

the Apple of Big Dreams™

COSMIC CRISP®

The Cosmic Crisp® brand apple varietal is the moonshot made real—the perfect balance of flavor and texture, the longest storage life, and a natural resistance to browning. The remarkable result of 20 years of study and research by Washington State University's world-class tree fruit breeding program, Cosmic Crisp® is the first branded apple to be named by consumers. "Cosmic" references the apple's starburst-like lenticels on the surface. "Crisp" links to its parent, the Honeycrisp.

AMAZING FLAVOR + INFINITE POSSIBILITIES™

BREEDING

Classically bred, Cosmic Crisp® is non-GMO and grown exclusively in Washington State

FLAVOR

Cultivated with naturally higher levels of acidity and sugar, this apple delivers a deliciously sweet flavor and a subtle tartness

TEXTURE

Consumers named it Cosmic CRISP® for good reason—one bite and you'll see why

COLOR

A rich red color that sparkles with the cosmic starbursts (technically called lenticels)

SIZE & SHAPE

These beauties are delightfully large and round

JUICINESS

So. Very. Juicy!

Perfect for Snacking, Baking & Entertaining

Imagine the Possibilities™
