COMBINE PARTS & REPAIRS

2026 PARTS CATALOG

Dear Valued Customer
Welcome to our parts catalog! We spent a lot of time trying to organize it. Some of the parts might not be in the right section. If you do not see it just give us a call we will be glad to help.

Our services:
Most parts we stock are for 1600 to 2300 series combines. 5088-7088 combines have a lot the same parts to. We are moving on into flagship series. If we do not stock and you need it fast ask for direct ship.

We do uptime service on Caseih combines and heads to, we prefer to have them in the shop, however we service combines within 30min from our shop. And we try to help if you have in season breakdowns.

Prices:
Prices listed in the catalog are current as of the publishing date. We expect many of the prices to remain the same throughout the year, but some do fluctuate and we reserve the right to adjust as needed. When placing an order please let us know if price discrepancies are not acceptable.

Terms:
We accept cash or check. Net 15 terms are available subject to approval.

Shipping:
We use US Mail,UPS,Fedex and truck freight; which one we choose for a particular shipment is determined by weight and dimensions, destination zip code and value of items. If you have a reason to require a certain carrier, let us know.

Backorders:
In most cases backorders do not ship free. let us know if you want us to hold an order so we can ship it complete.

Returns:
Returns are inefficient for all of us, and freight carriers are the only ones who profit by them.
Order only what you need and can afford. Try to have model and SN; available when ordering.
Returns must be within 30 days of invoice date.

Warranties:
Most products come with a manufacturer warranty. Call us if you need to know how to handle a defective item. Abuse is usually not covered by warranty policies.

Concaves

Case IH 80 & Flagship Series

Simwire® Concave System

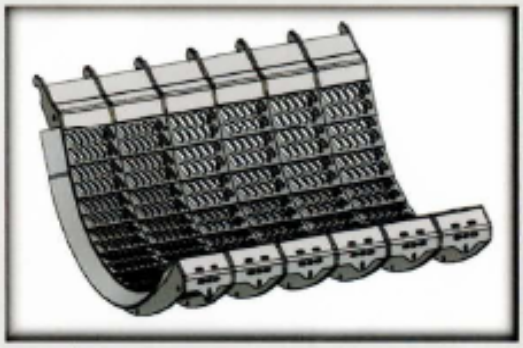

Why buy Kile Concaves?

Our concave system will give you,

1. **Bushels per hour**
2. **Quality sample**
3. **Leave nothing on the ground for peak performance!**

- **Noticeable quality difference with thrashing performance, which will help with saving fuel and horsepower.**
- **Maintains straw quality, does not over thresh.**
- **In most harvesting conditions, the self-cleaning cross bars reduce and eliminate leaf/stem plugging.**
- **With our efficient thrashing, you will have cleaner tank samples**
- **With our angled design a consistent rolling action across stepped surfaces maintains kernel quality.**

80 Series

Concave system setup for corn and bean

- Standard setup would be
  (3) 1/2" & (3) 5/8" Simwire®

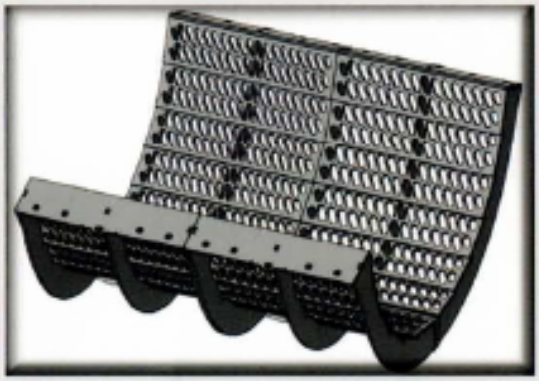

Concave system setup for small grain

- Standard setup would be
  (3) 1/4" & (3) 3/8" Simwire®

Concave system setup for rice

- Standard setup would be
  (6) Large square Simwire®

Flagship Series

Concave system setup for corn and bean

- Standard setup would be
- (1st postion) 1/2" L & R Simwire®
- (2nd postion) 5/8" L & R Simwire®

Concave system setup for small grain

- Standard setup would be
- (1st postion) 1/4" L & R Simwire®

Welded Simwire® Frames

- **Different Simwire® configurations can be ordered in a set.**
- **Frame contour matches the original equipment manufacture.**
- **Cover plates are available if required.**

Customer Comments:

The Kile Concave System does a phenomenal job harvesting our field corn, popcorn & beans, with NO cover plates needed! We received a premium for our beans because of their harvested quality. We had a higher percentage of clean popcorn seed with minimal spinsters. Our field corn was 275 bu/acre and the combine handled this with ease.
CH, West Central Iowa

Never have both my machines cut this clean. I love my concaves, Kile flights & rasp bars. We are knocking dead ripe heads to green heads. Super impressed with the diesel mileage!!
RL, Carter MT

Kile®

Rotor Transition Plates

Rebuild one of the most ignored feeding features on the rotor.

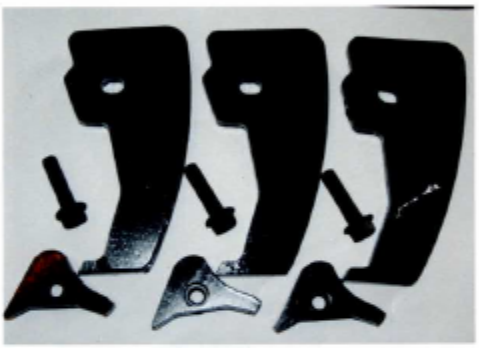

Features and Benefits:

- Increase material feeding in the transition cone/concave area
- Improves tank samples
- Increase ground speed/use less fuel
- Improves feeding with all crops
- Bolts on with no rotor modifications
- Made from 1/2" heat treated alloy steel for extended wear
- Compatible with ALL styles of impellor and flight systems
- Can be field installed
- Made in the USA

Brings worn plates back to OEM specs

Transition Plates are for specialty and standard rotors

60 Series Kit
3 plates, installation hardware & instructions

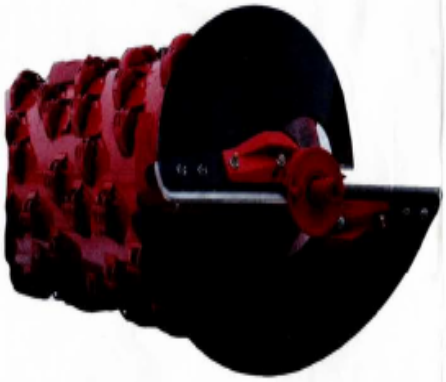

80 Series Kit
4 plates, installation hardware & instructions

- Bolt-on replacement's for OEM impellers are cold-formed, to maintain steel strength & integrity
- KRF style rotor flights feed like an AFX; KXF flight outperform & outwears OEM
- Dramatic improvement of threshing performance by even feeding into the concave area. Material efficiently spirals through the transition cone, reducing peak torque loads
- No back feeding, eliminating feeder chain stretch & feeder house clutch failures
- Extends service life of rotor belts & gear drives; transition cove & veins
- Increases ground speed; more available hp for threshing; fuel consumption is reduced
- Can be installed without removing rotor
- Wear plates available in cast chrome or hardened cast steel (sharpened or standard edges available) Sharpened wear plates assist in 'sizing' of material & can reduce 'wrapping' of crop

Our patent pending intake angle of flights & wearplates increases crop thru put, decreases wear

This photo shows how crop is managed with less material contacting & wearing on the flight. Replaceable & adjustable wear plates extend the life of the Kile® flighting system.

DON'T PUT GRAIN ON THE GROUND

Buy Our Liners...

Holes develop in the bottom of your trough due to wear or more often due to corrosion. When holes develop, the grain drops straight to the ground under the combine. Why spend over $1,200.00 on a replacement trough that is extremely difficult to remove and re-install?

Our Poly Last™ liners install much easier, offer excellent corrosion resistance, feed better, and are a far better solution than a patch or repair.
