Customer Reviews

I'm thoroughly impressed with how effortlessly this unit handled the removal of our deceased hogs! Its lightweight and compact design makes it incredibly easy to transport and use, unlike any other cart for the job. -Myerstown PA

This is incredible! It worked like a charm when we cleaned out, even with a few to euthanize.

Step 4
Tighten cable

Step 5
Tip cart upright onto wheels

Step 6
Flip on switch & drive with thumb throttle

Step 7
Tip cart & unhook hog from cable

Fencing Brackets

1. Gate Rod Supports - \$32

These Hog Fencing Brackets are designed to repair broken hog fencing rods efficiently.

2. Gate Anchor Bracket - \$56

These Fencing Anchor Brackets are engineered for an easier one-person installation, minimizing the number of loose parts. For maximum stability, they can be used in conjunction with Gate Rod Supports.

3. Pin Support Bracket - \$13.50

These brackets provide essential support to the rods on aisle gates when the bottom plate has rusted out, which otherwise weakens the gate's ability to remain securely closed.

4. Pin Plate Replacement - \$14 Mild Steel, \$21 Stainless Steel

This bracket is designed to replace the gate plates that secure aisle gates, without the need to remove the old plate.

5. Double Acting Gate Latch - \$19

These latches are designed for one-handed operation, featuring a double-latching mechanism that prevents pigs from accidentally opening them and escaping into the aisles.
