

Governor Walz and Lieutenant Governor Flanagan's

# 2024 Infrastructure Plan

Governor Walz and Lieutenant Governor Flanagan are proposing over \$980 million for projects that protect our drinking water, keep communities safe, maintain existing state facilities, and support safe housing.

## WATER AND TRANSPORTATION INFRASTRUCTURE

Our state's water and transportation systems protect Minnesotans' health and safety. The Governor and Lieutenant Governor's 2024 Infrastructure Plan invests **more than \$215 million in water and transportation infrastructure**, including more than \$119 million to support grants and low-interest loans to keep our water clean and replace lead pipes. The infrastructure plan includes \$28 million to establish new grant programs to help remove contaminants like PFAS from drinking water and \$2 million to develop a continuous nitrate monitoring network.

## PUBLIC SAFETY

Everyone in Minnesota deserves to be safe and protected. That's why Governor Walz and Lieutenant Governor Flanagan's 2024 Infrastructure Plan includes **more than \$142 million for public safety projects**, including expanding laboratory and investigatory capacity for the Bureau of Criminal Apprehension and planning for a Minnesota State Patrol headquarters. The plan also includes \$47 million to build the infrastructure needed to provide rehabilitative, programming, and educational space for incarcerated individuals.

## HOUSING AND ENVIRONMENT

Every Minnesotan deserves access to a safe and affordable place to call home and a healthy environment. Governor Walz and Lieutenant Governor Flanagan's 2024 Infrastructure Plan includes **more than \$97 million for housing and environment**, with more than half of that in Housing Infrastructure Bonds to develop multifamily housing for people facing homelessness, seniors, and families. The infrastructure plan also includes more than \$16 million to update the Minneapolis Veterans Home to better meet residents' needs.

## PRESERVE STATE INFRASTRUCTURE

Maintaining and renewing state facilities is an important part of a safe, healthy, and fiscally responsible state budget. That's why Governor Walz and Lieutenant Governor Flanagan's 2024 Infrastructure Plan includes **more than \$440 million to maintain and renew the buildings that taxpayers own and rely on every day**, including nearly \$206 million for Minnesota State and the University of Minnesota to repair and renovate buildings across the state.

## OTHER INFRASTRUCTURE

Governor Walz and Lieutenant Governor Flanagan's 2024 Infrastructure Plan includes **more than \$85 million for other infrastructure needs across the state**, including \$40 million for local government projects and \$5 million in grants to construct and renovate early childhood facilities and help ensure families have access to early childhood programs housed in safe facilities.
