

## CAREER OPPORTUNITY

# Compounding Manager

*KDC/ONE Northern Labs, Inc., a manufacturer of consumer and commercial cleaning products, is offering a challenging and rewarding position in our Compounding department.*

Responsibilities include overseeing duties and coaching Compounders to operate Compounding areas efficiently and at a consistent quality level. Coordinate tanks and schedule personnel according to production schedules. Assist in minor trouble-shooting for Compounding issues that arise. Ensure that the Compounding areas are operated in compliance with ISO, FDA, DNR and OSHA guidelines and regulations. Manage major new business projects and installations in Compounding and assist in developing Process Safety Management requirements along with conducting Hazard Assessment for new operations and changes. Meet with customers as needed to help coordinate necessary planning, testing and production to support new business.

This position requires a bachelor's degree in a field of science or equivalent experience. Background with cGMP and FDA compliance preferred. Must be detail oriented, possess excellent organizational skills and have ability to work independently along with multi-tasking. Must initiate continuous improvement.

We offer competitive wages and benefits including 401(k), bonus potential, tuition reimbursement, medical, dental, vision and life insurance.
