COLOR & TYPE GUIDE

We strongly suggest that a high-end page layout program be used for file creation.

PRINTING COLORS

We do not support Pantone or RGB colors. These colors will be converted to CMYK.

DESIGNING WITH BLACK TEXT

Avoid using 4 colors to produce a 'rich' black. Color shifts can create unwanted hues and misregistration of type in newspaper print.

TYPE STYLE & USAGE

For clarity and readability, 10 point type or larger is recommended in newspaper advertising design. Type smaller than 8 point is not recommended as readability is compromised. If color text is used, font size should be greater than 13 points.

REVERSE TYPE

Type reversed out of color areas should be a minimum of 10 points. This allows for maximum readability.
