Good Food Store Beverage Bar Temporarily Closes due to COVID-19

(Missoula, Montana, October 9, 2020) – Out of an abundance of caution, has temporarily closed beverage bar operations after two deli café employees tested positive for COVID-19. We are working collaboratively with the Missoula City-County Health Department (MCCHD) to identify other employees at the store who may have worked closely with the employees who tested positive. The Good Food Store management team has proactively started notifying and providing information to employees who may require testing or quarantining.

In addition to the Good Food Store's already stringent cleaning and sanitizing protocols, the beverage bar will undergo thorough and robust disinfection. Once we are confident the beverage bar can operate safely and staffing levels normalize, the beverage bar will reopen.

The Good Food Store will continue to require face-coverings and social distancing and will emphasize good hygiene for all employees and customers while in the store.
