have declared a county holiday – he blessed fishing equipment.

In another publicity effort, on Sept. 14, 1934, he climbed Mt. Whitney and became the first priest to celebrate Mass on the summit. Pictures of the Mass appeared in the Los Angeles Times.

The priest's flair for publicity paid off. Tourists began to flock to the valley, and the once-hostile residents began to welcome them. Using constant media pressure, Father Crowley finally secured a hearing with commissioners of Los Angeles regarding the plight of the Owens Valley. At one point, Father Crowley actually locked Chief Water Engineer H.C. Van Norman in a meeting room until the exasperated engineer conceded to requests to build a new dam that would restore water to the impoverished desert.

While returning from a publicity trip to San Francisco in September 1940, Father Crowley struck a steer that had wandered onto the highway. His car was forced into the path of an oncoming truck and he was killed instantly.

When the new Long Valley Dam was completed, the reservoir it created was named Crowley Lake in honor of the desert priest. It remains a popular fishing spot today, attracting thousands of people each year for trout season. It is interesting to note that 78 years after his tragic accident, Father Crowley remains a legendary figure, recognized as the visionary leader who saw the potential for the region, and as a man of faith who dedicated his life to helping its inhabitants.

Photo by Fred Rowe

Reeling in the fish while reeling in the years at Crowley Lake.

channel and strip them back. The trout would ambush are streamer patterns. We would catch and release a lot of trophy rainbows and the occasional brown trout.

Eventually the fishing season was extended on Crowley Lake to the 31st of October. The lake concession would close the lake to boating on the Monday of Labor Day Weekend. We would float tube the lake throwing streamer patterns around the weed beds or troll them behind the float tube looking for rainbows and browns that were feeding on the young of the year Sacramento Perch.

The Crowley Lake concession eventually changed hands and the new owners allowed boats to be on the lake till the end of October. There was an official catch and release trout season from August 1st to October 31st. Anglers were allowed to fish with barbless lures and flies and keep two trout over 18 inches. Eventually the season would get pushed back to November 15th. The lake still closes to boats at the end of October.

Mike Peters and Harry Blackburn are credited with developing the disappearing puff ball technique. Now known as midge nymphing under an indicator. This has developed a whole new fishery on Crowley Lake. On any given day the bulk of the boat flotilla will be fishing fly rods with midges on the end of the leader and an indicator on the line to tell when the trout hits.

Crowley Lake fishing has come a long ways in the fifty years I've been recreating on the lake. Bait fishing and trolling have taken a back seat to the fly fishers fishing out of boats and kayaks. July to September is time to pursue the Sacramento perch. Fly Fishing guides are now making a living off fly fishing the lake.

I still fish the lake every year. Most of the time I'm fishing for perch, but I do like to spend a few summer days on friends boats staring at an indicator just waiting for it to be pulled off the surface by a midge eating trophy trout. I've come a long ways from that jealous kid that just wanted to join his dad on opening weekend at Crowley Lake.

Fishing is fun – but safety first

Things to keep in mind while out on the water By Register staff

Fishing, being out on the water with family and friends should add up to a great time. But there are things that anglers should keep in mind to make sure their outings end up in enjoyable memories and not tragedies.

Here are a few tips to keep in mind while on your fishing trip:

Know the weather and local conditions:

Fishing is an activity done outdoors at all times of the year and fishermen are often exposed to extreme weather. Temperatures may be very hot or very cold – sometimes both at different times of the day. There may be violent storms, lightning, high winds and even the possibility of floods.

Protect your head and body: Wearing a Western-style hat with a broad brim that helps shade your face and neck is a good idea, as is a good pair of sunglasses, preferably polarized sunglasses preferred by most fisherman. Glasses also protect the eyes from blowing dust or an errant fish hook. Light, loose clothing that covers the arms and legs are best and add protection from the negative effects of the sun on the skin as well as provide some protection to the arms and legs if you travel through thickets and brush. Camouflage clothing helps to “blend in” to the environment for more productive fishing.

Wear sturdy shoes: Fishermen often do a lot of walking, so a good pair of shoes or sturdy boots are essential. If you walk into the water, it is a good idea to always wear footwear to protect your feet from sharp sticks, rocks, lost fishing hooks and broken glass.

Photo by Fred Rowe

Keeping track of the weather is essential to be safe while out on a fishing excursion.

Fishing with kids: Bring plenty of extra fishing tackle. Establish rules such as no running, always wearing shoes in or out of the water, always walking with the fishing rod pointing to the sky and never casting without looking behind you first. Never let children wander off alone unsupervised and always use the buddy system.

Young children should always wear a personal flotation device (i.e., life jacket) in or around water.

Respect the outdoors: Remember that whatever you pack in – pack it out. Don't leave

trash and garbage behind that threatens wildlife and ruins the outdoor experience for others. Empty soda or beer cans, bottles, food wrappers, fishing line, fishing tackle and bait packaging and containers all degrade the environment.

And finally, protect yourself from your fellow man: Be polite and considerate! Don't allow young children to throw rocks or sticks in the water or create unnecessary splashing around other fishermen. Try not to be loud and obnoxious yourself. Aside from just being rude, it ruins both yours and their fishing experience.

A 'Basin' of fishing opportunities

Mammoth Lakes Basin lives up to its name

By Register Staff

File photo

With seven different lakes to choose from, including Twin Lakes shown here, an angler could have a difficult time finding a "favorite spot" in the Mono Basin.

While Mammoth Lakes might be known for its world-class skiing and its incredible scenery, on the back side of the mountain lies Mammoth Lakes Basin. With its series of seven lakes just outside of town, the Lakes Basin area is an angler's playground.

The main lakes, which are accessible by paved roads, are home to rainbows, brooks and browns.

One of the most popular is Lake George, the third largest of the basin's great lakes, which is 38 acres in size. Local experts say that fishing the backside of the lake, where the water is deepest, is generally the best spot.

The largest of Mammoth's lakes, Lake Mary, is 140 acres, pro-

viding plenty of room for boats and shore fishing. Mary also boasts campgrounds and other facilities. The locals say the hot spots are near the outlet at the northern end of the lake, and the inlet on the western side.

Next up is Twin Lakes, which is actually a set of three waters connected by Mammoth Creek. The lakes, along with the waterfall that feeds them are the first lakes that are visible from Lake Mary Road, located just across the street from the Tamarack Lodge. Locals say the hot spot is at the inlet of Upper Twin, the northern-most lake. The Twin Lakes are generally accessible on the Opening Day of the fishing season, depending on how much snow Mother Nature dumps on the region.

File photo

Mammoth Lakes Basin, or the “Lakes Basin,” as it is commonly referred, is just southwest of Mammoth Lakes.

Lake Mamie is located just south of Twin Lakes. This water has been proven to deliver for eager anglers looking to land that trophy-sized trout. A good place to start is in the deeper waters on an early morning.

Horseshoe Lake, a 53-acre lake at the end of the paved road, contains no fish. While Horseshoe isn’t a fishing hole, it is a popular swimming hole for anglers taking a break from a day of fishing.

All the lakes, except Horseshoe, are stocked by the California Department of Fish and Wildlife and receives healthy summer

plants from private hatcheries.

Anglers looking to stretch their legs and take in some of Mammoth’s famous mountain air and breathtaking Sierra vistas can lace up their boots and head for McLeod and Crystal lakes, located just a short hike away from the paved roads. And for the more adventurous angler, there are plenty of opportunities farther into the backcountry.

Access to all Mammoth Basin waters is available through the town of Mammoth Lakes, located just a short drive west on State Route 203 from U.S. Highway 395.

Remember to always think safety first!

The Mono County Sheriff's Office operates patrol boats across all major waterways throughout Mono County.

We are there to enforce all boating laws and ensure safety!

Enjoy yourself and good luck catching “The Big One!”

Take another look at the loop

Bring rod, fishing tackle and your camera
to June Lake region

By Register Staff

Tucked away against the back side of Yosemite National Park, just a little way off U.S. Highway 395, the June Lake Loop is one of the Eastern Sierra's most beloved hidden gems. Sometimes called the Alps of the Sierra by the locals, the quiet backwaters of the lakes and streams are the perfect spot for fishing while surrounded by natural beauty.

The 22-mile loop begins and ends on U.S. Highway 395. The loop is home to Grant, Silver, Gull and June lakes, as well as a number of streams and tributaries that offer their own unique angling opportunities.

Grant and Silver lakes are known for legendary catches for brown trout. Fishing for these trophy browns is best in the fall, towards the end of fishing season.

The habits of the various fish found along the Loop can vary depending on the season, temperature and body of water they are swimming in; it's always a good idea to check in at a local tackle shop to see what's biting and where. For a more localized perspective, check in with fellow anglers before hitting the water.

In general, Sierra Slammers, Berkley trout worms and Panther Martins are popular on Gull Lake, and at Silver the regulars tend to go with a bubble and flies or Woolly Buggers, trout traps, Panther Martins and Rooster Tails.

Another popular bait for big brown hunters are Tasmanian Devils. Anglers report that Rapalas, Lucky Craft Pointers and Kastmasters are smart options.

The June Lake Loop begins at the junction of U.S. Highway 395 and State Route 158, heads west to June Lake, a 160-acre spring-fed lake preferred by trollers and bait fisherman due to its deep waters. Float tubing gets good results along the western edge and northern shoreline, where anglers will find tule beds and a shelf that drops into the depths. Fish tend to circumnavigate the lake along this shelf, making it an ideal location to drop some bait.

The California Department of Fish and Wildlife stocks June, and supplemental trout are provided through a private trout farmer and rainbows reared at the marina.

Just beyond June Lake, anglers will reach Gull Lake, set among a pine forest and a serene setting. Gull is popular among fly fisherman and bait fishers alike. At 64 acres, Gull is the smallest of the June Lake Loop waters but that doesn't stop the angling action. Like June,

June Lake is a popular destination for anglers going after big fish.

File photo

Gull's tule beds along the northern shoreline draws float tubers who say damsel nymphs and calibaetis nymphs bring results. Others recommend tugging streamers between the big rocks and aspens along the western shoreline. Gull is generally known as a haven for rainbows in the 10- to 14-inch range, with a few odd trophy-sized Alpers trout to be found.

Farther west along the loop, anglers will find June's fly fishing haven – the 80-acre Silver Lake. Boat traffic on Silver is limited to 10 mph, which makes for an awesome opportunity for kayaks and float tubes.

Silver Lake is linked to Gull by Reverse Creek and to Grant by Rush Creek. A popular spot for anglers is at the Rush Creek outlet. This area really takes off as larger rainbows begin spawning.

Another hot spot is the drop-off along the southern shoreline, which is another productive fishing hole in the early summer months.

For those of the fly fishing persuasion, note that Silver Lake often experiences chironomid hatches throughout the season, which can make for great opportunities.

The largest of the Loop's lakes is Grant Lake, reached just before the Loop reconnects

with U.S. Highway 395. Grant Lake is a massive 1,100-acre body of water popular with trollers who report great action in the early mornings and late afternoons.

Experts say late fall is best for float tubing, as the big browns are coming up from the depths to feed along the shoreline before the winter freeze. During late spring spawning, those big browns can be found at the Rush Creek inlet.

In addition to its drive-to lakes, the Loop serves as a launching point for more secluded high-elevation lakes. A gravel road about a mile north of Grand Lakes leads to a trailhead to Parker and Little Walker lakes. Parker is known for its population of wild browns in the 5-pound range.

Another trailhead located near Silver Lake leads to Agnew and Gem lakes and a plethora of wild brooks and rainbows.

For a prolonged trip, the nearby Frontier Pack station provides trips to more distant backcountry destinations like Alpers and its golden trout.

Each lake in the Loop boasts its own Forest Service campground and there are plenty of other accommodations to be had in the area.

Yosemite's best kept secret

Tioga Pass – fish, picnic and soak up the views

By Register Staff

Adventure seekers and nature lovers alike journey from around the world to experience Yosemite National Park, with its sky-piercing spires and serene pine forests, but anglers know that Yosemite's best kept secret is its spectacular back door, Tioga Pass. The eastern boarder of the park, and the Lee Vining area of Mono County, is home to some spectacular fishing spots.

Ellery and Tioga lakes hold a lot of put-and-take Department of Fish and Wildlife rainbows and a healthy supply of browns, many of which have been growing, just waiting for the skilled angler.

The locals claim that a fly-and-bubble combo is a good choice. But when the bugs start buzzing and the mosquitoes come out, traditional favorites like Powerbait and worms also provide promise.

For wild browns, anglers should head on to Saddlebag Lake. At about 340 acres, this high-elevation water is generally open by Memorial Day. The lake also offers a marina with boat rent-

als and a store with supplies and advice.

Saddlebag also is a launching point for the 20 Lakes Basin, a grouping of high country waters brimming with brookies and even the elusive golden trout, California's state fish.

However, 20 Lakes Basin does not include road access, so a short hike will be in order.

The creek flowing from Saddlebag Lake is a popular fly fishing destination, with 8- to 12-inch browns caught regularly.

Lee Vining Creek also flows out of Ellery Lake and offers more great fly opportunities in the warm summer months. A section of the creek is catch and release, and is heavily stocked with rainbows. Locals say the open meadows in Lee Vining Canyon are a great place to find 12- to 15-inch lunkers.

Below the LADWP intake at Mono Lake, wild browns are available. However, there is a two-fish limit and no stocking.

Ellery, Tioga and Saddlebag lakes each have campgrounds and creek-side camping is avail-

able in Lee Vining Canyon, accessible just before the ascent to Tioga Pass, near the Forest Service Ranger Station.

A short, though strenuous, one-mile hike to the Gaylor Lake Basin offers outstanding fishing for wild brook trout. The four small lakes in the basin are within Yosemite National Park, with the trail located near the entrance station.

When it comes to the high-elevation lakes in the Tioga Pass area, weather plays a huge part in the fishing action. In heavy snow years, Tioga Pass, which is State Route 120, may not open until May.

The highway links the east and west sides of the Sierra and provides access to Yosemite. But for fishermen, the opening of the highway is the opening of Ellery and Tioga lakes, the high-country lakes with scenery that rivals the catching.

When accessing Tioga from U.S. Highway 395, be sure to stop in the community of Lee Vining to stock up on supplies.

Bridgeport continues record-breaking traditions

Monster trout and mountain culture make this region
a must for every fishing enthusiast By Register Staff

Those who are lucky enough to travel through the quiet community of Bridgeport will find a quaint little town nestled in a beautiful alpine valley in Mono County. Its historic white courthouse and welcoming downtown are often decorated with red, white and blue as the town sports its potassium and small-town America pride.

But for those who are luckier still, and are able to spend some time exploring everything Bridgeport has to offer, the fishing is fantastic.

Twin Lakes, which is not far from the mountain community of Bridgeport, has produced a record-shattering 26-pound, 8-ounce brown trout – and there are plenty more record-setters in these northern Mono County waters.

Twin Lakes is only one of the many fishing options. The Bridgeport area is home to the spacious Bridgeport reservoir, Virginia Lakes, Big Virginia Lake, Red Lake, Trumbull Lake and many more. Each has proven to be a productive body of water for lunkers.

Bridgeport Reservoir is a 2,913-acre lake that is filled with about 40,000 acre-feet of crisp alpine water. While there is ample room for anglers to fish from shore, many recommend boat fishing on the lake as the best way to catch a lunker.

For those who prefer to cast from solid ground, the reservoir has 13 miles of fishable shoreline with popular spots like Rainbow Point and the Swaeger and Buckley creek outlets

located on the south side of the lake.

Just below the dam, anglers will find a spot the locals refer to as the “Miracle Mile,” the first stretch of the Walker River, which produces great stringers year-round.

Bridgeport Reservoir is sometimes compared to Crowley Lake, because of its size and reputation as home of massive trout. However, there is at least one notable difference; Bridgeport Reservoir is not prone to the big crowds that are common on Crowley. At 5,600 feet, Bridgeport Reservoir is at a lower-altitude than Crowley and has shallower waters. One reason the trout grow so big in Bridgeport is because there is a healthy population of callibaetis, hironomid and damselflies that allow the fish to gorge during the summer. As for technique, still-water nymphing is a safe bet during the spring, when the trout are migrating to the cooler waters flowing out of the creeks.

During the fall, streamer fishing from float tubes has been known to bring in 10-pounders for those angling for browns or rainbows.

The reservoir’s marina and boat launch are located off State Route 108, just past the Bridgeport airstrip. There are RV parks along the shoreline as well as public launch ramps. State Route 108 exits U.S. Highway 395 south of Bridgeport, heading towards Yerington, Nevada.

In addition to the popular reservoir, the Bridgeport area’s other premier fishing holes

include Twin Lakes (though, it’s a different set of Twins than can be found in the Mammoth area). The Twins can be found southwest of Bridgeport by taking State Route 182 West. The shoreline is rocky and steep, but the water is deep and turns out some monster brown trout each year.

Robinson Creek flows through the Upper and Lower Twin lakes, then heads east to Bridgeport Reservoir. Below Lower Twin Lake, there are several creekside campsites that make for convenient angling opportunities.

The action doesn’t stop there. The mountains that rise from the valley are a tangle of streams and creeks ripe for the plucking. North of Robinson Creek, anglers will find Buckeye Creek and its two tributaries. To the south (and across State Route 182) are Green and Virginia creeks, with access located roughly five miles south of Bridgeport.

The Bridgeport Valley also is home to the Virginia Lakes, a chain of 10 lakes located between 9,500 and 10,200 feet in elevation, accessed just six miles east of U.S. Highway 395. All 10 lakes lie within a mile and a half of the Virginia Lakes Resort. This chain of lakes was first stocked in the 1800s, and continue to be stocked with rainbows. Three of the 10 are accessible by car and most are home to native brooks and browns that are ready to feast on natural baits like Nightcrawlers and crickets.

Step into another world along Walker River

Legendary trophy trout water runs wild

By Register Staff

The sister forks of Walker River may flow through some of the most beautiful portions of the Eastern Sierra, but the rivers also are home to year-round fishing that is sure to keep anglers coming back time and time again. Designated as a trophy trout water in 2007, the East Walker River, flowing east from Bridgeport Reservoir, has the reputation as being a premier fly fishing stream.

Catches of trophy class brown trout, judged by pounds not inches, make a season long showing. Anglers will find more than five miles of easy-to-access roadside waters.

A favored location for consistently producing heavyweights is the “miracle mile” section of water directly downstream from the dam.

The river is governed by special regulation. Angling is restricted to barbless hook lure or fly – no bait. From Opening Day to the final day of the season possession limit is one fish, minimum size 18-inches. From the close of the general season (Nov. 15) to the next season Opening Day, possession is zero.

Fifteen miles north of Bridgeport, U.S. Highway 395 crosses the West

Walker River. The river was designated a year-round water in 2014. The new regulation allows for bait fishing from Opening Day to the Nov. 15 closing with no tackle restrictions along with a five fish possession limit.

From Nov. 16 to the next season opening day angling is restricted to barbless hook or fly with zero possession.

The river is on the California Department of Fish and Wildlife and Mono County trophy trout program during the regular season.

Historically productive locations have been a short distance up and downstream from the U.S. Highway 395 bridge crossing and the slower waters near the downstream town of Walker.

Highlighting the summer season, is the “How Big is Big” derby. Sponsored by the communities of Walker, Coleville and Topaz, and the Northern Mono Chamber of Commerce, the How Big is Big Fishing Derby runs for the entire month of July. No entry fee – just bring your fish in to the Walker General Store, and your catch will be weighed and recorded. There will be lots of prizes. Email the Northern Mono Chamber of Commerce, info@northernmonochamber.com, for more information.

Check out our website @ junelakemarina.net

Lake photo courtesy Topaz RV Park Lake Cam

Topaz Lake on the California-Nevada border is legendary for giving up loads of hungry lunkers in addition to catchables stocked by both states' departments of Fish and Wildlife.

with the heater running full blast.

The lake is home to a large minnow population, which means streamers and Panther Martins are good for trolling.

In the warm summer months, the trout are likely to head for deeper, cooler waters. Anglers should sink their bait to a depth of about 34 feet to find the fish. At its deepest point, Topaz reaches a depth of 92 feet.

One of the popular trout holes on Topaz is on the north-east corner of the reservoir. It's a good place to float to with purple or black woolly buggers or prince nymphs with an intermediate sink line.

Trout fishing remains strong throughout the year, but Topaz offers a couple options for anglers. Bass fishing takes off as the weather begins to warm up. The record smallmouth bass for the lake is in the six-plus-pound range.

Anglers who are looking to hook a bass should try a crawdad pattern from shore.

Another emerging trend on Topaz is carp fishing.

Because carp spawn twice a year, laying thousands of eggs, they are abundant in Topaz. They're also big and strong and will put up a fight. Carp also pose a new challenge for seasoned anglers, because they're reclusive, skittish fish. But on the up side anyone, whether fishing with a fly or bait, from the shore or the bank, can try their hand at catching a nice sized carp.

With the surge in interest in carp fishing, the lake has seen an increase in bow fishing, with clubs making special trips to the lake during spawning season to hunt carp.

Access to Topaz Lake is excellent for all types of vehicles. From Carson City, travel south on U.S. Highway 395 for approximately 40 miles. Turn east on Topaz Lake Park Road to reach the Douglas County Park at the far east end of the reservoir or turn east on Mark Twain Avenue (just past Topaz Lodge and Casino) and follow the road to Topaz Marina.

Shore access is available along Topaz Lake Park Road, within Douglas County Park, and farther south on U.S. Highway 395 in California.

Guide to Eastern Sierra Campgrounds

The Campground Guide is intended to provide vacationers to the Eastern Sierra with a general overview of the campgrounds available in Inyo and Mono counties. **Fees and other applicable information are always subject to change.** The fee and other information included here was the most current data available when the Fishing Guide went to press.

As a general rule, most campgrounds open with

the spring thaw and close before the first winter storm in the fall. Some of the campgrounds located at lower elevations and those privately or county-owned are open year round. Tuttle Creek Campground, managed by the BLM, is open year-round.

It is always recommended that visitors contact the Mammoth Lakes Welcome Center at (760) 924-5500, or the BLM at (760) 872-5008, for the most up-to-date information as the summer camp-

ing season draws near.

Visitors may also call the ranger districts at the phone numbers provided below, or visit the following websites, for up-to-date information:

www.fs.fed.us/r5/inyo/recreation/campgrounds.shtml
www.blm.gov/ca/st/en/fo/bishop/camping/index.html

In-the-field guidance

Fishing guides and pack stations here to enhance your experience

Not everyone is lucky enough to live in the Eastern Sierra full-time, and for these people, it's important they make the absolute most of their time here in Inyo and Mono counties.

There are also longtime locals wanting to approach one of their favorite pastimes from a fresh perspective, or learn new and better techniques,

or explore areas of their big backyard they've only seen in photographs.

For all of these folks, the services offered by local fishing guides and pack stations are invaluable. And luckily, the Eastern Sierra is flush with both – willing, ready and eager to educate, broaden horizons and add an element of adventure to angling excursions.

Following are some of the guides and stations here to help ...
