KEY FINDINGS3

THE PRESIDENTIAL ELECTION IN PENNSYLVANIA3

THE STATE BUDGET5

METHODOLOGY6

ATTACHMENT A7

MARGINAL FREQUENCY REPORT.....8

The Franklin & Marshall College Poll is produced in conjunction with the Philadelphia Daily News, WGAL-TV (South Central PA), Pittsburgh Tribune Review, WTAE-TV (Pittsburgh), WPVI-TV6/ABC (Philadelphia), Times-Shamrock Newspapers, Harrisburg Patriot-News, and Lancaster Newspapers. It may be used in whole or in part, provided any use is attributed to Franklin & Marshall College.

Key Findings

The June 2012 Franklin & Marshall College Poll finds President Barack Obama with a comfortable lead over his Republican challenger Mitt Romney. The president enjoys significant advantages over Romney in his personal popularity and most voters believe he is better prepared to handle the presidency even though they are ambivalent about some of his major policy initiatives.

The Presidential Election in Pennsylvania

President Obama has led Mitt Romney in every Franklin & Marshall College Poll since August 2011 (see Figure 1). The president currently leads Romney in Pennsylvania 48% to 36% with 12% undecided. President Obama leads in most regions of the state with the exception of central Pennsylvania and the northwest, and he has comfortable leads among non-whites and women (see Attachment A). Mitt Romney holds a slight advantage among working-class whites.

Figure 1: Presidential Horse Races, Pennsylvania June 2012

If the November 2012 general election for president were being held today and the candidates were [rotate] Mitt Romney, the Republican, and Barack Obama, the Democrat, would you vote for [rotate] Mitt Romney, Barack Obama, some other candidate, or aren't you sure how you would vote?

Both President Obama's personal favorability ratings and his job approval ratings have improved in Pennsylvania since February. Mitt Romney's favorability ratings have slightly worsened. Registered voters in Pennsylvania believe the president is better prepared than Mitt Romney to handle specific aspects of his job and to better reflect their concerns and values (see Figure 2).

Figure 2: Presidential Attributes, Pennsylvania June 2012

Regardless of how you plan to vote, which presidential candidate do you think is best described by each of the following statements? Do you think Barack Obama or Mitt Romney...

The State Budget

Pennsylvania lawmakers are in the midst of preparing the state budget for the coming fiscal year. Governor Tom Corbett requested significant funding cuts in his February 2012 budget proposal to head off potential budget deficits. More registered voters in the state believe legislators should consider both tax increases and spending cuts (47%) to balance the state budget than either cuts (22%) or tax increases (10%) alone. More than seven in ten voters would like to see new taxes placed on smokeless tobacco and cigars and on natural gas extraction as a way of balancing the state budget (see Figure 3). Only one in five favors reducing spending on human service programs, local school districts or the state's Keystone recreation, park and conservation fund.

Figure 3: Support for State Revenue and Spending Proposals, Pennsylvania June 2012

Do you favor or oppose the following measures as a way for the state of Pennsylvania to balance its budget? Do you favor or oppose...(rotated)?

Methodology

The survey findings presented in this release are based on the results of interviews conducted May 29-June 4, 2012. The interviews were conducted at the Center for Opinion Research at Franklin & Marshall College under the direction of the poll's Director Dr. G. Terry Madonna, Head Methodologist Berwood Yost, and Senior Project Manager Angela Knittle. The data included in this release represent the responses of 412 Pennsylvania registered voters, including 207 Democrats, 154 Republicans, and 51 registered as Independent/Other. The sample of registered voters was obtained from Voter Contact Services. Survey results were weighted (age, gender, and party) using an iterative weighting algorithm to reflect the known distribution of those characteristics as reported by the Pennsylvania Department of State.

The sample error for this survey is +/- 4.8 percentage points. In addition to sampling error, this poll is also subject to other sources of non-sampling error. Generally speaking, two sources of error concern researchers most. Non-response bias is created when selected participants either choose not to participate in the survey or are unavailable for interviewing. Response errors are the product of the question and answer process. Surveys that rely on self-reported behaviors and attitudes are susceptible to biases related to the way respondents process and respond to survey questions.
