

Update: State-by-State Data — Annual Electricity Bills Up \$110 Per Family in 2025

While campaigning in 2024, President Donald Trump [repeatedly promised](#) that if he was elected, energy bills across the country would be “cut in half” within 12 months. However, this updated Joint Economic Committee – Minority analysis finds that electricity costs increased significantly in 2025, with households in nearly every state paying more for electricity in 2025 compared to 2024.

The Committee measured state-level electricity costs for 2025 using monthly electricity bill data from the federal Energy Information Administration (EIA). **On average, the Committee finds that American households paid approximately \$110 more in electricity costs in 2025 compared to 2024.** This is even higher than the increase the Committee projected last November, prior to the release of data for all of 2025. The Committee also finds that **annual electricity costs were higher in 2025 in nearly every state, and were at least 10 percent higher in 12 states and D.C.**

State	2024 Total Electricity Expenses for Average Household	2025 Total Electricity Expenses for Average Household	\$ Difference in Annual Spending	% Difference in Annual Spending
Alabama	\$2,080	\$2,230	\$150	7.2%
Alaska	\$1,720	\$1,770	\$50	2.9%
Arizona	\$1,920	\$1,890	-\$30	-1.6%
Arkansas	\$1,550	\$1,650	\$100	6.5%
California	\$1,930	\$1,870	-\$60	-3.1%
Colorado	\$1,210	\$1,290	\$80	6.6%
Connecticut	\$2,400	\$2,490	\$90	3.8%
Delaware	\$1,810	\$1,920	\$110	6.1%
District of Columbia	\$1,360	\$1,680	\$320	23.5%
Florida	\$1,870	\$2,010	\$140	7.5%
Georgia	\$1,810	\$1,930	\$120	6.6%
