When is the last time you did a parasite cleanse? How about your children?

While not a fun topic to talk about parasites are more common than most people realize and can have a big impact on your health. Whether you work on a farm, or have pets, parasites could be a hidden culprit behind your symptoms. Parasites can affect nearly every part of the body, leading to **chronic, unexplained health issues**. Since symptoms overlap with many other conditions, parasitic infections are often **overlooked** in modern medicine. Parasites can be the underlying cause of skin rashes, brain fog, respiratory and reproductive health issues, allergies and food sensitivities, and even autoimmune conditions.

The Importance of Parasite Cleansing

For thousands of years and around the world parasite cleansing has been a regular part of people's life. People not only used anti-parasitic herbs as medicine, but also many bitter antiparasitic herbs were part of people's regular diet helping to naturally keep parasites in check. Today our diets have moved away from many of those herbs and foods, to more bread, grains and sugars. Parasites thrive on these foods, with little to keep them in check. To make matters worse, modern medicine largely ignores the common underlying symptoms that point to parasites, and are choosing instead to treat symptoms as if they're something else. Parasite cleansing is a very important way to protect your health and the health of your children. Once or twice a year is an ideal routine for parasite cleansing, to support your gut health, and keep unwanted visitors in check.

The Best Just Got Better

Meet Mama Bear Gold

By Nancy J. Laudon

Nancy is the co-owner of Sprigs and mother of five! She has always had a passion for empowering women to take charge of their family's health. She enjoys talking about motherhood and all that comes with being a mother.

Our updated formula is packed with nutrients for mama and baby.

Years ago, when I was pregnant, I struggled to find a prenatal that worked for me. Most made me nauseous, and while gummies were easier to take, I knew they couldn't possibly provide everything my baby and I needed. After finally finding a high-quality whole food prenatal—at a steep price—we felt called to create something better: a nutrient-dense, affordable option moms could trust. That's how Mama Bear Prenatal was born.

From the beginning, it was designed to be different—whole food-based, highly absorbable, and free from fillers. And over the years, tens of thousands of moms have experienced the difference, often sharing how much better they felt—more energy, less nausea, and real support through pregnancy.

The Difference Is In The Details

Not all vitamins are created equal—the form of each nutrient matters. Some forms are harder to digest or less usable by the body, which can contribute to nausea or poor absorption. From the start, we've carefully selected high-quality,

bioavailable forms and continued refining them as new research emerged.

This year, we took it a step further and asked: *If we created Mama Bear Prenatal today, what would we do differently?*

The answer led to a few meaningful updates—introducing **Mama Bear Gold**.

What's New With Mama Bear Gold

• Added Choline (125 mg daily):

A key nutrient for baby's brain development, neural tube support, placental health, and overall maternal wellness. This was one of the most important additions we're excited to bring to the formula.

• Vitamin C from Acerola Cherry:

We transitioned from fermented citric acid to a plant-based source of vitamin C. While our original form was high-quality, many moms requested a whole food-derived option. To make this possible, we slightly adjusted the dosage to fit within capsule limits while maintaining effectiveness.

• Updated Nutrient Forms:

We improved the forms of several key nutrients—including B vitamins, vitamin D3, zinc, and selenium—to enhance digestion and bioavailability.

While these changes may seem small, they reflect our ongoing commitment to giving moms and babies the very best. Mama Bear Gold builds on everything you've loved—now even better.

We can't wait for you to experience the difference.

DO MEN HAVE HORMONES TOO?

THE PRODUCT WE ALMOST NEVER BROUGHT BACK

By Jonathan Laudon, Co-founder Sprigs Life
Jonathan is the co-owner of Sprigs and the father of five! He grew up in a holistic culture and has always had a deep passion for natural medicines and practices.

Two years ago, we stopped selling **Testo Strong**. Sprigs has always focused on helping moms and children with their health. **Testo Strong** was such a slow seller that we decided to stop making. It seemed like the right call.

Then the calls and messages started coming in. Men wanted to know where it went. They didn't want to be without it. Some guys bought up the last few bottles so they wouldn't run out. It was clear this product had been helping a lot of men feel better — we had stopped making it without fully understanding how much it mattered.

We decided to bring it back, and we made it better too — adding magnesium and other key ingredients to help men feel their best. Word spread *fast*. Here's why so many men need it.

What is testosterone?

Guys with high testosterone feel great, have energy, and are strong and sharp. As a man, you felt the changes that testosterone brings during puberty. As a teen, the increase of testosterone is what causes your voice to deepen, facial hair to begin to grow, strength and muscle mass to increase, and not to mention the other physical changes that manhood brings. For most men, testosterone is at its highest between 20 and 30 years of age. At around 30 years old, testosterone begins to gradually decrease at about 1% per year. Even healthy men start to feel the effect by around 40 or 45, often putting on some weight and not feeling the strength and energy they once did. The problem today is that many younger men are dealing with low testosterone. In fact, so many men are dealing with low testosterone that it has become a men's health crisis. Many studies have shown that today, the average man has 20% less testosterone compared to the 80s and 90s, and it is still rapidly decreasing.

What causes low testosterone and what can we do?

Processed foods: Today, on average, 60% of what men are eating is processed garbage, with all kinds of ingredients that wreak havoc on your testosterone levels. If you want to be on top of your game and feel great you have to eat real food. Eat meat, eggs, vegetables, and fruit, and avoid food that comes in a box with chemicals and preservatives. Avoid gas station snacks, chips, soda, and sugar like the plague.

Exercises: Throughout all of history men worked physically hard. Today, a lot of men have jobs that are not as physically demanding; if that's you, make sure you find

other ways to get exercise. You can bike, hike, play baseball, or play sports with your children. The main thing is to challenge yourself physically consistently.

Endocrine-Disrupting Chemicals: The endocrine system is the tissues and organs that produce and release hormones into the bloodstream. There are hundreds of chemicals we come into contact with daily that are officially classified as endocrine-disruptors. Many men work with some of the harshest endocrine-disruptors every day, including farm pesticides, gas fumes, paint, and many building materials like flame retardants and plastic products. Breathing the fumes and dust of these every day is no small thing and is a huge problem for testosterone health.

We can't completely avoid these chemicals or other challenges of our day, but thankfully, today, we know a lot about what we can take to help our bodies overcome these challenges and maintain healthy testosterone levels. That is why we made **Testo Strong XY**.

Feel the difference with Testo Strong XY

The ultimate hard-hitting men's formula. Feel the difference. If you are a man struggling with low energy, erectile dysfunction, sleep issues, difficulty concentrating, brain fog, or depression due to low testosterone, **Testo Strong XY** is designed for you. It has a powerful blend of herbs and minerals that your body needs to make testosterone. Note, you do have to take 6 capsules a day because **Testo Strong XY** combines what would be 3 separate products into one handy bottle. We encourage taking 3 in the morning and 3 at night, but if it is difficult to remember, you can take all 6 at one time. In extreme cases of need, you can safely double the dosage by taking 6 in the morning and 6 in the evening. Try **Testo Strong XY** today.

Here's What Our Customers Are Saying About Power Out & Power Cleanse...

"We started using the Power Cleanse and Power Out and we like it. I had heartburn problems and stomach ulcers. I was taking over-the-counter pills for heartburn for a year and after taking the cleanse, I don't need any pills and my ulcers cleared up. Now more and more people in our area are using it and liking it, and we're wondering if we can be a distributor."

— CUSTOMER IN NEW YORK

"I am sending an order for more Power Out and Power Cleanse. It really works. I felt so 'refreshed' after taking it. Now my husband wants to try it, too."

— CUSTOMER IN KENTUCKY

"What got me started is I used it myself and now the first thing I recommend to my clients is the Cleanse, especially if supplements are not working because of toxins, etc."

— CUSTOMER IN PENNSYLVANIA

"Thank you for the fast and friendly service. We feel the Power Out and Cleanse really do work."

— CUSTOMER IN PENNSYLVANIA

"Thank you for the wonderful product. I am almost done doing the cleanse and am pleased with the results I'm getting! I Have MTHFR and this has helped a lot to get rid of toxins that my body could not get rid of. May God bless your day!"

— CUSTOMER IN INDIANA

"Before I took the cleanse, I had unexplained abdominal pain literally every day. It remained during the cleanse, but when I finished, it disappeared. Wow!"

— CUSTOMER IN MICHIGAN

"I was doing blood work while doing the cleanse over a length of time, and the last blood test showed that the Roundup is almost all removed from my body."

— CUSTOMER IN NEW YORK

"I am a Practitioner and work with a lot of behavioral patients. I had a person who came in and said Power Out and Power Cleanse helped her nephew who had behavioral problems. I have tested your products 2 different ways and both tested very high, which is good. It looks like a very good detox. I want to place an order."

— CUSTOMER IN MINNESOTA

"Thank you for the great product! I'm pleased with the results that I've had."

— CUSTOMER IN ILLINOIS

"Don't ever stop making the Cleanse. That stuff WORKS! I used to get up in the morning and did not feel good enough to eat and did not feel good if I ate. I am not one to run to a bunch of pills, but this straightened things out for me. We keep Power Outs on hand just in case one of us gets a little constipated. Those things work."

— CUSTOMER IN KENTUCKY

"We were very impressed with the Power Cleanse! My husband used to get sick all the time. We were actually getting concerned that something worse was going on. He did this cleanse last summer — fall and he has not gotten sick with fever even once! It's been a year now. This is truly an amazing product!"

Tried some nutritional products which were draining and very little help. He took the cleanse and his attitude has gotten better, he has more energy and can work after supper. I feel like the cleanse got him back on track."

7 Strategies for Increasing Your Harmonica's Life Expectancy

- 1. Warm up your harmonica before playing**
Hold your harp in your hands for a few minutes to allow your body heat to reach the instrument. Then, start playing with gentle, long breaths; this will loosen the reeds. Playing your harmonica cold will alter the sound of the instrument and may lead to damaging your harp including the reeds.
- 2. Brush teeth or rinse your mouth with water before playing**
Your mouth should always be clean before playing. Prevent food particles, coffee, tea, soda, or anything other than water (and the natural moisture from your lungs and mouth) to enter the harmonica.
- 3. Don't play the harmonica with all your might**
This will destroy your harp fast.
- 4. Let your harmonica air-dry quickly after playing**
Reduce oxidation (rust) by allowing your harmonica to dry after playing.
- 5. Slap out residual moisture after playing**
This is another great strategy to reduce oxidation.
- 6. Transport harmonicas in a case**
If you want to keep a harmonica in your pocket and you don't have a case, then use a Ziplock bag.
- 7. And, most importantly, learn to play with moderate air pressure**
This will decrease the stress on the reeds. Be careful with 4, 5, and 7 draw bends because they can be more vulnerable to excessive air pressure. Please note, reeds in low-tuned harmonicas are more fragile than regular-tuned harps. If you play a low-tuned harmonica, be cautious with your air pressure.

Which Harmonica To Choose?

It's important to choose the right harmonica for what you want to play. If it doesn't feel right, it's no fun. And if it's no fun, what's the point? Here's a brief overview showing the most important characteristics of each type of harmonica.

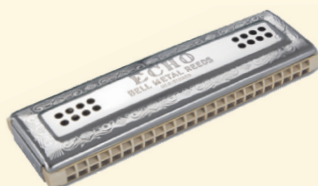

DIATONIC HARMONICA

This is the most common kind of harmonica, usually a small instrument with ten holes, containing 20 notes, also known as the blues harp. Diatonic harmonicas are tuned to a single major scale and are available in different keys. Their construction enables playing techniques known as bending and overbending, which expand the range of available notes and create the legendary and unique sound.

Preferred genres: folk, blues, pop, country, rock

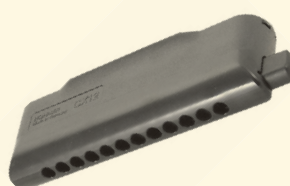

TREMOLO HARMONICA

Tremolo harmonicas are tuned to a single major scale. Two reeds per note of the same pitch, but tuned slightly apart, create a warm, gently pulsating tremolo effect. They do not permit note bending but are great for simple chords and melodies.

Preferred genres: folk songs, evergreens, Celtic folk music

CHROMATIC HARMONICA

Chromatic harmonicas are also tuned to a major scale, but the slide mechanism enables all missing notes of the chromatic scale to be played at the touch of a button, without the need for special playing techniques.

Preferred genres: classical music, jazz, pop

OCTAVE HARMONICA

Octave harmonicas get their voluminous, full-bodied sound through two reeds per tone tuned exactly one octave apart. They do not permit note bending but are great for rich chords. and simple melodies.

Preferred genres: traditional Alpine folk songs

CONCERTO STEEL

Richter-tuned Octave Harmonica with 40 stainless steel reeds for folk music and melodies of any kind. The Concerto Steel is a high grade octave-tuned double-reed diatonic. The notes are arranged exactly like on a 10-hole diatonic (Richter tuning). Tuning stability is especially important for octave-tuned harmonicas where two reeds in one channel are tuned exactly an octave apart. When drawing or blowing, the two reeds oscillate simultaneously, giving a full organ-like sound. Built-in windsavers (half-valving) minimize air loss, improve tone control and increase the overall volume while the playing pressure remains moderate.

1847 CLASSIC LOW

SEYDEL's Next-Generation Low-Harmonicas are the lowest sounding Blues harmonicas in the world - with new Baritone design & Stainless Steel reeds.

The 1847 CLASSIC is now available in super-low tunings, redesigned to include a 20% thicker comb and raised cover plates. Available keys range from LF# (low F sharp) down to LLE (double-low E). This innovation expands our 1847 line of stainless steel reed harmonicas to include the extreme bass range.

The double-low models (LL) are tuned two octaves lower than standard, making SEYDEL's 1847 LLE the lowest tuned diatonic harmonica worldwide. To get the desired sound out of the low-tuned models the notes need more space. The resonance chamber, increased by the 20% thicker comb (sealed walnut) and the higher cover plates of the new 1847 Low models, help to produce a fatter and louder sound. Special valves ensure very good airtightness even in the extreme low range.

Thanks to the raised cover plates rattling reed noise is a thing of the past and players get a greater sound projection towards the audience through the wide-opened back of the instrument.

WINGS OF LOVE FOUNDATION

What is Wings of love foundation?

Nineteen years ago our precious son Robert 4 month old was diagnosed with a brain tumor the size of a baseball, in the middle of his brain. "ATRT" was the type of cancer. They gave us no hope at all not even treatment. We took him to St. Jude Cancer Research Hospital in Memphis, Tennessee for a second opinion, and they told us the same thing. I remember the surgeon telling us, take Baby Robert home, and hold him as long as you can. We held him and loved him for 3 months. Then he left this world. During this time we not only struggled with the loss of our child but also had financial struggles. Sometimes my dad would pay me 3 weeks in advance, just so we could survive. During this time our family went through the hardest times of our lives. Two years later one night I woke up and these words came to me: "Jim the first step to helping yourself is to help others". I got up the next morning and called somebody that needed help. A few years ago I had the chance to team up with Milo Miller and Ivan Miller they helped me to fulfill my dreams. By using the Harmonica Hotline we can reach out to help families that are going through the same things we did. Right now through the donations that Harmonica Hotline listeners give we are funding weekly checks to families so they don't have to worry about financial burdens. This gives them more time to spend at the hospital with their child. If you want to become part of this program send your donation to: **Wings of Love Foundation, 2005 Johnson Springs Rd. Munfordville, KY. 42765**. If you want a receipt for tax deductible purpose please let us know and we can send you one. We want to personally thank everyone that has donated to this fund. May God bless all of you! Remember it's not just about you or me it is about us, by helping others we can make this world a beautiful place! Call 1-234-900-5096 for updates every 2 weeks.
