MATTERS FROM COMMISSION AND STAFF

4. Consideration of Contract for Fair Heritage Arena HVAC Recommissioning

Paul Cote, Facilities Manager, presented to the Board for consideration of approval the award of a contract for HVAC and BAS Upgrades at the Fair Heritage Arena.

The Heritage Arena (HA) currently has 2 separate heating systems and 2 separate ventilation systems and a series of large ceiling fans to manage heating and ventilation in the arena. The systems are not interconnected by a Building Automation System (BAS) and work independently to achieve system setpoints. As a result, the systems do not work in an efficient manner and at times operate when they are not needed. Also, due to staff turnover, system knowledge regarding operations and maintenance has been lost, so systems are not currently operating at maximum efficiency. The goal of this project is to continue the recommissioning process of the systems to reestablish maximum operating efficiency, to install a BAS to coordinate the performance of the various systems so they work together maximizing efficiency, and to retrain the O&M staff so they can best operate the system and ensure that energy efficiency gains endure into the future. On August 6, 2019, the BCC approved a contract utilizing EMP funds to start the recommissioning design process. Quantum Engineering Group was hired to investigate the situation and develop specifications for the project. This has been completed and an RFP was advertised and posted on Public Purchase (PP) on Nov 4, 2020. One bid was received at a cost significantly higher than expected. As a result, the specifications were modified to allow some less expensive options and the project was readvertised and put out to bid on December 16, 2020. The following bids were received:

1. Long Building Technologies: \$65,793.00
2. Bison HVAC, LLC: \$91,533.00
3. Snake River MEP Complete: \$96,361.00

Facilities has reviewed the bids and has determined that Long Building Technologies is the lowest responsible bidder.

There was no public comment.

A motion was made by Commissioner Barron and seconded by Commissioner Epstein to award the contract for HVAC upgrades and installation of a Building Automation System at the Fair Heritage Arena to Long Building Technologies in the amount of \$65,793.00. Chairwoman Macker called for a vote. The vote showed all in favor and the motion carried.

5. Consideration of EMP Funds for Fair Heritage Arena HVAC Recommissioning

Paul Cote, Facilities Manager, presented to the Board for consideration of approval the use of Energy Mitigation Program funds for HVAC Upgrades and BAS for the Fair Heritage Arena.

On August 6, 2019, the BCC approved a contract utilizing EMP funds to start the recommissioning design process. Quantum Engineering Group was hired to investigate the situation and develop specifications for the project. Specifications have been developed and an RFP released for the work specified; Long Building Technologies was the lowest responsible bidder. Long Building Technologies would upgrade the existing HVAC system and add a Building Automation System to monitor and operate its functions. Facilities and Fair hereby request the cost of the upgrades to be paid for utilizing Energy Mitigation Program funds on the following grounds:

1. Eligibility: Teton County owned infrastructure.
2. Approved Uses: Conversions of existing energy use systems to more efficient energy saving equipment.

There was no public comment.

A motion was made by Commissioner Propst and seconded by Commissioner Barron to approve the expenditure of Energy Mitigation Program funds for the Fair Heritage Arena HVAC upgrades and BAS in the amount of \$65,793.00.
