With somatic cell counts averaging 70,000 and earning milk quality awards through their co-op, we wanted to know what the Dauberts do to produce high quality milk. "We spray all fresh cows with Udder Comfort™ to get edema out when they calve in. We also use it on any mastitis, and we focus on cleanliness and strict milking protocols," says 4th generation dairyman Jared Daubert.

Jared grew up in central Pennsylvania, steeped in Brown Swiss genetics, earned his animal science degree at Penn State and worked for several large farms before he and Laura and their 4 children began milking 125 Brown Swiss, Holsteins and Red & Whites on their first-generation JA LA DA Dairy near Millmont, Pa. He loves seeing genetic improvement and seeing his kids grow up learning to take care of things.

"I have used Udder Comfort quite a long time, getting it on fresh cows as fast as we can, and on some pre-calving heifers. We see a lower mastitis incidence when we are consistent on this," he reports.

**UDDER COMFORT™**  
Quality Udders Make Quality Milk

**Her Comfort is Our Passion!**

Softer udders ⇨ Faster milking

Better quality ⇨ **MORE MILK**
