JAGUAR'S NEW ELECTRIC CAT!

FEATURES

- Electric Motor | Electric Fuel System
- All Wheel Drive
- Panoramic Roof
- HD Radio | MP3 Player | Smart Device
- WiFi
- Bluetooth
- Brake Assist
- Parking Assist
- Rear View Camera
- Touchscreen Technology

Jaguar is here to introduce their first fully electric performance SUV, the 2019 Jaguar I-Pace, coming late 2018. Implemented with 2 197-horsepower electric motors (one installed at the front axel, the other at the rear) and all-wheel drive, the I-Pace

delivers on their signature performance, giving the acceleration of a sports car and reaching 60 mph in 4.5 seconds.

The estimated range on a full charge is up to 234 miles. In public charging the I-Pace, you can achieve a 0-80% charge in 85 minutes through a 50 kW DC rapid charger, or achieve a similar charge in 45 minutes through a 100 kW DC charge rate. For home charging purposes, it's stated that with a 230-volt Level 2 charger it takes about 12.9 hours to fully charge the battery to 100%. You also have the option to charge directly through a domestic socket, though it is slower than a home charger.

The exterior is designed as a traditional SUV with a sporty aesthetic. Built with

aerodynamics and a low 0.29 coefficient of drag for a longer driving range.

The interior is clean and spacious providing a luxurious and comfortable atmosphere for up to 5 passengers. Comforting seats with soft leather, and panoramic glass roof for cabin light and an airy atmosphere. Pre-condition your vehicle to your desired temperature with the smartphone app. The I-Pace includes touchscreen technology, all-around view camera, Meridian sound system, WiFi, and bluetooth. The I-Pace also includes smart navigation that accurately calculates how much charge is left in your vehicle in correlation to your route, as well as telling you various recharge stations on your route.

2019 GMC SIERRA

Photo courtesy of media.gmc.com

Photo courtesy of media.gmc.com

Photo courtesy of www.gmc.com

"SIERRA'S INDUSTRY-FIRST MULTIPRO TAILGATE."

FEATURES

- New Redesigned
- MultiPro Tailgate
(6 Tailgate Functions and Positions)
- CarbonPro Carbon Fiber
(Increased Cargo Box Durability)
- Touchscreen Technology
- Display Tracking Vehicle Vital Stats
- Rear View Camera
- Latest GMC Software
- Electronic Parking Brake Button
- 360 Pounds Lighter Than Previous Model

THE SIERRA'S TAILGATE OFFERS 6 FUNCTIONALITIES AND POSITIONS FOR ENHANCED LOADING, AS WELL AS A STAIRWAY FOR ACCESS TO THE CARGO BED.

GMC introduces their newest 2019 Sierra 1500, redesigned from the ground up and is larger than ever. Providing a longer wheelbase, and a longer crew cab body that offers more rear legroom than their previous model.

With this new redesign, GMC incorporates their newest feature in engineering prowess, the MultiPro Tailgate. Using the key fob, the Sierra's tailgate offers 6 functionalities and positions for enhanced loading, as well as a stairway for access to the cargo bed.

The new redesign is not only bigger than the previous model, this design also reduces front end overhang, and is 360 pounds lighter than its predecessor with mixed materials including aluminum for the doors, hood, and tailgate, with steel for the fenders, roof and standard cargo box. The fully boxed steel frame, is also 88 pounds lighter with 10% greater torsional rigidity.

As a GMC exclusive, the Sierra's cargo box is equipped with the industry-first

CarbonPro carbon fiber for increased durability, efficiency and functionality, and resistance to dents, scratches, and corrosion.

The brake system has been improved with electro-hydraulic power assist, larger diameter Duralife brake rotors and larger brake pads. Features include an electronic parking brake that can be activated and deactivated with the single press of a button.

Operate the Sierra with assurance and more perspective utilizing the segment first rear camera mirror. Eliminate obstructions from the rear field of view with the camera screen function or use it as a traditional mirror.

2019 FORD EDGE ST

Photo courtesy of media.ford.com

Photo courtesy of media.ford.com

Photo courtesy of www.ford.com

“THE FIRST SUV FROM THE FORD PERFORMANCE TEAM.”

FEATURES

- Seats 5
- EcoBoost® Engine
- AM/FM Stereo with 6 Speakers
- SiriusXM® with 6 Month Trial Subscription
- BLIS® (Blind Spot Information System) With Cross-Traffic Alert
- Rain Sensing Windshield Wipers
- Auto High Beams
- Lane Keeping System
- Intelligent Access with Push Button Start
- Adaptive Cruise Control
- Sport Mode

The Ford performance team is here to introduce their first ever SUV, “a thrill ride with the brains to match.” This latest model introduces new all wheel drive disconnect, a first for Ford systems that help improve traction and reduce gas usage over the previous model. This feature is smart enough to

detect various driving conditions and automatically shift between two-wheel and all-wheel drive. This system uses its new electronic brain receives dozens of sensors including its interaction with the traction control system to detect wheel slip, detecting if the anti-lock brakes are active, detects if the windshield wipers are on, whether it's towing a trailer, and outside temperatures.

Utilizing an algorithm known as “fuzzy logic”, processing data to determine if all-wheel or front-wheel are optimal. When constantly monitoring, the system can detect in milliseconds the need to engage or disengage all-wheel drive.

With more tech, and equipped with a V6 EcoBoost® engine, the Ford Edge ST can burn less fuel. Its fuel saving features include:

- **New 8-speed automatic transmission** introduces two overdrive gears, which

decrease engine rpm for improved fuel economy during highway cruising.

- **Active transmission warm-up** uses reclaimed heat energy to warm up the transmission faster. This, along with a durable, synthetic, ultra-low-viscosity fluid – engineered specifically for the new Edge – reduces component friction and helps save fuel.

- **Standard Auto Start-Stop** helps save fuel by shutting off the engine when the vehicle comes to a stop and automatically restarts when the driver releases the brake pedal.

- **Deceleration fuel shut-off** stops fuel flow to the engine when the vehicle is reducing speed.

- **Exhaust gas recirculation** not only reduces harmful emissions, but increases efficiency by allowing a larger throttle position, thereby reducing pumping losses.

2019 CHEVROLET CORVETTE ZR1

Photo courtesy of media.chevrolet.com

Photo courtesy of media.chevrolet.com

Photo courtesy of media.chevrolet.com

A SUPERCAR WITH PERFORMANCE TO MATCH!

FEATURES

- LT5 6.2L V-8 Engine
- Dual-Fuel-Injection System
- 8in Touchscreen
- Apple CarPlay and Android Auto Smartphone Capabilities
- WiFi
- Keyless Open and Start
- Curb-View Cameras
- Rear-Vision Camera
- Bose 10-Speaker Audio System
- Tire Pressure Monitoring
- Performance Data Recorder

The 2019 Chevrolet Corvette ZR1 is a supercar with the most advanced technology and the highest performance in its legacy. The ZR1 is supercharged with a LT5 6.2L V-8 engine equipped with an intercooled supercharger system for efficiency, offering the highest output ever for a Chevrolet production vehicle.

The exterior features lightweight material, and equipped with stanchion mounted wings for confident handling and higher speeds for the quickest lap times. Also available is a two-way-adjustable High Wing that offers the maximum downforce for the ZR1's top speeds.

Building off of the previous Z06, the ZR1's LT5 engine boosts its power over the its previous model by more than 100 horsepower and 65 pound feet of torque. Equipped with a supercharger, 52% larger

than the Z06, and housed by the new ZR1 specific "halo" hood with an opening for the carbon-fiber-wrapped inter-cooler. This opening of the design shows off the engine allowing heat to extract, improving the ZR1's cooling capacity with a total of 13 heat extractors.

Enjoy a leisure experience at your convenience with ZR1's advance technology. Including a rear-vision and curb-view camera, Bose 10-speaker audio, and keyless open and start.

For a quieter driving experience the Drive Mode Selector provides Touring mode, reducing exhaust sound, lightening the steering, and softening the magnetic suspension.

DAILY HERALD
Better than ever!

2019 HYUNDAI SANTA FE

A BOLD NEW LOOK TO CARRY OUT THE HYUNDAI LEGACY

FEATURES

- Bolder Design
- New Safety, Comfort, and Convenience Technologies
- Increased Visibility, Cabin, and Storage Space
- 8-Speed Automatic Transmission
- Smart Sense Technologies
- Touchscreen Technology
- Rear Cross-Traffic Collision-Avoidance Assist (RCCA)
- Safe Exit Assist System
- Electronic Child Safety Lock
- Enhanced Cabin Space
- More Cargo Space
- Hyundai's HTRAC® All-Wheel-Drive (AWD) system
- Apple CarPlay™ and Android Auto Smartphone Capabilities
- BLUE LINK® Connected Car System

The new 2019 Santa Fe continues Hyundai's strong legacy SUV heritage the fourth generation 2019 model. Offering an all-new family-oriented interior, loaded with practical cutting-edge technologies and a bold new exterior.

The new Santa Fe sports Hyundai's signature Cascading Grille and a Composite Light Design. Characterized by a powerful wide stance, the Santa Fe features a dynamic character line that connects from the headlights to the taillights. It further communicates its strength with diamond-cut 19in wheels.

The interior is designed with premium quality and a roomy layout to make for a spacious and luxurious cabin, with more elbow room and legroom than the previous model. To help improve ride

comfort, key developments were implemented into the suspension geometry, with one of biggest changes being the rear shock adjusted to improve the ride and handling in any driving condition.

The Santa Fe includes Hyundai Smart Sense Technologies such as, High Beam Assist, Forward Collision Avoidance Assist, Blind Spot Collision Avoidance Assist, Safe Exit Assist, Lane Keeping Assist, Smart Cruise Control with Stop & Go, Rear View Monitor with Parking Guidance, and much more!

The 2019 Santa Fe also features Hyundai's first standard Safe Exit Assist system. To enhance the safety of passengers, the Safe Exit Assist uses a radar detecting cars from the rear and cautions passengers when exiting the vehicle. If a car is approaching while a passenger is exiting the vehicle, the car will provide a visual and acoustic warning. It also serves as a great safety measure for children when using the Electronic Child Safety Lock, ensuring the rear doors remain locked while a another car is approaching, and only unlocking when the roads are clear.

Featured on this vehicle is Hyundai's HTRAC® All-Wheel-Drive (AWD) system. A multi-mode system that provides torque control between the front and rear axles. Select between HTRAC Normal, Sport, and Smart modes to provide confident control in all weather conditions.

2019 VOLKSWAGEN BEETLE FINAL EDITION

Photo courtesy of media.vw.com

Photo courtesy of media.vw.com

VOLKSWAGEN'S FAREWELL TO THE BEETLE

FEATURES

- Available in Coupe and Convertible Body Styles
- Available in 2 Unique Editions, SE and SEL
- Front-Wheel-Drive
- 4-Passenger
- 6-Speed Automatic With manual shifting mode
- KESSY® Keyless Access with Push-Button Start
- Climatronic® Automatic Climate Control
- Sunroof on Coup Models
- 2.0 liter TSI® Engine with 174 Horsepower and 184 lb-ft of Torque
- Touchscreen Technology
- Bluetooth
- USB Ports
- Driver-Assistance Technology

On September 13, 2018, Volkswagen of America, Inc. announced that the production of the iconic Beetle will be ending in 2019. 7 decades after it first appeared in the United States in 1949. And to celebrate the rich heritage of this vehicle, two special models have been announced - the Final Edition SE and the Final Edition SEL.

"The loss of the Beetle after three generations, over nearly seven decades, will

evoke a host of emotions from the Beetle's many devoted fans," said Hinrich J. Woebcken, President and CEO, Volkswagen Group of America, Inc.

"As we move to being a full-line, family-focused automaker in the U.S. and ramp up our electrification strategy with the MEB platform, there are no immediate plans to replace it. But as we have seen with the I.D. BUZZ—which is the modern and practical interpretation of the legendary Bus—I would also say, 'Never say never.' We're excited to kick off a year of celebrating one of the true icons of the automotive world, with a series of events that will culminate in the end of production in Puebla in July 2019."

The Beetle Final Edition is available in coupe and convertible body styles, and include exclusive equipment and unique decor to send the Beetle off in style. Both are powered by a 2.0 liter TSI® engine that puts out 174 horsepower and 184 lb-ft of torque. All models are paired with a six-speed automatic transmission.

Final Edition SE models feature a 6.3-inch capacitive touchscreen display, Bluetooth® for compatible devices, USB multimedia port, SiriusXM® radio (three-month trial subscription), Voice Control, and Volkswagen Car-Net® App-Connect

smartphone integration. Final Edition SEL models upgrade to Discover Media infotainment with navigation, Car-Net Security & Service, and Guide & Inform, as well as Fender® Premium Audio.

All Beetle Final Edition models offer driver-assistance technology. SE models include standard Blind Spot Monitor Rear Traffic Alert. Final Edition SEL models add standard front and rear Park Distance Control.
