

Priorities to Move Minnesota Forward

The Minnesota House of Representatives and Senate are ready to work hard, work together, and work quickly to deliver on Minnesotans' priorities, including:

Reproductive freedom

Put into state law the fundamental right to make reproductive health care decisions without interference from politicians.

Paid Family Leave and Earned Sick Time

Ensure that no Minnesotan is forced to choose between earning a paycheck and caring for a family member or themselves.

Climate and clean energy

Tackle the climate crisis and create good jobs by transitioning to 100% safe, clean, carbon-free sources of energy by 2040.

Prescription drugs

Prohibit big pharmaceutical companies from price gouging for life-saving medication like insulin, asthma inhalers, and EpiPens.

Early care and learning

Help families pay for childcare so parents can pursue employment or education, and make sure children are well cared for and prepared to enter school.

Public safety

Give law enforcement and communities the resources they need for safety, expedite criminal investigations, and prevent gun violence.

Education

Close funding shortfalls, expand access to mental health services, and eliminate student food insecurity.

Housing affordability

Grow homeownership and reduce the cost of housing for Minnesotans who rely on the private rental market.

Worker protections

Ensure workers are safe on the job and receive the wages and benefits they deserve and need to support themselves and their families.

Infrastructure

Leverage federal funding to improve roads, bridges, transit, broadband internet access, water treatment facilities, and lead pipe replacement.

Democracy

Improve access, increase participation, and close dark money campaign finance loopholes.

Health care

Establish MinnesotaCare Buy-In coverage and expand access to high-quality, affordable care.
