Eagle Viewing 2027

During the winter, eagles and other waterfowl migrate south to warmer places like Camanche and Pardee Reservoirs where fish and other food are plentiful. These reservoirs are perfect for the eagles in the winter months because the lakes offer a good food source with little human impact. Over the years, some of these eagles have remained and made Pardee and Camanche their permanent home. We would like to invite you to search for these resident and migratory eagles and other raptors on complimentary boat tours conducted by EBMUD Rangers.
