

Beat the Heat!

Heat tolerant summer annuals can help you mitigate heat and drought risk this summer!

Rapid Pro 77 DS — It's Fast!

—A medium-early BMR sorghum sudangrass with dry stalk for a quicker harvest with less moisture and spoilage. Multi-cut regrowth and high tonnage potential.

KF Fiber Pro 72 —It's Quality!

—A medium maturing BMR-6 sorghum with superior forage quality making it a strong choice for silage. Excellent standability, and high tonnage potential.

Dry Weather Tips:

Plant into moisture. If the seed zone is dry, delay the seeding. Seed to soil contact is essential. Pack soils before and after seeding. Use recommended seeding rates for your region.
