

Telescopic Cylinders

Akaliko

Akaliko digs deep for the customer & guarantees a performance that is unmatched by competitors.

Heavier wall thickness than any other cylinder.

- A new generation of cylinders with a thicker wall & stronger lifting capacity
- Stronger design with working pressures of 3080 PSI
- Superior chrome-plating technology on all stages improves corrosion resistance & stability throughout the cylinder's life cycle
- High-end gantry-type linear electroplating protects from corrosion & reinforces the cylinder tubing to ensure the highest performance possible
- World renowned seal brands such as Hallite®, Parker®, & NOK® ensures superior sealing performance
- High-quality alloy seamless steel tube materials with excellent mechanical properties
- Improved sealing structure to ensure no leakage under high pressure & harsh working conditions
- Easy-to-maintain without need for special tools
- High-quality cylinders suitable for all lines of distribution as well as major OEMs
