DARNELL RACING PRESENTS

AFTERSHOCK

"The World's Fastest Jet Fire Truck"

BOASTING TWIN JET ENGINES WITH 24,000 HORSEPOWER!

Darnell Racing presents our newest Jet Truck...

"AFTERSHOCK" - A Twin Jet Engine 1940 Ford Fire Truck

The World's Fastest Fire Truck with 2 Rolls Royce Viper Jet Engines making over 24,000 Horsepower.

AFTERSHOCK holds the World Record Speed of 407mph for Fire Trucks and can be seen in the Guinness Book of World Records.

Our other Jet Trucks include the World Famous SHOCKWAVE Triple Jet Engine Semi-Truck and the FLASH FIRE JET TRUCKS.

Also new for 2020 as part of our display at select Air Shows, we will feature our new **SHOCKWAVE Kids Bounce House**. This is 3x's the actual size of **SHOCKWAVE** - the kids will LOVE it!

Darnell Racing introduces the new 2020 Salute to the Military Design!
Military-Grade SHOCKWAVE JET TRUCK - TOP GUN EDITION.

Featuring the new fighter jet graphics, P-40 shark on the hood, A-10 Warthog Gatling Guns on both front fenders and a 50 cal. machine gun, *the new look is over the top!* The parachute tubes even look like hell-fire missiles!

But, make no mistake it's still the mighty **SHOCKWAVE**, just meaner and more awesome than ever.

By now, we are sure you've seen or witnessed our new **AFTERSHOCK JET FIRE TRUCK** with it's Twin Engines and it's tall **SHOCKWAVE** inspired Fire Breathing Exhaust Stacks. This beast is making big waves in the Air Show World.

If you aren't already on our 2020 Schedule, you should be! We have limited dates available.

Neal Darnell

Neal Darnell As driver/pilot of the Worlds Fastest Jet Powered Truck, Neal Darnell has been performing at Airshows for 10 years. With a long career producing various types of motorsport events Neal and wife Marilyn made the decision to turn over that business to son John in 1999. Neal then turned to Real Estate Development building a luxury subdivision in Springfield, Missouri but missing the adrenalin rush from the various types of racing he'd been involved in, it was time to jump back in. Always interested in Jet Engines, he thought why not put a military fighter jet engine in a Chevy Pickup Truck? With a little magic, a lot of money,

a little luck, and lots of hard work the Flash Fire Jet Truck was born. A Jet Truck with over 12,000 Horsepower and capable of speeds approaching 400 mph.

After licensing with NHRA and a short Drag Racing stint, Neal decided it was time to start performing at Airshows and soon he was developing a reputation racing and beating some very fast airplanes, even an F-16 in 2011 at Andrews AFB in D.C.

With over 20 years in the Show Promotion Business as the Producer of over 400 major events Neal understands the importance of Showmanship in everything he does.

In 2005 Neal set an Airshow Speed Record of 375 mph at Tyndall AFB in Florida. This record still stands today making Flash Fire " the World's Fastest Jet Powered Truck ".

In 2011 and 2012 Neal performed with the Air National Guard Max Adrenaline Air Show Team. Starting in 2013 he and son Chris will be sharing the driving duties of the Shockwave Jet Truck and the Flash Fire Jet Trucks.

Chris Darnell

Chris Darnell is the driver/pilot of the 2nd Flash Fire Jet Truck and the SHOCKWAVE Jet Truck. Chris has been involved in motorsports his entire life. He has many years of experience in the Motorsports Promotion business as well.

Chris has competed in many different types of racing over the years from drag racing to circle track and beyond. He has literally done it all.

Having experience on the production side of motor-sport events as well as a performer/competitor in motorsports goes a long way towards making each show a success.

Chris also has a Bachelor's degree in marketing/Advertising and Promotions from Missouri State University. Following in his father's footsteps, Chris is now driving the 2nd Flash Fire Jet Truck in the Darnell Racing Stables.

Besides driving one of the fastest trucks in the world on the air Show circuit, Chris also owns a truck accessory company called **4**

Wheel Customs. For the 2013 Season Chris will be sharing the driving duties with his dad Neal in both the Flash Fire Jet Truck and Shockwave.
