FULL JOB DESCRIPTION

Install, service, or repair heating and air conditioning systems in residences or commercial establishments. Adjust system controls to settings recommended by manufacturer to balance system. Assemble, position, and mount heating or cooling equipment, following blueprints or manufacturer's specifications.

Connect heating or air conditioning equipment to fuel, water, or refrigerant source to form complete circuit. Fabricate, assemble, or install duct work or chassis parts, using portable metal-working tools or welding equipment. Inspect and test systems to verify system compliance with plans and specifications or to detect and locate malfunctions. Install or repair air quality systems, such as specialized filters or ultraviolet (UV) light purification systems. Install radiator controls for room-level zone control heating of residential or commercial buildings. Measure, cut, thread, or bend pipe or tubing, using pipe fitter's tools.

Recommend, develop, or perform preventive or general maintenance procedures, such as cleaning, power-washing, or vacuuming equipment, oiling parts, or changing filters.

Repair or service heating, ventilating, and air conditioning (HVAC) systems to improve efficiency, such as by changing filters, cleaning ducts, or refilling non-toxic refrigerants.
