

**STATE OF WYOMING**  
**DEPARTMENT OF ENVIRONMENTAL QUALITY**  
**UNDERGROUND INJECTION CONTROL PERMIT ISSUED UNDER**  
**WYOMING WATER QUALITY RULES**  
**CHAPTER 27**

**DRAFT Permit No. UIC-2024-0114 v1.0**

**Wilson Homestead Trust - Class V (5E3) Domestic Subsurface Fluid Distribution System**

In compliance with the Wyoming Environmental Quality Act (Wyoming Statutes (Wyo. Stat.) §§ 35-11-101 through 1104, specifically 301(a)(i) through 301 (a)(iv), Laws 1973, Chapter 250, Section 1) and Wyoming Water Quality Rules (WWQR), Chapter 27,

Wilson Homestead Trust  
140 Alta North Road  
Alta, Wyoming 83414

is hereby authorized, contingent upon permit conditions, to operate a Class V 5E3 facility (Facility No. WYS-039-0255) to inject into the Teton Creek unconfined alluvial aquifer at the Wilson Homestead Trust Leachfield. The injection facility, located in Teton County, Wyoming, consists of one (1) leachfield and is authorized to inject 2,800 gallons per day (gpd) maximum and 1,680 gpd average, primary treated domestic wastewater into the Teton Creek unconfined alluvial aquifer. The location of the leachfield is identified in Table 1. A general location map is included in the permit application. Operation of the wells shall not exceed the specified limits for volume as stated in this permit and shall not exceed a total of ten (10) years.

## **I. GENERAL PERMIT CONDITIONS**

### **A. EFFECT OF PERMIT**

Any underground injection activity not specifically authorized in this permit is prohibited. The Permittee must comply with all applicable provisions of the Safe Drinking Water Act (SDWA) and 40 Code of Federal Regulations (CFR) §§ 124, 144, 145, and 146. Such compliance does not constitute a defense to any action brought under Section 1431 of the SDWA, 42 United States Code § 300(i), or any other common law, statute, or regulation other than Part C of the SDWA. Issuance of this permit does not convey property rights (WWQR Chapter 27, Section 6(h)(iii)(G)) of any sort or any exclusive privilege, nor does it authorize any injury to persons or property, any invasion of other private rights, or any

infringement of state or local law or regulations. Nothing in this permit shall be construed to relieve the Permittee of any duties under all applicable laws or regulations.

## **B. SEVERABILITY**

The provisions of this permit are severable, and if any provision of the permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected.

## **C. CONFIDENTIALITY**

In accordance with 40 CFR Part 2 and § 144.5, and the W.S. § 16-4-203(d)(v), any information submitted to WDEQ pursuant to this permit may be claimed as confidential by the submitter. Any such claim must be asserted at the time of submission by stamping the words “confidential business information” on each page containing such information. If no claim is made at the time of submission, WDEQ may make the information available to the public without further notice. If a claim is asserted, the validity of the claim will be assessed and processed in accordance with the provisions of the Wyoming Public Records Act, Wyo. Stat. §§ 16-4-201 through 205. Claims of confidentiality for the following information will be denied:

- 1) Name and address of the Permittee, or
- 2) Information dealing with the existence, absence, or level of contaminants in drinking water.

## **D. CONDITIONS APPLICABLE TO ALL UNDERGROUND INJECTION CONTROL (UIC) PERMITS**

The following conditions are required for all UIC permits. Specific requirements for implementing these conditions are included in Part II of this permit as necessary.

- 1) The conditions in this permit supersede any application content (WWQR Chapter 27, Section 20(a)(i)).
- 2) Permit Duration: This permit is authorized for a period of no more than ten (10) years in accordance with WWQR Chapter 27, Section 6(b). Under this permit, the WDEQ may consider injection after the authorization period a violation of the permit if the Permittee has not submitted a timely application for permit renewal.

- 3) Duty to Comply: The Permittee shall comply with all applicable WWQR and all conditions of this permit. Any permit noncompliance constitutes a violation of WWQR Chapter 27 and is grounds for enforcement action, permit termination, revocation, or modification.
- 4) Duty to Reapply: If the Permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the Permittee must submit a complete application for a new permit at least one hundred and eighty (180) days before this permit expires.
- 5) Need to Halt or Reduce Activity Not a Defense: It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit (WWQR Chapter 27, Section 6 (h)(iii)(C)).
- 6) Duty to Mitigate: The Permittee shall take all reasonable steps to minimize or correct any adverse impact on the environment resulting from noncompliance with this permit (WWQR Chapter 27, Section 6(h)(iii)(D)).
- 7) Proper Operation and Maintenance: The Permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the Permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance include effective performance, adequate funding, adequate Permittee staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of this permit (WWQR Chapter 27, Section 6(h)(iii)(E)). The Permittee is alone responsible for the operation of the facility covered by this permit. Operation of this facility by another entity is a violation of this permit unless a transfer of this permit has first been approved by the Director as outlined in WWQR Chapter 27.
- 8) Property Rights: This permit does not convey any property rights or any exclusive privileges (WWQR Chapter 27, Section 6 (h)(iii)(G)). This permit does not authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.
- 9) The filing of a request by the Permittee, or at the instigation of the Administrator, for permit modification, revocation, or termination, or the notification of planned changes or anticipated noncompliance shall not stay any condition of this permit (WWQR Chapter 27, Section 6(h)(iii)(F)). After notice and opportunity for a hearing, the Administrator may modify or revoke a permit, in whole or in part, during its term for cause.

10) Duty to Provide Information: The Permittee shall furnish the Administrator within a reasonable time, any information that the Administrator may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit (WWQR Chapter 27, Section 6(h)(iii)(H)). The Permittee shall furnish the Administrator, upon request, copies of records required to be kept by this permit (WWQR Chapter 27, Section 6 (h)(iii)(H)).

11) Inspection and Entry: The Permittee shall allow WDEQ personnel and their invitees to enter the premises where the facility is located, or where records are kept under the conditions of this permit, and collect resource data as defined by Wyo. Stat. § 6-3-414, inspect and photograph the facility, collect samples for analysis, review records, and perform any other function authorized by law or regulation (WWQR Chapter 27, Section 6(h)(iii)(I)).

- a) The Permittee shall secure and maintain such access for the duration of the permit.
- b) If the facility is located on property not owned by the Permittee, the Permittee shall also secure and maintain from the landowner upon whose property the facility is located permission for WDEQ personnel and their invitees to enter the premises where a regulated facility is located, or where records are kept under the conditions of this permit, and collect resource data as defined by Wyo. Stat. § 6-3-414, to inspect and photograph the facility, collect samples for analysis, review records, and perform any other function authorized by law. The Permittee shall secure and maintain such access for the duration of the permit.
- c) If the facility cannot be directly accessed using public roads, the Permittee shall also secure and maintain permission for WDEQ personnel and their invitees to enter and cross all properties necessary to access the facility. The Permittee shall secure and maintain such access for the duration of the permit.
- d) The Permittee shall maintain in its records documentation that demonstrates that the Permittee has secured permission for WDEQ personnel and their invitees to access the permitted facility, including:
  - i. Permission to access the land where the facility is located,
  - ii. Permission to collect resource data as defined by Wyo. Stat. § 6-3-414, and
  - iii. Permission to enter and cross all properties necessary to access the facility if the facility cannot be directly accessed from a public road.

- e) The Permittee shall also maintain in its records a current map of the access route(s) to the facility and contact information for the owners or agents of all properties that must be crossed to access the facility. The Permittee shall ensure that the documentation, map, and contact information are current at all times. The Permittee shall provide the documentation, map, and contact information to WDEQ personnel upon request. On closure of a facility, the Permittee shall maintain such records for a period of three (3) years.
  - f) Inspectors shall not be required by the Permittee to sign any waiver of liability.
  - g) For a new injection well/facility authorized by an individual permit, an injection may not commence until construction is complete and a post construction inspection is completed in accordance with Part I, Section D.21.
- 12) The Permittee shall furnish any information necessary to establish a monitoring program pursuant to WWQR Chapter 27 Section 15.
- 13) All samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity, and records of all monitoring information be retained by the permittee. The monitoring information to be retained shall be that information stipulated in the monitoring program established pursuant to the criteria of WWQR Chapter 27 Section 15.
- 14) Monitoring results shall be obtained and reported at the intervals specified in Table 3 of this permit (WWQR Chapter 27, Section 6(h)(iii)(P)).
- 15) Compliance Schedules: Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted to WDEQ no later than thirty (30) days following each schedule date.
- 16) Endangering Noncompliance: Confirmed noncompliance resulting in migration of injected fluid outside the discharge zone shall be reported orally to the Administrator at (307) 777-7781 within twenty-four (24) hours from the time the Permittee becomes aware of the circumstances and a written report shall be provided within five (5) days. The written submission shall contain:
- a) A description of the noncompliance and its cause;
  - b) The period of noncompliance, including exact dates and times, and if the noncompliance has not been controlled, the anticipated time it is expected to continue; and
  - c) Steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

- 17) The Permittee shall submit a written report to the Administrator of all remedial work concerning the failure of equipment or operational procedures which resulted in a violation of a permit condition, at the completion of the remedial work (WWQR Chapter 27, Section 8(c)).
- 18) For any aborted or curtailed operation, in lieu of a final report, a complete report shall be submitted within 30 days of complete termination of the discharge or associated activity (WWQR Chapter 27, Section 8(d)).
- 19) The permittee shall report all instances of noncompliance not already required to be reported under Sections D.14 through 16 of this Part, at the time monitoring reports are submitted. The reports shall contain the information listed in D.16 of this Part.
- 20) If the Permittee becomes aware that it failed to submit all relevant facts in the permit application or submitted incorrect information in the permit application or in any report to WDEQ, the Permittee shall promptly submit such facts or information.
- 21) Requirements Prior to Commencing Injection: Injection activities may not commence
- a) Until construction activities are complete.
  - b) The facility must meet construction requirements outlined in WWQR Chapter 27 Section 13.
  - c) The permittee has submitted a notice of completion of construction to the administrator, and
  - d) Either of the following:
    - i. The Administrator has inspected or otherwise reviewed the new injection well and finds it is in compliance with the conditions of the permit; or
    - ii. The permittee has not received a notice from the Administrator of intent to inspect or otherwise review the new injection well within fourteen (14) days of the date of the notice in Part I of this permit, in which case prior inspection or review is waived and the permittee may commence injection. The Administrator shall include in his or her notice a reasonable time in which to inspect the well.
- 22) The Permittee shall ensure that all activities and habitat disturbances related to injection well(s) authorized by this permit comply with stipulations under the Governor's Executive Order 2019-3 on Greater Sage-Grouse Core Area Protection and are conducted in accordance with Wyoming Game

and Fish Department, Wildlife Environmental Review recommendations to protect sage-grouse habitat.

23) The Permittee shall ensure that all activities and habitat disturbances related to injection well(s) authorized by this permit comply with stipulations under the Governor's Executive Order 2020-1 on Mule Deer and Antelope Migration Corridor Protection and are conducted in accordance with practices and stipulations specified by the Wyoming Game and Fish Department.

24) Certifications: All applications, reports, and other information submitted to the administrator shall contain the following certification

*“I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for known violations.”*

25) Signatory Authority: All applications, reports, and other information submitted to the administrator shall be signed by a person who meets the requirements to sign permit applications in WWQR Chapter 27 Section 6(f)(xiv), or for routine reports, a duly authorized representative.

26) The Permittee shall report any changes to physical or mailing address, phone, or email, and any changes of the duly authorized representative to Water Quality Division (WQD) within one (1) month of the change.

27) All applications, reports, and other information submitted to the administrator shall be in a format approved by the administrator. Submittals may be completed electronically to the ‘Electronics Documents Submittal’ link located at <https://deq.wyoming.gov/water-quality/groundwater/>. If a hard copy is to be submitted, submittals may be sent to:

Wyoming Department of Environmental Quality – Water Quality Division

Attn: UIC Program

200 West 17<sup>th</sup> Street

Cheyenne, WY 82002

28) Planned Changes: The Permittee shall give notice to WDEQ as soon as possible of any planned physical alterations or additions to the permitted facility (WWQR Chapter 27, Section 6(h)(iii)(M)).

The Permittee shall give advance notice to WDEQ, as soon as possible, of any planned physical alterations or additions to the permitted leachfields. Any change in well construction requires prior approval by WDEQ and may require a permit modification under the requirements of WWQR Chapter 27, Section 7(d)(vii). Proposed changes and additions will require a modification application to be submitted to WDEQ for review and approval.

- 29) Any modification which may result in a violation of any permit condition shall be reported to the Administrator through the submission of a new or amended permit application and shall not be implemented until a new or modified permit has been issued (WWQR Chapter 27, Section 6(h)(iii)(N)). Any change in well construction requires prior approval by WDEQ and may require a permit modification under the requirements of WWQR Chapter 27, Section 7(d)(vii). Proposed changes and additions will require a modification application to be submitted to WDEQ for review and approval.
- 30) Permit Transfer: Any transfer of this permit must first be approved by the administrator, and that no transfer will be approved if the facility is not in compliance with the existing permit unless the proposed permittee agrees to bring the facility into compliance (WWQR Chapter 27, Section 7(d)(xv)).
- 31) Notification prior to Conversion or Abandonment: The permittee shall notify the administrator at such time as the permit required before conversion or abandonment of the well or in the case of area permits before closure of the project.
- 32) Plugging and Abandonment (P&A) Requirements: The Class V injection well(s) covered by this permit shall be abandoned in accordance with WWQR Chapter 27, Section 18. Septic tanks and other holding structures associated with the Class V injection well(s) shall be abandoned in accordance with WWQR Chapter 25, Section 10(f).
- 33) The Permittee shall submit a P&A report within thirty (30) days after the abandonment of any injection point(s) covered by this permit, detailing the compliance with the abandonment procedures outlined in the original plan (WWQR Chapter 27, Section 6(h)(iii)(W)).
- 34) Penalties for Violating Permit Conditions: Any person who violates a permit requirement is subject to civil penalties, fines, and other enforcement action. Any person who willfully violates a permit condition may be subject to criminal prosecution.

## **E. PROHIBITIONS**

- 1) No person shall

- a) Conduct any authorized injection activity in a manner that results in a violation of any permit condition or representations made in the application (WWQR Chapter 27, Section 20(a)(i)).
  - b) Construct, install, modify, or improve an authorized injection facility except in compliance with the permit requirements.
- 2) Pumping domestic sewage out of any Class V facility for any use other than disposal to an approved facility is prohibited (WWQR Chapter 27, Section 20(d)(xii)).
  - 3) Injection of any hazardous waste as defined in WWQR Chapter 27 Section 2(y), whether hazardous by listing or by characteristic is prohibited.”

## **II.SPECIFIC PERMIT CONDITIONS**

### **A. GROUNDWATER CLASSIFICATION**

- a) The groundwater in the Teton Creek unconfined alluvial aquifer is classified as Class I by use according to WWQR, Chapter 8. This classification is made due to:
  - i. The groundwater in this formation is currently being used for domestic purposes at nearby points of withdrawal.
  - ii. Groundwater exhibits concentrations less than WWQR, Chapter 8 Table 1 standards for Class I groundwater for analyzed constituents in samples collected from a well on the facility.
- b) Groundwater of Class I shall not be degraded to make it unusable as a source of water for its intended use.

### **B. OPERATING, MONITORING AND REPORTING PLAN**

- 1) The operation of any Class V septic system with liquid waste visible on the ground surface shall be considered a failure of the system and a violation of these regulations (WWQR Chapter 27, Section 20(d)(x)).
- 2) No person shall discharge to any zone except the authorized discharge zone as described in this permit (WWQR Chapter 27, Section 20(d)(i)).
- 3) Operating Requirements

- a) Wilson Homestead Trust Leachfield is located at 140 Alta North Road, Alta, Wyoming 83414. The location of the leachfield authorized under this permit is presented in Table 1.

**Table 1 Leachfield Location**

Well Name	Public Land Survey System	Latitude	Longitude
Leachfield 1	SE ¼ SE ¼ of Section 18, T44N, R118W	43.756493	-111.024515

*Note: Latitude and Longitude reference World Geodetic System 84*

- b) The Permittee is authorized to inject 2,800 gpd maximum and 1,680 gpd average of domestic wastewater into one (1) leachfield. The wastewater is produced from a wedding venue with a maximum capacity of 200 guests (Table 2).

**Table 2 Septic System**

Description	Treated Wastewater Effluent Inputs	Leachfields	Maximum Discharge (gpd)	Average Discharge (calculated as 60% of Maximum) (gpd)
Wilson Homestead Trust Leachfield	Wedding venue with maximum capacity of 200 guests	1	2,800	1,680
<b>Totals:</b>		<b>1</b>	<b>2,800</b>	<b>1,680</b>

- c) The Permittee is authorized to inject at a pressure of no more than atmospheric pressure as measured at the leachfields, the pressure-controlled gravity drainage is not required to be monitored.
- d) The Permittee is required to operate in accordance with statements, representations, and procedures presented in the complete permit application and supporting documents as accepted and approved by the administrator. If such procedures conflict with those in this permit, the conditions in this permit shall take precedence.
- e) The permittee shall operate and maintain all facilities and systems of treatment and control which are installed or used by the permittee to achieve compliance with the conditions of the permit. Proper operation and maintenance include

- i. effective performance,
- ii. adequate funding,
- iii. operator staffing and training, and
- iv. laboratory and process controls, including appropriate quality assurance procedures.
- v. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of the permit. The injection wells covered by this permit shall meet all construction requirements outlined in WWQR, Chapters 11, 25 and 27.
- f) Permitted Wastes: This permit allows the injection of domestic wastewater through one (1) leachfield. Domestic wastewater is defined as a combination of the liquid or water-carried wastes from residences, business buildings, institutions, and other establishments arising from normal living activities (WWQR Chapter 25, Section 4(l)). This includes wastewater from activities such as showers, toilets, human wash basins, food preparation, clothes washing, and dishwashers (WWQR Chapter 27, Section 2(o)).

## **C. ENVIRONMENTAL MONITORING PROGRAM**

- 1) The operator is responsible for properly installing, operating, maintaining, and removing all necessary monitoring equipment.
- 2) The operator shall develop and follow a written waste analysis plan that describes the procedures to be carried out to obtain detailed chemical and physical analyses of a representative sample of the waste, including quality assurance procedures to be used. Once approved by the department, the operator shall not deviate from the plan without filing an amended plan and obtaining department approval for that amended plan.
- 3) The environmental monitoring program required under this permit consists of:
  - a) Groundwater from the monitor well shall be monitored.
    - i. Sampling for constituents listed in Table 3 shall be conducted semi-annually at the monitoring well and reported annually.

- ii. The analytical results for the groundwater samples shall be submitted within thirty (30) days of the last day of the period (January 31<sup>st</sup>).
- b) The injection volume total shall be recorded
  - i. Maximum daily injection volume, taken as the highest daily volume of monthly meter readings.
  - ii. The total volume for each month.
  - iii. The annual reports are to be reported within thirty (30) days of the last day of each period (January 31<sup>st</sup>).
  - iv. Annual reporting for the monthly total injection volume may only be suspended with Administrator approval.
- 4) The Permittee shall retain the following records and shall have them available at all times for examination by WDEQ personnel, in accordance with the following:
  - a) All monitoring information, including required observations, calibration and maintenance records, flow data, copies of all reports required by this permit, and records of all data used to complete the permit application.
  - b) Records and results of any other tests required by WDEQ, and any well or system maintenance completed.
  - c) Information in a and b above shall be retained for a period of three (3) years after closure of the facility at which time the Permittee shall notify the Administrator and either deliver the records to WDEQ or discard them as directed by the Administrator (WWQR Chapter 27, Section 8(h)).
- 5) Records of monitoring activity required under this permit shall include:
  - a) Date, exact location, and time of sampling or field measurements;
  - b) Name(s) of individual(s) who performed sampling or measuring;
  - c) The types of sample containers used, methods of preservation, and holding times;
  - d) Date(s) laboratory analyses were performed;
  - e) Name(s) of individual(s) who performed laboratory analyses;
  - f) The analytical techniques or methods used;

- g) Results and precision of such analyses; and
- h) Chain of Custody forms.

**REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK**

DRAFT

**Table 3 Monitoring Schedule**

FREQUENCY	SYSTEM	PARAMETER ANALYZED	EPA METHOD	STANDARD METHOD	PERMIT LIMIT <sup>1,2</sup>	HOLD TIME & TEMPERATURE
Semi-annual samples collected (January-June, and July-December) and reported annually within 30 days of the end of the period (January 31 <sup>st</sup> ) <sup>3</sup>	Monitor Well 1	Ammonia as N	350.1	4500–NH3	0.50 mg/L	28 days/4 degrees Celsius (°C)
		Chloride	300.0 or 300.1	4110 B, 4140 B, or 4500-Cl	250 mg/L	28 days/no specified temperature
		Nitrate as N	353.2	4500-NO3	10 mg/L	48 hours/4°C
		pH (standard units: s.u.)	150.1 or 150.2	4500-H+B	6.5-8.5 S.U.	Measure as soon as possible (field parameter)
		Sulfate	300.0 or 300.1	--	250 mg/L	28 days/unpreserved and on ice
		Total Phosphorus	USGS WRIR03-4174	4500-P E	0.01 mg/L	28 days, add H <sub>2</sub> SO <sub>4</sub> to pH ≤ 2, on ice
		Ortho Phosphorus	--	4500-P E	0.01 mg/L	48 hours/unpreserved and on ice
		Water Levels	--	Steel tape or electronic	--	--
Injection Volume and Septic System Inspection						
Daily Recording	Leachfields	Daily Volume Injected		Flow Meter Reading	2,800 gpd	
Monthly Reporting		Maximum Daily Volume (report highest daily volume for the month)			2,800 gpd	
					86,800 gallons (2,800 maximum gallons x 31 days) <sup>4</sup>	
Annually	Main Septic Tanks <sup>5</sup>	Sludge depth in the tank		Visually	2 feet	

<sup>1</sup> All applicable chemical concentrations in this permit are expressed as total (not dissolved) in milligrams per liter (mg/L) unless otherwise noted.

<sup>2</sup> The Permit Limit cannot be exceeded in any sample. Exceedance of these values is a violation of this permit and shall require notification of the WDEQ. If the Permit Limit is exceeded in a sample, additional monitoring wells may be required to determine whether groundwater has been impacted and to delineate the nature and extent of any contamination resulting from the operation of the permitted facility.

<sup>3</sup> A minimum of three (3) months should occur between sampling events.

<sup>4</sup> The flow limit is to be reported as the combined flow discharged into the leachfield. The combined discharge into the leachfield must not exceed the permit limits in the table above.

<sup>5</sup> The main septic tank(s) serving the Wilson Homestead Trust are to be inspected, at a minimum, annually and must be pumped as necessary based on sludge depth at bottom of the septic tank/grease trap, at least once every five years. A copy of the invoice for pumping the septic tanks/grease trap is to be included with the annual report. Sludge depth is not to exceed 24 inches in the septic tanks.

#### **D. REPORTING REQUIREMENTS**

- 1) The Permittee shall submit, in accordance with the required schedule, accurate reports to WDEQ containing, at a minimum, the following information:

An annual report shall be submitted to the Administrator no later than thirty (30) days after the end of the previous reporting period. The results shall be submitted online at <https://deq.wyoming.gov/water-quality/groundwater> under the link 'Electronic Documents Submittal.' The written report for each well shall include the following information:

- a) Analytical data collected for Part II, Section C(3) of this permit.
  - b) Total volume data collected for Part II, Section C(3) of this permit.
- 2) A narrative description of any non-compliance that occurred during the reporting period.
  - 3) Any monitoring or other information that indicates that any contaminant may cause an endangerment to a useable groundwater of the state.
  - 4) Any noncompliance with a permit condition or malfunction of the discharge (injection) system which may cause fluid migration into or between useable groundwaters of the state.
  - 5) The Permittee shall report all instances of noncompliance not reported otherwise, at the time monitoring reports are submitted.
  - 6) Reports as specified, shall be submitted within thirty (30) days of the end of the reporting period.

**REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK**

This permit consists of sixteen (16) pages and is based upon representation made by the Wilson Homestead Trust through their application and subsequent information submitted and recorded in the Administrative Records Index. It is the responsibility of the Permittee to read, understand, and comply with all terms and conditions of this permit. This permit and the authorization to construct and inject are issued for a period of ten (10) years unless terminated under the conditions set forth in WWQR Chapter 27, Section 7(d). This permit is issued and becomes effective on the date signed by the Director.
