

MAINTENANCE ELECTRICIAN

Mersen, a world leader in the manufacture of isostatic graphite, has an immediate opening for a Maintenance Electrician at its St. Marys, PA facility. Qualified candidate will be a Journeyman Electrician or individual with experience or education in industrial power distribution, motor control, control circuitry and computer based process control instruments. Two to three years electrical maintenance experience in an industrial manufacturing environment required. Post-secondary education in electrical technology preferred.

Interested and qualified candidates may apply in confidence by sending a copy of their resume to:
brian.miller@i.mersen.com

Successful candidate must be legally eligible to work in the U.S. under the Immigration Reform Control Act, and must pass a pre-employment physical including a hair test drug screen prior to employment. Mersen is an Equal Opportunity Employer Minority/Female/Disabled/Veteran.
