Community services

Natural Resources

LaGrange County is predominantly an agricultural community, with more than 70 percent of its land used for crops, pasture or hay. Cropland use varies throughout the county. Because the county has a large number of dairy operations and a large Amish population, much of the land is in hay or pasture. Corn, soybeans and wheat are the major crops. LaGrange County has a number of organic farms producing organic dairy products, chickens and eggs. LaGrange County also has more than 16,000 acres of woodlands and 15,000 acres of wetlands. The Pigeon River Fish and Wildlife Area, maintained by the Indiana Department of Natural Resources, provides more than 11,700 acres of land for fishing, hunting and other recreational activities. County, state and federal agencies are available to assist farmers and other landowners of the county.
